The oil and gas industry is at a crossroads. Recent low prices, rapidly growing alternative fuels like renewables, the permanent swing from peak oil to super abundance, shifting consumer preferences, and global pressures to decarbonize suggest a challenged industry for the foreseeable future. Digital advances offer ways to lower costs of production, improve productivity, reduce carbon emissions, and regain public confidence. A wait-and-see attitude to digital innovation has failed many industries already, and the leaders of oil and gas urgently need guidance on how digital both disrupts and enhances their industry. Written by the world's leading experts on the intersection of digital technologies and the oil and gas industry, Bits, Bytes, and Barrels sets out the reasons why adoption is slow, describes the size and scale of both the opportunity and the threat from digital, identifies the key digital technologies and the role that they play in a digital future, and recommends a set of actions for leaders to take to accelerate the adoption of digital in the business. Providing an independent and expert perspective, Bits, Bytes, and Barrels addresses the impacts of digital across the breadth of the industry--from onshore to offshore, from upstream to midstream to integrated--and outlines a roadmap to help the decision-makers at all levels of the industry take meaningful action toward promising and rewarding digital adoption.

Commentary on the American Prayer Book Routledge
Win or lose, Bernie has reshaped the landscape of American politics. Where does the political revolution go next? The political ambitions of the movement behind Bernie Sanders have never been limited to winning the White House. Since Bernie first entered the presidential primaries in 2016, his supporters have worked to organize a revolution intended to encourage the active participation of millions of ordinary people in political life. That revolution is already underway, as evidenced by the massive growth of the Democratic Socialists of America, the teachers Bernie motivated to lead strikes across red and blue states, and the rising new generation of radicals in Congress—led by Alexandria Ocasio-Cortez and Ilhan Omar—inspired by his example. In Bigger than Bernie, activist writers Meagan Day and Micah Uetricht give us an intimate map of this emerging movement to remake American politics top to bottom, profiling the grassroots organizers who are building something bigger, and more ambitious, than the career of any one candidate. As participants themselves, Day and Uetricht provide a serious analysis of the prospects for long-term change, offering a strategy for making “ political revolution ” more than just a campaign slogan. They provide a road map for how to entrench democratic socialism in the halls of power and in our own lives. Bigger than Bernie offers unmatched insights into the people behind the most unique campaign in modern American history and a clear-eyed sense of how the movement can sustain itself for the long haul.

Movement Over Maxes is a foundational training program that serves as that starting point for any athlete. It functions as a guide for all coaches to understand and implement basic movement patterns with a long-term development approach. It is a starting point that values movement above all. It is built to create movement competencies that will carry athletes through future endeavors with a solid foundation of development. The book Movement Over Maxes will provide fundamental progressions to the Big 5 movement patterns for all athletes. These are movement patterns every developing athlete should know: how to squat, hinge, push, pull, brace, land, jump, and sprint. The basics are the basics, whether the athlete is in high school or college. Although it was optimally built for the overhead athlete, this program isn't necessarily one of specialization. It is focused on developing the entire athlete and quality movement first and foremost so future loading can take place. Every concept in this manual will build upon the previous ones, leaving athletes with a well-rounded foundation. Movement Over Maxes was created for the coach who wears every hat for their program... the coach who mows the grass, drags the infield, handles the equipment, and trains the athletes. This is for the coach who devotes their life to not only creating better baseball players, but growing boys into men through sport.

Media bias has been a hot-button issue for several decades and it features prominently in the post-2016 political conversation. Yet, it receives only spotty treatment in existing materials aimed at political communication or introductory American politics courses. Evaluating Media Bias is a brief, supplemental resource that provides an academically informed but broadly accessible overview of the major concepts and controversies involving media bias. Adam Schiffer explores the contours of the partisan-bias debate before pivoting to real biases: the patterns, constraints, and shortcomings plaguing American political news. Media bias is

more relevant than ever in the aftermath of the presidential election, which launched a flurry of media criticism from scholars, commentators, and thoughtful news professionals. Engaging and informative, this text reviews what we know about media bias, offers timely case studies as illustration, and introduces an original framework for unifying diverse conversations about this topic that is the subject of so much ire in our country. Evaluating Media Bias allows students of American politics, and politically aware citizens alike, the means of detecting and evaluating bias for themselves, and thus join the national conversation about the state of American news media.

In this inspiring and provocative memoir about a young black man, Caylin Moore tells the against-all-odds story of his rise from racial injustice and cruel poverty in gang-ridden Los Angeles to academic success at the University of Oxford, with hope as his compass. A Dream Too Big is for readers who want to ... enjoy a compelling, true, hard-to-believe inspirational story; thoughtfully embrace a long-overdue conversation about equality and justice in America; and be inspired and find hope from a firsthand account of redemption through even the most painful life experiences. When Caylin Louis Moore was a young child, his mother gathered her three young children and fled an abusive marriage, landing in poverty in a heavily policed, gang-ridden community. When Moore's mother suffered from health complications and a devastating experience in the hospital and his father was sentenced to life imprisonment, Moore was forced to enter adulthood prematurely. His hope was fueled by embracing his mother's steely faith in a brighter future. Moore skirted the gangs, the police, and the violence endemic to Compton to excel as a student and athlete, eventually reaching the pinnacles of academic achievement as a Rhodes Scholar. Moore's eye-opening, against-all-odds story reveals that there is no such thing as a dream too big.

"An extremely useful parenting handbook... truly outstanding ... strongly recommended." --Library Journal (starred review)

"A tremendous resource for parents and professionals alike." --Thomas Atwood, president and CEO, National Council for Adoption The adoption of a child is always a joyous moment in the life of a family. Some adoptions, though, present unique challenges. Welcoming these children into your family--and addressing their special needs--requires care, consideration, and compassion. Written by two research psychologists specializing in adoption and attachment, The Connected Child will help you: Build bonds of affection and trust with your adopted child Effectively deal with any learning or behavioral disorders Discipline your child with love without making him or her feel threatened "A must-read not only for adoptive parents, but for all families striving to correct and connect with their children." --Carol S. Kranowitz, author of The Out-of-Sync Child "Drs. Purvis and Cross have thrown a life preserver not only to those just entering uncharted waters, but also to those struggling to stay afloat." --Kathleen E. Morris, editor of S. I. Focus magazine "Truly an exceptional, innovative work . . . compassionate, accessible, and founded on a breadth of scientific knowledge and clinical expertise."

--Susan Livingston Smith, program director, Evan B. Donaldson Adoption Institute "The Connected Child is the literary equivalent of an airline oxygen mask and instructions: place the mask over your own face first, then over the nose of your child. This book first assists the parent, saying, in effect, 'Calm down, you're not the first mom or dad in the world to face this hurdle, breathe deeply, then follow these simple steps.' The sense of not facing these issues alone--the relief that your child's behavior is not off the charts--is hugely comforting. Other children have behaved this way; other parents have responded thusly; welcome to the community of therapeutic and joyful adoptive families."

Operating in remote rural areas, officers and vigilantes knew they could hang, shoot, burn, and beat victims to death without scrutiny. A culture of impunity prevailed. The abuses were so pervasive that in 1919 the Texas legislature investigated the charges and uncovered a clear pattern of state crime. Records of the proceedings were soon filed away as the Ranger myth flourished. A groundbreaking work of historical reconstruction, The Injustice Never Leaves You has upended Texas's sense of its own history. A timely reminder of the dark side of American justice, it is a riveting story of race, power, and prejudice on the border.

Advance praise for Service Innovation: "To the CEOs of all service companies I deal with: READ THIS BOOK!" -- Dave Wascha, senior director, Bing Product Management, Microsoft Corporation "Lance Bettencourt deftly blends his

academic and consulting experience to provide an example-rich, readable, practical, and innovative discussion of service innovation." -- Leonard Berry, coauthor of *Management Lessons from Mayo Clinic* "Provides the robust framework to design services that unlock growth opportunities for every business." -- Lance Reschke, vice president, Ceridian Corporation "The tools and guidance in this book will inspire companies, small and large, to create effective and innovative services that are desperately needed." -- Mary Jo Bitner, Ph.D., W. P. Carey School of Business, Arizona State University, and coauthor of *Services Marketing: Integrating Customer Focus Across the Firm* "Cracks the code from the fuzzy front end through the complete life cycle of Service Innovation." -- Angelo Rago, division vice president, Global Customer Services, Abbott Medical Optics "Filled with rich examples of how firms can innovate service through helping customers get jobs done." -- Stephen W. Brown, Ph.D., W. P. Carey School of Business, Arizona State University "Any leader intent on providing distinctive value to customers must read *Service Innovation*." -- Michael Reynolds, staff vice president, Commercial Marketing, WellPoint, Inc. If there's one truism about the service sector, it's that businesses don't succeed by inventing a better mousetrap; they succeed by finding the best, most cost-effective way to get rid of their customers' mice. In industries ranging from heavy machinery to health care to financial services to consumer goods, service innovation is helping businesses find new revenue streams--and enhance existing ones--by satisfying their customer's need to get things done. Few understand this better than Lance Bettencourt, a strategy adviser at Strategyn and a leading educator in management innovation consulting. And in *Service Innovation*, Bettencourt gives a master's class on the art and science of creating breakthrough service products. True service innovation demands that you shift the focus away from the solution and back to the customer. To achieve this shift in your business--one that takes you from making educated guesses to building a clear model to guide service innovation--Bettencourt instructs on the finer points of how to rethink your approach to the customer's needs: how the customer defines value in a product or service. Bettencourt mines nearly 20 years' experience in teaching and advising clients with service- and product-dominant businesses to demonstrate proven ways you can build, streamline, and focus your company's service product innovation processes. Among the numerous key ideas and practices are: Insight on understanding the different types of clients you serve—and how your products deliver value to them Ways to design specific frameworks for discovering service innovation

opportunities for new, improved, and supplementary service products Practical guidance on staying focused on the "fuzzy front end" of service innovation The fundamental elements of a winning service strategy Finding new ways to help people solve problems and get things done is why there are goods and services in the first place. And in *Service Innovation*, Lance Bettencourt fills a vital need by delivering the essential guide that can put your business on the latest frontier of value creation.

In *Feverland*, Alex Lemon has created a fragmented exploration of what it means to be a man in the tumult of twenty-first-century America—and a harrowing, associative memoir about how we live with the beauties and horrors of our pasts. Along the way, Lemon navigates questions of recovery, redemption, and humanity in the face of suffering. How to move forward when trapped between the demons of one's history and the angels of one's better nature? How to live in kindness—to become a caring partner and parent—when one can muster very little such tenderness for oneself? How to be here, now? Lemon asks. How to be here, good? Immersed in darkness but shot through with light, *Feverland* is an intensely felt and thrillingly experimental memoir from one of our most heartfelt and inventive writers.

Poets Karla K. Morton and Alan Birkelbach began this journey to celebrate our national parks' one hundredth anniversary, but for these two poets the sojourns quickly became something greater than that. In their words, "As humans we have this tendency to look at a piece of land and see real estate. [But] when concrete covers all our natural spaces, not only do we lose earth's creatures, we also lose the great teacher of our souls. You cannot sit beneath trees taller than the Statue of Liberty, or gaze upon vistas untouched since their creation, without feeling the awe and wonder of what the natural world has to offer. You cannot experience such beauty without being wholly changed. Our great-great-grandchildren deserve these untouched gifts." This journey, illustrated with gorgeous color photos of all of America's grand national parks, is a feast for the eyes and heart. In the end, it is a plea for us to save these wonders for all future generations.
