This book analyses

Rabindranath Tagore ' s contribution to Bengali drama and theatre. Throughout this book, Abhijit Sen locates and studies Rabindranath ' s experiments with drama/theatre in the context of the theatre available in nineteenth-century Bengal, and explores the innovative

---

strategies he adopted to promote his 'brand' of theatre. This approach finds validation in the fact that Rabindranath combined in himself the roles of author-actor-producer, who always felt that, without performance, his dramatic compositions fell short of the desired completeness. Various facets of his plays as theatre and his own role as a theatre-practitioner are the prime focus of this book. This book will be of great interest to students and scholars in Theatre and Performance Studies and most notably, those focusing on Indian Theatre and Postcolonial Theatre.

In Eleanor Smith's Hull House Songs: The Music of Protest and Hope in Jane Addams's

Chicago, the authors republish Hull House Songs (1916), together with critical commentary. Hull-House Songs contains five politically engaged compositions written by the Hull-House music educator, Eleanor Smith. The commentary that accompanies the folio includes an examination of Smith's poetic sources and musical influences; a study of Jane Addams's aesthetic theories; and a complete history of the arts at Hull-House. Through this focus upon aesthetic and cultural programs at Hull-House, the authors identify the external, and internalized, forces of domination (class position, racial identity, patriarchal disenfranchisement) that limited the work of the Hull-House women, while also recovering the sometimes hidden emancipatory possibilities of their legacy. With an afterword by Jocelyn Zelasko.

### Marysville - Lake Eildon Map BRILL

Due to the ever increasing requirements to be met by gasoline and diesel engines in terms of CO2 reduction, emission behavior, weight, and service life, a comprehensive understanding of combustion engine components is essential today. It is no longer possible for a professional in automotive engineering to manage without the corresponding know-how, whether that is in the field of design, development, testing, or maintenance. This technical book provides in-depth answers to questions about design, production, and machining of cylinder components. Content ;

Piston rings ; Piston pins and piston pin circlips ; Bearings ; Connecting rods ; Crankcase and cylinder liners Target audience ; Engineers in engine development and maintenance ; Lecturers and students in the areas of mechanical engineering, engine technology, and vehicle construction ; Anyone interested in technology Publisher The MAHLE Group is one of the top 30 automotive suppliers and the globally leading manufacturer of components and systems for the internal combustion engine and its peripherals.

*Materials Science of Carbides, Nitrides and Borides* Springer Science & Business Media

This offers honest and largely unedited glimpses into the world of social work of 40 years or so ago. Illustrated by the professional practice of one Colin Millwood, an enthusiastic but otherwise green social worker, it coincides with the early beginnings of his arrival at his local Social Services Department.

The Humvee, the modern-day US military four-wheel-drive successor to the Willys Jeep, is used by numerous armed forces around the world and in some civilian adaptations. Over 10,000 Humvees were deployed in numerous roles by coalition forces during the Iraq

war. At least 25 variants of this highly versatile vehicle have been produced, from unarmoured light transport to surface-to-air missile platform, including ambulances, tracked versions, troop carriers and special ops variants. This manual provides a unique insight into the world of military Humvees, with an emphasis on military operation and equipment.

*Cylinder Components*

A survey of current research on a wide range of carbide, nitride and boride materials, covering the general issues relevant to the development and characterisation of a variety of advanced materials. Topics include structure and electronic properties, modeling, processing, high-temperature chemistry, oxidation and corrosion, mechanical behaviour, manufacturing and applications. The volume complements more specialised books on specific materials as well as more general texts on ceramics or hard materials,

presenting a survey of materials research as a key to technological development. After decades of research, the materials are being used in electronics, wear resistant, refractory and other applications, but numerous new applications are possible. Roughly equal numbers of papers cover theoretical and experimental research in the general field of materials science of refractory materials.

Audience: Researchers and graduate students in materials science and engineering.
