A harmonious blend of the theoretical and practical aspects of educational psychology, this student-friendly text provides a base for the understanding of the subject. The book discusses the various aspects of growth and development, specifically during childhood and adolescence, and accords due importance to the cognitive aspect of human behaviour with elaborate text on

intelligence, creativity, thinking, reasoning and problem-solving. Besides maintaining a logical progression of topics, the author has interspersed the text with examples and illustrations to provide an in-depth analysis of the subject matter. The book is ideally suited for the B.Ed. and B.A. (Education) courses but can also be a valuable reference for teachers, teacher-trainees, and practising counsellors at various levels of school education. **KEY FEATURES** • Cogent and coherent style of writing • Assignment problems and sample tests at the end of various chapters • Wide range of examples and over 50 illustrations to support and explain the topics discussed

 How do you get a fourth-grader excited about history? How do you even begin to persuade high school students that mathematical functions are relevant to their everyday lives? In this volume, practical questions that confront every classroom teacher are addressed using the latest exciting research on cognition, teaching, and learning. How Students Learn: History, Mathematics, and Science in the Classroom builds on the discoveries detailed in the bestselling How People Learn. Now, these findings

are presented in a way that teachers can use immediately, to revitalize their work in the classroom for even greater effectiveness. Organized for utility, the book explores how the principles of learning can be applied in teaching history, science, and math topics at three levels: elementary, middle, and high school. Leading educators explain in detail how they developed successful curricula and teaching approaches, presenting strategies that serve as models for curriculum development and classroom instruction. Their recounting of personal teaching experiences lends strength and warmth to this volume. The book explores the importance of balancing students' knowledge of historical fact against their understanding of concepts, such as change and cause, and their skills in assessing historical accounts. It discusses how to build straightforward science experiments into true understanding of scientific principles. And it shows how to overcome the difficulties in teaching math to generate real insight and reasoning in math students. It also features illustrated suggestions for

classroom activities. How Students Learn offers a highly useful blend of principle and practice. It will be important not only to teachers, administrators, curriculum designers, and teacher educators, but also to parents and the larger community concerned about children's education.

The main objective is to assess the teaching and research capabilities of the candidates. Therefore, the test is aimed at assessing the teaching and general/research aptitude as well as their awareness. They are expected to possess and exhibit cognitive abilities. Cognitive abilities include comprehension, analysis,

evaluation, understanding the structure of arguments and deductive and inductive reasoning. The candidates are also expected to have a general awareness and knowledge of sources of information. They should be aware of interaction between people, environment and natural resources and their impact on quality of life.

 The National Eligibility Test (NET) is conducted on behalf of

the University Grants Commission (UGC) for determining the eligibility of Indian nationals for Assistant Professorship, Junior Research Fellowship, or both, for Indian Universities and Colleges. The National Testing Agency (NTA) is conducted UGC NET Examination for 'Junior Research Fellowship' and eligibility for 'Assistant Professor' in 83 subjects in Computer Based Test (CBT) mode. Awarding of Junior Research Fellowship (JRF) and/or Eligibility for Assistant Professorship depends on the aggregate performance of the candidate in Paper-I and Paper-II of UGC-NET. The candidates qualifying only for Assistant Professorship are not to be considered for the awarding of JRF. Candidates who qualify for the eligibility test for Assistant Professorship are governed by the rules and regulations for recruitment of Assistant Professor of the concerned universities/colleges/state governments. Oswaal UGC-NET Paper-1, 15 Mock Test Papers is designed to provide students with ample practice and a deep understanding of the UGC-NET Paper-1 so that students can clear UGC-NET Paper-1 with extraordinary results.
