In showcasing the extent of diversity and the distinctiveness of the numerous tribal cultures in Indonesia, the volume presents itself as an important academic reference in Indonesian anthropology and ethnography studies, now finally available to global readership. Sites, Bodies and Stories examines the intimate links between history and

heritage as they have developed in postcolonial Indonesia. Sites discussed in the book include Borobudur in Central Java, a village in Flores built around megalithic formations, and ancestral houses in Alor. Bodies refers to legacies of physical anthropology, exhibition practices and Hollywood movies. The Stories are accounts of the Mambesak movement in Papua, the inclusion of wayang puppetry in UNESCO's List of the Intangible Cultural Heritage of Humanity, and subaltern history as written by the people of Blambangan in their search for national heroes. Throughout the book, citizenship entitlement figures as a leitmotif in heritage initiatives. Contemporary heritage formation in Indonesia is intrinsically linked to a canon of Indonesian art and culture developed during Dutch colonial rule, institutionalized within Indonesia's heritage infrastructure and in the Netherlands, and echoed in museums and exhibitions throughout the world. The authors in this volume acknowledge colonial legacies but argue against a colonial determinism, considering instead how contemporary heritage initiatives can lead to new interpretations of the past.

Instead of shutting down any mention of taboo topics, Mary-Frances Winters shows how to structure intentional conversations about them, so people can safely confront biases and stereotypes and create stronger, more inclusive organizations. Politics, religion, race - we can't talk about topics like these at work, right? But in fact, these conversations are happening all the time, either in real life or virtually via social media. And if they aren't handled effectively, they can become more polarizing and divisive, impacting productivity, engagement, retention, teamwork, and even employees' sense of safety in the workplace. But you can turn that around and address difficult topics in a way that brings people together instead of driving them apart. As a thought leader in the field of diversity and inclusion, Mary-Frances Winters has been helping clients create inclusive environments for over three decades. In this concise and powerful book, she shows you how to lay the groundwork for having bold, inclusive conversations. Even with the best of intentions, you can't just start talking about taboo topics - that's wandering into a minefield. Winters offers exercises and tools to help you become aware of how your cultural background has shaped your perceptions and habits and to increase your understanding of how people from other cultures may

differ from you, particularly when it comes to communicating and handling conflict. Once you're ready (you can take the self-assessment included in the book to make sure), Winters gives detailed instructions on exactly how to structure these conversations. She emphasizes that this is a process, not a destination—you may not be able to resolve major issues nicely and neatly in just one conversation. And while the process is important, so is intent. She urges readers to "come from your heart, learn from your mistakes, and continue to contribute to making this a more inclusive world for all."

Thousands of measures are in use today to assess

health and health care in the United States.

Although many of these measures provide useful information, their usefulness in either gauging or guiding performance improvement in health and health care is seriously limited by their sheer number, as well as their lack of consistency, compatibility, reliability, focus, and organization. To achieve better health at lower cost, all stakeholders - including health professionals, payers, policy makers, and members of the public - must be alert to what matters most. What are the core measures that will yield the clearest understanding and focus on better health and well-being for Americans? Vital Signs explores the most important issues - healthier people, better quality care, affordable care, and engaged individuals and communities - and specifies a streamlined set of 15 core measures. These measures, if standardized and applied at national, state, local, and institutional levels across the country, will transform the effectiveness, efficiency, and burden of health measurement and help accelerate focus and progress on our highest health priorities. Vital Signs also describes the leadership and activities necessary to refine, apply, maintain, and revise the measures over time, as well as how they can improve the focus and utility of measures outside the core set. If health care is to become more effective and more efficient, sharper attention is required on the elements most important to health and health care. Vital Signs lays the groundwork for the adoption of core measures that, if systematically applied, will yield better health at a lower cost for all Americans.

What does research tell us about the effects of school leadership on student achievement? What specific leadership practices make a real difference in school effectiveness? How should school leaders use these practices in their day-to-day management of schools and during the stressful times that accompany major change initiatives? Robert J. Marzano, Timothy Waters, and Brian A. McNulty provide answers to these and other questions in *School Leadership That Works*. Based on their analysis of 69 studies conducted since 1970 that met their selection criteria and a recent survey of more than 650 building principals, the authors have developed a list of 21 leadership responsibilities that have a significant effect on student achievement. Readers will learn the specific behaviors associated with the 21 leadership responsibilities; the difference between first-order change and second-order change and the leadership responsibilities that are most important for each; how to work smart by choosing the right

work to focus on to improve student achievement; the advantages and disadvantages of comprehensive school reform models for improving student achievement; how to develop a site-specific approach to improving student achievement, using a framework of 11 factors and 39 action steps; and a five-step plan for effective school leadership. Combining rigorous research with practical advice, *School Leadership That Works* gives school administrators the guidance they need to provide strong leadership for better schools.
