In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many

assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas.

Becoming Naomi Leon John Wiley & Sons

The inspiring, true coming-of-age story of a ferociously determined young man who, armed only with his intellect and his willpower, fights his way out of despair. In 1993, Cedric Jennings was a bright and ferociously determined honor student at Ballou, a high school in one of Washington D.C.'s most dangerous neighborhoods, where the dropout rate was well into double digits and just 80 students out of more than 1,350 boasted an average of B or better. At Ballou, Cedric had almost no friends. He ate lunch in a classroom most days, plowing through the extra work he asked for, knowing that he was really competing with kids from other, harder schools. Cedric Jennings's driving ambition—which was fully supported by his forceful mother—was to attend a top college. In September 1995, after years of near superhuman dedication, he realized that ambition when he began as a freshman at Brown University. But he didn't leave his struggles behind. He found himself unprepared for college: he struggled to master classwork and fit in with the white upper-class students. Having traveled too far to turn back, Cedric was left to rely on his intelligence and his determination to maintain hope in the unseen—a future of acceptance and reward. In this updated edition, *A Hope in the Unseen* chronicles Cedric's odyssey during his last two years of high school, follows him through his difficult first year at Brown, and tells the story of his subsequent successes in college and the world of work. Eye-opening, sometimes humorous, and often deeply moving, *A Hope in the Unseen* weaves a crucial new thread into the rich and ongoing narrative of the American experience.

While it is true that children from military families live unique and interesting lives, it is also true that they face many challenges and special circumstances that civilian children and families don't

experience. These can include gaps in school attendance and learning due to frequent moves, being separated from a parent who has been deployed, and a sense of isolation in the midst of a civilian community. This comprehensive and evidence-informed guide introduces pre- and inservice teachers to this population and provides essential tools to help minimize the impact of military life on student learning. It addresses issues such as: Frequent transitions between schools, gaps in academic progress, social adjustment, parental deployments, and trauma or tragedy. And it shows how practices already being used in your school can be adapted to ease the transition for military students, and it also introduces original strategies, such as: A "Hero Wall" honoring members of the military, friendship or memory gardens, military Appreciation events, writing letters or making care packages for deployed service members.
