Indonesia has an extreme diversity of linguistic wealth, with 707 languages by one count, or 731 languages and more than 1,100 dialects in another estimate, spoken by more than 600 ethnicities spread across 17,504 islands in the archipelago. Smaller, locally used indigenous languages jostle for survival alongside Indonesian, which is the national language, regional lingua francas, major indigenous languages, heritage languages, sign languages and world languages such as English, Arabic and Mandarin, not to mention emerging linguistic varieties and practices of language mixing. How does the government manage these languages in different domains such as education, the media, the workplace and the public while balancing concerns over language endangerment and the need for participation in the global community? Subhan Zein asserts that superdiversity is the key to understanding and assessing these intricate issues and their complicated, contested and innovative responses in the complex, dynamic and polycentric sociolinguistic situation in Indonesia that he conceptualises as superglossia. This offers an opportunity for us to delve more deeply into such a context through the language and superdiversity perspective that is in ascendancy. Zein examines emerging themes that have been dominating language policy discourse including status, prestige, corpus, acquisition, cultivation, language shift and endangerment, revitalisation, linguistic genocide and imperialism, multilingual education, personnel policy, translanguaging, family language policy and global English. These topical areas are critically discussed in an integrated manner against Indonesia's elaborate socio-cultural, political and religious backdrop as well as the implementation of regional autonomy. In doing so, Zein identifies strategies for language policy to help inform scholarship and policymaking while providing a frame of reference for the adoption of the superdiversity perspective on polity-specific language

policy in other parts of the world.

Bethan Marshall traces the competing traditions of English teaching and considers their relevance to the current debate through an analysis of English teachers' views about themselves and their subject. The findings are based on a highly original research method in which teachers were asked to respond to and comment upon five different descriptions of their approaches to English teaching. English Teachers - The Unofficial Guide:

*contextualises current debates about English teaching within the subject's contested history

*provides a vehicle for teachers to reflect on their own practice and locate themselves within the debate *opens up the debate on assessment practices within English teaching.

This encyclopedia provides a comprehensive overview of the traditions, cultures, kinship norms, and other significant cultural aspects of the tribes, or otherwise named ethnic groups, of Indonesia, by an Indonesian anthropologist. The entries are supported by illustrations drawn by the late author himself, and are also accompanied by maps indicating the geographic locations and distributions of each tribe throughout the vast archipelago. Originally written and published in Bahasa Indonesian, the text has been translated into English and revised to feature up-to-date information. In showcasing the extent of diversity and the distinctiveness of the numerous tribal cultures in Indonesia, the volume presents itself as an important academic reference in Indonesian anthropology and ethnography studies, now finally available to global readership. Intended as a short work of reference, it will be indispensable to students and scholars researching Indonesia from anthropological, sociocultural, and ethnographic perspectives.
