"Recollections of a Pioneer" is an autobiographical account by J. Watt Gibson, which primarily focuses on the author's participation in the American Civil War. The book was written at the solicitation of many Gibson's friends and acquaintances who urged that his recollections of that period ought to be preserved. It covers the author's first journey to California in the late 1840s, gold mining, crossing the plains with cattle and his experiences during and after the Civil War, and ends with his return to Missouri and getting married in 1868.

The issues surrounding the comparability of various tests used to assess performance in schools received broad public attention during congressional debate over the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union Address. Proponents of Voluntary National Tests argue that there is no widely understood, challenging benchmark of individual student performance in 4th-grade reading and 8th-grade mathematics, thus the need for a new test. Opponents argue that a statistical linkage among tests already used by states and districts might provide the sort of comparability called for by the president's proposal. Public Law 105-78 requested that the National Research Council study whether an equivalency scale could be developed that would allow test scores from existing commercial tests and state assessments to be compared with each

other and with the National Assessment of Education Progress. In this book, the committee reviewed research literature on the statistical and technical aspects of creating valid links between tests and how the content, use, and purposes of education testing in the United States influences the quality and meaning of those links. The book summarizes relevant prior linkage studies and presents a picture of the diversity of state testing programs. It also looks at the unique characteristics of the National Assessment of Educational Progress. Uncommon Measures provides an answer to the question posed by Congress in Public Law 105-78, suggests criteria for evaluating the quality of linkages, and calls for further research to determine the level of precision needed to make inferences about linked tests. In arriving at its conclusions, the committee acknowledged that ultimately policymakers and educators must take responsibility for determining the degree of imprecision they are willing to tolerate in testing and linking. This book provides science-based information with which to make those decisions.

"A Visitor for Bear has the feel of a classic, and it's so cozy no parent could object to reading it aloud every night." — The New York Times Book Review (starred review) Features an audio read-along! Bear is quite sure he doesn't like visitors. He even has a sign. So when a mouse taps on his door one day, Bear tells him to leave. But the mouse — who keeps popping up in the most unexpected places — just won't go away! Cheery persistence wears down the curmudgeonly Bear in a wry comedy of manners that ends in a most unlikely friendship.

The story of a relationship across two decades, of Jolene's search for Martin Sloane when one day he disappears from their home

without warning or explanation, is told in a novel that brilliantly and movingly explores the vagaries of love and friendship, the burdens of personal history, and the enigmatic power of art.

#### The 6th Grade Nickname Game Capstone

A funny and fast-paced story about two best friends whose innocent game could make them not-so legendary, from New York Times bestselling author Gordon Korman. Best friends Jeff and Wiley are legends. There is practically no one in their school who hasn't been nicknamed by the duo. They've dubbed their own underachieving class "The Dim Bulbs"; their pop-eyed principal is better known as "Deer in Headlights"; and their enormous new English teacher, Mr. Hughes, is "Mr. Huge." But now some of the nicknames that Jeff and Wiley have invented are backfiring on them. Will the duo be able to get it together before it's too late?

#### Trouble in a Fur Coat Harper Collins

Maya Angelou's brave, defiant poem celebrates the courage within each of us, young and old. From the scary thought of panthers in the park to the unsettling scene of a new classroom, fearsome images are summoned and dispelled by the power of faith in ourselves. Angelou's strong verse is matched by the daring vision of artist Jean-Michel Basquiat, whose childlike style reveals the powerful emotions and fanciful imaginings of youth. Together, Angelou's words and Basquiat's paintings create a place where every child--indeed every person--may experience his or her own fearlessness.

"This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics" (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we're starting to realize it's not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we're at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We're drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so ubiquitous as

plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences." —SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." —Publishers Weekly "A compulsively interesting story. Buy it (with cash)." —Bill McKibben, author of *The End of Nature* "What a great read—rigorous, smart, inspiring, and as seductive as plastic itself." —Karim Rashid, designer

Wall-E meets Hatchet in this New York Times bestselling illustrated middle grade novel from Caldecott Honor winner Peter Brown Can a robot survive in the wilderness? When robot Roz opens her eyes for the first time, she discovers that she is all alone on a remote, wild island. She has no idea how she got there or what her purpose is--but she knows she needs to survive. After battling a violent storm and escaping a vicious bear attack, she realizes that her only hope for survival is to adapt to her surroundings and learn from the island's unwelcoming animal inhabitants. As Roz slowly befriends the animals, the island starts to feel like home--until, one day, the robot's mysterious past comes back to haunt her. From bestselling and award-winning author and illustrator Peter Brown comes a heartwarming and action-packed novel about what happens when nature and technology collide. *Nature's Fireworks* Createspace Independent Publishing Platform

This lecture by Mott, delivered 17 December 1849, was in response to one by an unidentified lecturer criticizing the demand for equal rights for women. She makes a very gentle appeal, here, for women's enfranchisement, placing emphasis, instead on the injustices done to women in marriage.

#### A Framework for K-12 Science Education Archie Comic Publications (Trade)

Science, engineering, and technology permeate nearly every

facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science Education proposes a new approach to K-12 science education that will capture students' interest and provide them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education outlines a broad set of expectations for students in science and engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and engineering; scientific and engineering practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

Apolonia "Lina" Flores is a sock enthusiast, a volleyball player, a science lover, and a girl who's just looking for answers. Even though her house is crammed full of books (her dad's a bibliophile), she's

---

having trouble figuring out some very big questions, like why her dad seems to care about books more than her, why her best friend's divorced mom is obsessed with making cascarones (hollowed eggshells filled with colorful confetti), and, most of all, why her mom died last year. Like colors in cascarones, Lina's life is a rainbow of people, interests, and unexpected changes. In her first novel for young readers, Diana López creates a clever and honest story about a young Latina girl navigating growing pains in her South Texan city.
