Planning and management for tourism growth is becoming essential in the context of sustainable development. Particularly so since many tourist destinations are facing severe pressures from tourist flows and activities. Such pressures are evidenced in terms of dysfunctions (congestion, environmental degradation, etc) which ultimately affect the attraction and competitiveness of tourism destinations. The development of tourism should be considered in accordance with sustainability principles. In this context respecting the capacity of the local system to sustain growth becomes a key challenge. This book examines the use of various tools to define, measure and evaluate tourism carrying capacity (TCC) - a tool aiming to impose limits for entering certain tourist destinations or using certain activities. Drawing on case studies from France, Spain, Italy, Greece, the UK, the Netherlands, Ireland, Belgium, Austria, Germany and Finland, it presents practical experiences of implementing TCC in various tourist destinations (i.e. historic towns, coastal zones, islands, etc). It draws conclusions regarding the measurement and implementation of TCC assessment and provides further guidelines towards a comprehensive methodological framework for assessing tourism sustainability in the future. PARENTING NEVER ENDS. From the founders of the #1 site for parents of teens and young adults comes an essential guide for building strong relationships with your teens and preparing them to successfully launch into adulthood The high school and college years: an extended roller coaster of academics, friends, first loves, first break-ups, driver's ed, jobs, and everything in between. Kids are constantly changing and how we parent them must change, too. But how do we stay close as a family as our lives move apart? Enter the co-founders of *Grown and Flown*, Lisa Heffernan and Mary Dell Harrington. In the midst of guiding their own kids through this transition, they launched what has become the largest website and online community for parents of fifteen to twenty-five year olds. Now they've compiled new takeaways and fresh insights from all that they've learned into this handy, must-have guide. *Grown and Flown* is a one-stop resource for parenting teenagers, leading up to—and through—high school and those first years of independence. It covers everything from the monumental (how to let your kids go) to the mundane (how to shop for a dorm room). Organized by topic—such as academics, anxiety and mental health, college life—it features a combination of stories, advice from professionals, and practical sidebars. Consider this your parenting lifeline: an easy-to-use manual that offers support and perspective. *Grown and Flown* is required reading for anyone looking to raise an adult with whom you have an enduring, profound connection. *Admission Assessment Exam Review E-Book* First-Year Experience Monograp

College Algebra provides a comprehensive exploration of algebraic principles and meets scope and sequence requirements for a typical introductory algebra course. The modular approach and richness of content ensure that the book meets the needs of a variety of courses. College Algebra offers a wealth of examples with detailed, conceptual explanations, building a strong foundation in the material before asking students to apply what they've learned. Coverage and Scope In determining the concepts, skills, and topics to cover, we engaged dozens of highly experienced instructors with a range of student audiences. The resulting scope and sequence proceeds logically while allowing for a significant amount of flexibility in instruction. Chapters 1 and 2 provide both a review and foundation for study of Functions that begins

in Chapter 3. The authors recognize that while some institutions may find this material a prerequisite, other institutions have told us that they have a cohort that need the prerequisite skills built into the course. Chapter 1: Prerequisites Chapter 2: Equations and Inequalities Chapters 3-6: The Algebraic Functions Chapter 3: Functions Chapter 4: Linear Functions Chapter 5: Polynomial and Rational Functions Chapter 6: Exponential and Logarithm Functions Chapters 7-9: Further Study in College Algebra Chapter 7: Systems of Equations and Inequalities Chapter 8: Analytic Geometry Chapter 9: Sequences, Probability and Counting Theory

Developing and Sustaining Successful First-Year Programs First-year programs and interventions have become critical launching pads for student success and retention in higher education. However, these programs often flounder not because of what they are trying to do, but because of the ways in which they are implemented. *Developing and Sustaining Successful First-Year Programs* offers faculty, academic administrators, and student affairs professionals a comprehensive and practical resource that includes step-by-step guidance for developing new first-year programs and enhancing existing programs. The book explores the key elements that contribute to sustained student success and the programs that have the capacity to continue to meet student needs while making the most of scarce resources. The authors show how to create and sustain critical partnerships, put in place the needed organizational structures, and include strategies for developing effective assessments and evaluations. *Developing and Sustaining Successful First-Year Programs* is filled with illustrative examples and profiles of successful programs from a range of institutions that vary in size, type, selectivity, and culture. Examples of common programs and interventions include summer bridge programs, student orientation, first-year seminars, learning communities, residential programs, developmental education, and many more. Based in scholarly literature, theory, and practice, the book highlights the initiatives that facilitate the transition, learning, development, and success of new college students.

FSOT Study Guide - FSOT Prep Secrets, Full-Length Practice Exam, Step-by-Step Review Video Tutorials for the Foreign Service Officer Test: [4th Editio R&L Education

This investigation examined the practice of relying on field test item calibrations in advance of the operational administration of a large scale assessment for purposes of equating and scaling. Often termed "pre-equating," the effectiveness of this method is explored for a statewide, high-stakes assessment in grades three, five, and seven

for the content areas of language arts, mathematics, and social studies. Pre-equated scaling was based on item calibrations using the Rasch model from an off-grade field test event in which students tested were one grade higher than the target population. These calibrations were compared to those obtained from post-equating, which used the full statewide population of examinees. Item difficulty estimates and Test Characteristic Curves (TCC) were compared for each approach and found to be similar. The Root Mean Square Error (RMSE) of the theta estimates for each approach ranged from .02 to .12. Moreover, classification accuracy for the pre-equated approach was generally high compared to results from post-equating. Only 3 of the 9 tests examined showed differences in the percent of students classified as passing; errors ranged from 1.7 percent to 3 percent. Measurement equivalence between the field test and operational assessment was also explored using the Differential Functioning of Items and Tests (DFIT) framework. Overall, about 20 to 40 percent of the items on each assessment exhibited statistically significant Differential Item Functioning (DIF). Differential Test Functioning (DTF) was significant for fully 7 tests. There was a positive relationship between the magnitude of DTF and degree of incongruence between pre-equating and post-equating. Item calibrations, score consistency, and measurement equivalence were also explored for a test calibrated with the one, two, and three parameter logistic model, using the TCC equating method. Measurement equivalence and score table incongruence was found to be slightly more pronounced with this approach. It was hypothesized that differences between the field test and operational tests resulted from 1) recency of instruction 2) cognitive growth and 3) motivation factors. Additional research related to these factors is suggested.

Test Equating, Scaling, and Linking Springer

By providing an introduction to test equating which both discusses the most frequently used equating methodologies and covering many of the practical issues involved, this volume expands upon the coverage of the first edition by providing a new chapter on test scaling and a second on test linking.

History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Tactical Combat Casualty Care (TCCC) has saved hundreds of lives during our nation's conflicts in Iraq and Afghanistan. Nearly 90 percent of combat fatalities occur before a casualty reaches a medical treatment facility. Therefore, the prehospital phase of care is needed to focus on reducing the number of combat deaths. However, few military physicians have had training in this area and, at the onset of hostilities, most combat medics, corpsmen, and pararescue personnel in the U.S. military have been trained to perform battlefield trauma care through civilian-based trauma courses. These courses are not designed for the prehospital combat environment and do not reflect current practices in the area of prehospital care. TCCC was created to train Soldiers and medical personnel on current best practices for medical treatment from the point of injury to evacuation to Role 3 facilities

Exploring the Efficacy of Pre-equating a Large Scale Criterion-referenced Assessment with Respect to Measurement Equivalence Springer Science & Business Media

Explores what teachers can do to prepare high school students to write effectively in college and presents fifteen narratives and studies suggesting that secondary and postsecondary partnerships can significantly improve students' ability to succeed at college-level writing tasks.

Tsi Assessment Secrets Government Printing Office

Following up on her acclaimed *Teach Students How to Learn*, that describes teaching strategies to facilitate dramatic improvements in student learning and success, Sandra McGuire here presents these "secrets" direct to students. Her message is that "Any student can use simple, straightforward strategies to start making A's in their courses and enjoy a lifetime of deep, effective learning."

Beginning with explaining how expectations about learning, and the study efforts required, differ between college and secondary school, the author introduces her readers, through the concept of metacognition, to the importance and powerful consequences of understanding themselves as learners. This framework and the recommended strategies that support it are useful for anyone moving on to a more advanced stage of education, so this book also has an intended audience of students preparing to go to high school, graduate school, or professional school. In a conversational tone, and liberally illustrated by anecdotes of past students, the author combines introducing readers to concepts like Bloom's Taxonomy (to illuminate the difference between studying and learning),

fixed and growth mindsets, as well as to what brain science has to tell us about rest, nutrition and exercise, together with such highly specific learning strategies as how to read a textbook, manage their time and take tests. With engaging exercises and thought-provoking reflections, this book is an ideal motivational and practical text for study skills and first year experience courses.
