Joan Garry's Guide to Nonprofit Leadership Liturgical Press
The second edition of Social Work Policy Practice: Changing Our Community, Nation, and the World demystifies policymaking for social work students and demonstrates why policy practice is a critical dimension of social work. The text provides a comprehensive introduction to political advocacy, the political process, and how laws are enacted to inspire social work students to enter the field with a mind for political advocacy and social justice. The book is divided into three parts. In Part I, students learn a brief history of social welfare legislation in the United States and the role of social workers in policy development. Part II provides concrete information on how policies become law. It includes an overview of the levels and branches of government, in-depth descriptions of the policy change process, and various strategies advocates employ to enact change. Part III consists of real-world stories of advocates and advocacy organizations that have attempted to change policies on behalf of vulnerable populations. This edition includes up-to-date information regarding policy issues in child welfare, aging, healthcare, mental health, poverty and income equality, rights for racial minorities, and immigration. New material addresses policy issues pertaining to gender, sexual orientation, gender identity, and the #MeToo and #BlackLivesMatter social movements. Engaging and accessible, Social Work Policy Practice is an ideal resource for courses that introduce policymaking to students of social work.

Grammar Sense: 3: Student Book B with Online Practice Access Code Card Knopf Books for Young Readers
A powerful novel about ethnically fluid California, and the corrosive relationship between two Filipino brothers. Told with a hard-edged purity that brings to mind Cormac McCarthy and Denis Johnson, American Son is the story of two Filipino brothers adrift in contemporary California. The older brother, Tomas, fashions himself into a Mexican gangster and breeds pricey attack dogs, which he trains in German and sells to Hollywood celebrities. The narrator is younger brother Gabe, who tries to avoid the tar pit of Tomas's waywardness, yet moves ever closer to embracing it. Their mother, who moved to America to escape the caste system of Manila and is now divorced from their American father, struggles to keep her sons in line while working two dead-end jobs. When Gabe runs away, he brings shame and unforeseen consequences to the family. Full of the ache of being caught in a violent and alienating world, American Son is a debut novel that captures the underbelly of the modern immigrant experience. "According to Michele Borba, the woman Dr. Drew calls "the most trusted parenting expert in America," there's an empthy crisis among today's youth, who she dubs the "selfie generation." But the good news is that empathy is a skill that can -- and must -- be taught, and in UNSELFIE (her first book for a general trade audience) Borba offers a 9-step program to help parents cultivate empathy in children, from birth to young adulthood"--

You and Me Forever W. W. Norton & Company
With every passing year since her death in 1990, more people are recognizing Sister Thea Bowman as one of the most inspiring figures in American Catholic history. This granddaughter of slaves became Catholic on her own initiative at the age of nine. As a Franciscan sister, she lived a wide-ranging ministry of joy, music, and justice. Now Father Maurice Nutt offers a new biography of Sister Thea that introduces her and sheds new light on who she was. Drawing on careful research and the insights of people who were close to her, Nutt explores her personality, her passion, her mission, and her prayer. He captures Thea Bowman as she was: an unapologetically African American woman, a religious sister who deeply loved God and the people to whom she

ministered through teaching, preaching, and singing, and who embraced the blessing of her ancestry, the wisdom of the "old folks," and a passion for justice and equality for all God's children.

In a conservative educational climate that is dominated by policies like No Child Left Behind, one of the most serious effects has been for educators to worry about the politics of what they are teaching and how they are teaching it. As a result, many dedicated teachers choose to avoid controversial issues altogether in preference for "safe" knowledge and "safe" teaching practices. Diana Hess interrupts this dangerous trend by providing readers a spirited and detailed argument for why curricula and teaching based on controversial issues are truly crucial at this time. Through rich empirical research from real classrooms throughout the nation, she demonstrates why schools have the potential to be particularly powerful sites for democratic education and why this form of education must include sustained attention to authentic and controversial political issues that animate political communities. The purposeful inclusion of controversial issues in the school curriculum, when done wisely and well, can communicate by example the essence of what makes communities democratic while simultaneously building the skills and dispositions that young people will need to live in and improve such communities.

Education and Learning to Think Taylor & Francis
#1 New York Times bestseller with more than 11 million copies sold! When 4-year-old Colton Burpo emerges from life-saving surgery with remarkable stories of his visit to heaven, his family doesn't know what to believe. Heaven is For Real details what Colton saw and his family's journey towards accepting their young son had visited the afterlife. "Do you remember the hospital, Colton?" Sonja

said. "Yes, mommy, I remember," he said. "That's where the angels sang to me." Colton told his parents he left his body during an emergency surgery--and proved that claim by describing exactly what his parents were doing in another part of the hospital during his operation. He talked of visiting heaven and described events that happened before he was born and how he spoke with family members he'd never met. Colton also astonished his parents with descriptions and obscure details about heaven that matched the Bible exactly, even though he had not yet learned to read. With disarming innocence and the plainspoken boldness of a child, Colton recounts his visit to heaven, describing: Meeting long-departed family members Jesus, the angels, how "really, really big" God is, and how much God loves us How Jesus called Todd, Colton's father, to be a pastor The Battle of Armageddon Retold by his father, but using Colton's uniquely simple words, Heaven Is for Real offers a glimpse of the world that awaits us, where as Colton says, "Nobody is old and nobody wears glasses." Heaven Is for Real will forever change the way you think of eternity, offering the chance to see, and believe, like a child. Praise for Heaven is for Real: "A beautifully written glimpse into heaven that will encourage those who doubt and thrill those who believe." --Ron Hall, coauthor of Same Kind of Different as Me

The Reflective Educator's Guide to Professional Development MIT Press

The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

What If All the Kids Are White? Routledge

How can you be sure that you're teaching your children the lessons of virtue that were passed on to you? Today's parents often feel that they have too little time in their busy schedules to handle such an important task. They're not even sure where to begin. In 20 Teachable Virtues authors Barbara C. Unell and Jerry L. Wyckoff, Ph.D. demonstrate the simple ways that you can teach your children to care about others and about themselves. By using everyday time together, however brief, you can pass on the lessons of virtue that are most important to your family today and for generations to come. At a time when values seem to be on the decline and children are looking to their parents for guidance, this new book argues that the building of a more moral society begins in the home. Through numerous anecdotes and examples, Unell and Wyckoff show parents how a select group of 20 virtues can be instilled, and warn how easily kids can be sent the wrong message. "To learn to live in society," write the authors, "all children must learn to balance their personal wants against the needs of the social group (family, neighborhood, school, society). Today we see far too few examples of this kind of balance as people put their own wants and needs above all others all of the time." Through the use of numerous anecdotes which illustrate each virtue, 20 Teachable Virtues shows how common occurrences can become "teachable moments".

The Barefoot Book of Children Cognella Academic Publishing

The #1 New York Times bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. With bold ideas and rigorous evidence, Adam Grant investigates how we can embrace the joy of being wrong, harness the advantages of impostor syndrome, bring nuance into charged conversations, and build schools, workplaces, and communities of lifelong learners. Think Again reveals that we don't have to believe all our thoughts or internalize all our emotions. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility, humility, and curiosity over consistency.

A NEW YORK TIMES BESTSELLER! Jacqueline Woodson's first middle-grade novel since National Book Award winner Brown Girl Dreaming celebrates the healing that can occur when a group of

students share their stories. It all starts when six kids have to meet for a weekly chat--by themselves, with no adults to listen in. There, in the room they soon dub the ARTT Room (short for "A Room to Talk"), they discover it's safe to talk about what's bothering them--everything from Esteban's father's deportation and Haley's father's incarceration to Amari's fears of racial profiling and Ashton's adjustment to his changing family fortunes. When the six are together, they can express the feelings and fears they have to hide from the rest of the world. And together, they can grow braver and more ready for the rest of their lives.

Snappy the Alligator (Did Not Ask to Be in This Book) Viking Books for Young Readers

In this updated edition, two distinguished early childhood educators tackle the crucial topic of what White children need and gain from anti-bias and multicultural education. The authors propose seven learning themes to help young White children resist messages of racism and build identity and skills for thriving in a country and world filled with diverse ways of being. This compelling text includes teaching strategies for early childhood settings, activities for families and staff, reflection questions, a record of 20th- and 21st-century White anti-racism activists, and organizational and website resources. Bringing this bestselling guide completely up to date, the authors: Address the current state of racism and anti-racism in the United States, including the election of the first African American president and the rise of hate groups. Review child development research with a particular emphasis on recent observational studies that show how White children enact racial power codes. Discuss implementation of the core learning themes in racially diverse early childhood education settings, state standards for preschools and pre-K classrooms, and NCLB pressures on early childhood teaching. Update all resources and appendices, including reading lists and websites for finding resources and organizations engaged in anti-racism work. Louise Derman-Sparks is a past faculty member at Pacific Oaks College in Pasadena, California and the co-author of Teaching/Learning Anti-Racism. Louise presents conference keynotes, conducts workshops, and consults throughout the United States and internationally. Patricia G. Ramsey is Professor of Psychology and Education at Mount Holyoke College in South Hadley, Massachusetts and author of Teaching and Learning in a Diverse World. Praise for the First Edition- "Derman-Sparks and Ramsey offer an 'alternative vision' for white identity that breaks the mold...The current status of our anti-bias work demands we read [this book] and use it well" --From the Foreword by Carol Brunson Day "A dynamic blend of child development theory, social history, and the best pedagogical practice from two distinguished social justice educators--every teacher of young children should read it!" --Beverly Daniel Tatum, President, Spelman College "An accessible, practical, and essential tool for every teacher of young white children. I especially appreciated the concrete suggestions and abundance of resources from two of early childhood education's most experienced teachers." --Paul Kivel, educator and author of Uprooting Racism and I Can Make My World a Safer Place "By starting with a strong sense of identity that is not race-based, children can move forward to cultivate an anti-racist culture. This book offers caregivers excellent frameworks and tools to make this happen." --TC Record
