Rising densities of human settlements, migration and transport to reduce distances to market, and specialization and trade facilitated by fewer international divisions are central to economic development. The transformations along these three dimensions density, distance, and division are most noticeable in North America, Western Europe, and Japan, but countries in Asia and Eastern Europe are changing in ways similar in scope and speed. 'World Development Report 2009: Reshaping Economic Geography' concludes that these spatial transformations are essential, and should be encouraged. The conclusion is not without controversy. Slum-dwellers now number a billion, but the rush to cities continues. Globalization is believed to benefit many, but not the billion people living in lagging areas of developing nations. High poverty and mortality persist among the world's 'bottom billion', while others grow wealthier and live longer lives. Concern for these three billion often comes with the prescription that growth must be made spatially balanced. The WDR has a different message: economic growth is seldom balanced, and efforts to spread it out prematurely will jeopardize progress. The Report: documents how production becomes more concentrated spatially as economies grow. proposes economic integration as the principle for promoting successful spatial transformations. revisits the debates on urbanization, territorial development, and regional integration and shows how today's developers can reshape economic geography.

As the sister book to " Introduction to Multicopter Design and Control, " published by Springer in 2017, this book focuses on using a practical process to help readers to deepen their understanding of multicopter design and control. Novel tools with tutorials on multicopters are presented, which can help readers move from theory to practice. Experiments presented in this book employ: (1) The most widely-used flight platform – multicopters – as a flight platform; (2) The most widely-used flight pilot hardware – Pixhawk – as a control platform; and (3) One of the most widely-used programming languages in the field of control engineering – MATLAB + Simulink – as a programming language. Based on the current advanced development concept Model-Based Design (MBD) process, the three aspects mentioned above are closely linked. Each experiment is implemented in MATLAB and Simulink, and the numerical simulation test is carried out on a built simulation platform. Readers can upload the controller to the Pixhawk autopilot using automatic code generation technology and form a closed loop with a given real-time simulator for Hardware-In-the-Loop (HIL) testing. After that, the actual flight with the Pixhawk autopilot can be performed. This is by far the most complete and clear guide to modern drone fundamentals I've seen. It covers every element of these advanced aerial robots and walks through examples and tutorials based on the industry's leading open-source software and tools. Read this book, and you'll be well prepared to work at the leading edge of this exciting new industry. Chris Anderson, CEO 3DR and Chairman, the Linux Foundation's Dronecode Project The development of a multicopter and its applications is very challenging in the robotics area due to the multidomain knowledge involved. This book systematically addresses the design, simulation and implementation of multicopters with the industrial leading workflow – Model-Based Design, commonly used in the automotive and aero-defense industries. With this book, researchers and engineers can seamlessly apply the concepts, workflows, and tools in other engineering areas, especially robot design and robotics application development. Personal Structures presents an ongoing project that deals with questions concerning time, space and existence. This is the second book in the Time.

Space. Existence series and involves the personal participation of 46 artists from different parts of the world, in a combination of internationally renowned artists and others whose oeuvre is less known. The concepts time, space and existence are highlighted in very personal ways and from unusual points of view. The many photographs of the artworks and encounters with the artists convey fascinating insights into their being, ideas and work. Seven art projects with established artists centralise their thoughts to a great extent. In addition, the book emphasises two Personal Structures exhibitions that were part of the Venice Biennale in 2011 and 2013. This publication also contains several interviews, artists' statements, and symposium contributions that discuss the theme of this book in detail. Personal Structures was initiated in 2002 by the Dutch artist Rene Rietmeyer. His observation that even in the most distant places artists are occupied with time, space and existence, led to the idea of bringing several of these artists together in publications, symposia and exhibitions. English and Japanese text.

The Routledge Encyclopedia of Translation Technology provides a state-of-the-art survey of the field of computer-assisted translation. It is the first definitive reference to provide a comprehensive overview of the general, regional and topical aspects of this increasingly significant area of study. The Encyclopedia is divided into three parts: Part One presents general issues in translation technology, such as its history and development, translator training and various aspects of machine translation, including a valuable case study of its teaching at a major university; Part Two discusses national and regional developments in translation technology, offering contributions covering the crucial territories of China, Canada, France, Hong Kong, Japan, South Africa, Taiwan, the Netherlands and Belgium, the United Kingdom and the United States Part Three evaluates specific matters in translation technology, with entries focused on subjects such as alignment, bitext, computational lexicography, corpus, editing, online translation, subtitling and technology and translation management systems. The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline. All the articles are self-contained, extensively cross-referenced, and include useful and up-to-date references and information for further reading. It will be an invaluable reference work for anyone with a professional or academic interest in the subject.

Smart Product-Service Systems draws on innovative practice and academic research to demonstrate the unique benefits of Smart PSS and help facilitate its effective implementation. This comprehensive guide explains how Smart PSS reshapes product-service design in several unique aspects, including a closed-loop product design and redesign manner, value co-creation with integrated human-machine intelligence, and solution design context-awareness. Readers in industry as well as academia will find this to be an invaluable guide to the current body of technical knowledge on Smart Product-Service Systems (Smart PSS), future research trajectories, and experiences of implementation. Rapid development of information and communication technologies, artificial intelligence, and digital technologies have driven today's industries towards the so-called digital servitization era. As a result, a promising IT-driven business paradigm, known as Smart Product-Service Systems (Smart PSS) has emerged, where a large amount of low cost, high performance smart, connected products are leveraged, together with their generated on-demand services, as a single solution bundle to meet individual customer needs. - Explains what factors a company needs to consider in their transition towards digital servitization and its advantages - Describes how this field relates to the sustainability movement, and how Smart PSS can be implemented in a sustainable way - Includes detailed case studies from different industries, including DELTA Electronics Inc. Singapore (smart commercialization), COMAC aviation industry (smart manufacturing servitization), and Van High Tech (smart building services)

The book consists of 80 letters to various students of magick. Originally to be titled Aleister Explains Everything, the letters offer his insights into both magick and Thelema—Crowley's religious and ethical system—with a clarity and wit often absent in his earlier writings. The individual topics are widely varied, addressing the orders O.T.O. and A.A. Qabalah, Thelemic morality, Yoga, astrology, various magical techniques, religion, death, spiritual visions, the Holy Guardian Angel, and other issues such as marriage, property, certainty, and meanness. The book is considered by many as perhaps Crowley's most notable contribution to the occult studies, defining magick for the 20th century.

Ashtanga Yoga: Practice and Philosophy is the first book of its kind, presenting a comprehensive guide to all eight limbs of Ashtanga Vinyasa Yoga. Join author Gregor Maehle, a seasoned yogi and compassionate teacher, as he guides you through: • the history and lineage of yoga • the fundamentals of breath, bandhas (energy locks within the body), drishti (the focal point of the gaze), and vinyasa (sequential movement) • a detailed breakdown of the asanas of the Ashtanga Primary Series, following the traditional vinyasa count • a lively and authentic rendering of the complete Yoga Sutra of Patanjali, yoga's ancient sacred text • a glossary of yoga terminology In the asana section, Maehle describes each posture with clear, meticulous instructions, photographs, anatomical illustrations, and practical tips. Information on the mythological background and yogic context of specific postures brings further insight to the practice. In the philosophy section, Maehle illuminates the Yoga Sutra using the major ancient commentaries as well as his own insights. This volume makes the entire path of Ashtanga Yoga accessible to modern practitioners. Both practical guide and spiritual treatise, Ashtanga Yoga is an excellent introduction to the eight limbs of yoga and an invaluable resource for any yoga teacher or practitioner.

A faithful reproduction of the 1970 Floyd Clymer publication of the official Honda Factory Workshop Manual specific to the 1962-1969 n10 50cc Sport Cub series of motorcycles. This manual includes all of the data that you would expect from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components. It also includes a comprehensive troubleshooting section plus tables of technical data, tolerances and fits making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 55 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the illustrations make up for any difficulty in understanding what needs to be done! There are separate

sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.

This is not just another English version of the Tao Te Ching, this is the new English version that makes good sense to readers for the very first time in the history. While the Tao Te Ching is a famous ancient Chinese classic and has substantially influenced the lives of so many people over the centuries, it is also one of the most profound and misinterpreted spiritual and philosophical text. Some of its chapters may appear confusing and difficult to understand. What can you do when you just can not make sense of them? Yuhui Liang, a Tao Te Ching expert, has found many misinterpretations in many English and Chinese versions of The Tao Te Ching. After years of research and study, he has made significant progress in three important areas and successfully corrected all the misinterpretations. And his new translation let Lao Tzu's words finally make good sense to readers. His work takes the translation of the Tao Te Ching to the next level of better accuracy, coherence and contextualization, while keeping the sentences reasonably concise. You can benefit from this book whether you are a first time reader or a long time fan. It will help you read Lao Tzu's book with greater understanding, reexamine its original meaning, and find out what it means to you today. The content of this book: Introduction, Translation, Pinyin version, Annotation, Notes, and a Brief Analysis of the Symbol Pair for each of eighty one chapters.
