Why Do Kids These Days Expect Everything to be Given to Them? Today's kids don't know how to read a map. They can Google the answer to any question at lightning speed. If a teen forgets his homework, a quick call to mom or dad has it hand-delivered in minutes. Fueled by the rapid pace of technology, the Instant Gratification Generation not only expects immediate solutions to problems—they're more dependent than ever on adults. Today's kids are being denied opportunities to make mistakes, and more importantly, to learn from them. They are being taught not to think. In Teaching Kids to Think, Dr. Darlene Sweetland and Dr. Ron Stolberg offer insight into the social, emotional, and neurological challenges unique to this generation. They identify the five parent traps that cause adults to unknowingly increase their children's need for instant gratification, and offer practical tips and easy-to-implement solutions to address topics relevant to children of all ages. A must-read for parents and educators, Teaching Kids to Think will help you understand where this sense of entitlement comes from—and how to turn it around in order to raise children who are confident, independent, and thoughtful.

Reader and Student Solutions Manual, 24-month Access Sourcebooks, Inc. THE book for elementary education mathematics content courses! Designed to help prospective teachers of elementary school mathematics learn content beyond the rote level, this text stimulates readers to think beyond just getting the problem right and fosters their development into thoughtful, reflective, self-motivated, life-long learners. It stresses the what and why of elementary school mathematics content. Hints are provided about how to teach the content but this is mostly left to courses and texts that are dedicated to that purpose. The text is organized around the National Council for Teachers of Mathematics' Principles and Standards for School Mathematics. The Standards dictate the basic sections of the text. Within each section, appropriate specific topics are developed, intertwined with technology, problem solving, assessment, equity issues, planning, teaching skills, use of manipulatives, sequencing, and much more. In addition, major focal points of the Standards are emphasized throughout: effective teachers of mathematics should be able to motivate all students to learn, should understand the developmental levels of how children learn, should concentrate on what children need to become active participants in the learning environment, and should be engaged in ongoing investigations of new mathematical concepts and teaching strategies. Mathematics Content for Elementary Teachers is based on several fundamental premises: *The focus of mathematics education should be on the process, not the answer. *Elementary teachers should know the mathematics content they are teaching, know more than the content they are teaching, and teach from the overflow of knowledge. *It is important for teachers to be flexible in allowing students to use different procedures--teaching from the "overflow of knowledge" implies knowing how to do a given operation more than one way and being willing to examine many different ways. *Teachers need to learn to carefully cover the topics to be taught, to reflect upon them, and to be able to organize them. To help prospective elementary teachers concentrate on the mathematics content they will be expected to teach and begin to build the foundation for the methods they will use, this text includes only elementary mathematics content and does not address middle school concepts. Pedagogical features: *The text is organized according to NCTM Standards. *An informal writing style speaks directly to readers and is geared to pre-service teachers.

*Focus is given to multiple methods of problem solving at four developmental levels. *Questions, exercises, and activities are interspersed throughout each section rather than gathered at the end of each chapter. *Complete solutions for exercises are provided. This is a gift of tremendous import and magnitude, To humanity for eons to come. it is a vast treasure fashioned in the hermitage of inner silence and brought out into the open, brilliantly lighting the sight of the bewildered with its profound insights. Open the Mystery: The opening words "Open to Bliss" refers To The act of opening or unravelling. it is demystifying the complex, perplexing, and infinitely varied stream of data, which is presented to us as sexual attraction, To its simpler elements, To such a degree that it no longer holds any power. it is seen as child's play (blatantly simple), and as a pitiful attempt at manipulation. Bliss is what remains when one's consciousness has escaped this confounding maze designed For The mind, and learns to derive pleasure once again in experiencing the preciousness of his or her own true innocent childlike-self. A Teacher's Teacher: Sage Hope is A)self-taught and B)Guru-taught (Spiritual Teacher-taught,) & God-taught by: 1. Introspection, analysis, eternal questioning, investigation 2. The study of world's revealed religious literature. The Work: This is an unbiased research of the introspective Sage Hope. After in-depth study of various religions (equivalency of his study spans thrice his lifetime), after unravelling the mystery of love, and having experienced

emotional fulfillment, he turned his attention to this formidable, potent, and illusive mystery, namely sexual attraction. The work represents 4 1/2 years worth of exclusive study on the matter culminating in the Absolute Solution, which when understood dispels the illusions of sexual attraction to such a point that the mystery becomes as the sage says, "unimpressive." Essence of the Problem: Sexual attraction is presented in perplexing, multi-layered, multi-faceted, and ever-changing forms. The onlooker is thereby mesmerized. Baffled, he loses his perspective and sense of reality. His consciousness is swept away with the stream of peculiar variegated data that bombards him. The Solution: A born teacher, The author, Omid Mankoo, Is extremely detailed. With simplicity, he dissects and identifies each illusive element of the jumbled mass of sexual manipulation. He elucidates how each element functions to capture the mind. Furthermore, he demonstrates the reason for their potency when they combine to form, what many experience as, a mysterious unknown force, that many mistakenly attribute to their instinct or nature, and strongly
