"Interactions is a guide for preprofessionals and professionals to help them understand and participate effectively in their interactions with other school professionals and parents, in an increasingly diverse world that is also now routinely electronically and globally connected. Interactions presents theory and conceptual principles heavily seasoned with examples, cases, and applied activities. Written specifically to enable readers to quickly use their skills in professional settings, the book will be a useful tool for pre-service educators and practitioners-whether they are engaged in formal instructional settings, a study group, or independent study. The book recognizes that knowledge about instructional practices that can improve student outcomes are more important than ever before, and educators are scrambling to respond to the federal legislative mandates that require increasingly high standards and a clear trajectory of improving academic performance for all students, including those with disabilities and other special needs."--Publisher.

If there's one thing teachers can agree on, it's that social and emotional learning is a hot topic in education. But beyond this, questions still remain. Many educators find themselves wondering, what exactly is SEL? How should it be taught? What does it look like in the classroom? And, is it our job as educators to teach students non-academic life skills? Based on author Dr. Amy Cranston's experiences with implementing SEL from a practical standpoint, this book defines SEL and digs into the real work of how to incorporate SEL in K-12 schools. It makes the connection between research and practical application and the real-life examples and testimonials of SEL in the classroom will help educators effectively implement SEL programming. Featured case studies demonstrate real-world applications of SEL in different types of K-12 learning environments. It addresses students' different interests and varied learning styles and features Mindful Moments that encourage understanding, learning, and reflection. By supporting the emotional needs of students, educators will not only address issues such as discipline problems and absenteeism, but will help their students to be more mindful and self-aware. By encouraging spaces where intrapersonal and interpersonal skills are celebrated and cultivated, educators will set the foundation for all students to succeed.
