An ASCD Study Guide for Teaching with the Brain in Mind ...

Teaching with the Brain in Mind is a terrific resource for teachers who are trying to maximize the use of their time with students... to get the most "bang for the buck" so to speak. This book explores ideas about how the brain works; how movement, emotional states, physical environments, etc. can affect

student learning.

welltrain | Teaching with the Brain in Mind- Part 1

When the first edition of Teaching with the Brain in Mind was published in 1998, it quickly became an ASCD best-seller, and it has gone on to inspire thousands of educators to apply brain research in their classroom teaching. Now, author Eric Jensen

is back with a completely revised and updated edition of his classic work, featuring new research and practical strategies to enhance student comprehension and improve student achievement.

PPT – Teaching with the Brain in Mind PowerPoint

...

In accordance with connectionism, reading in the brain is a self-teaching system. Once the brain has learnt to read a word, it can use this knowledge to read

new words. The brain quickly learns which words look right and which words need to be checked in a dictionary. The self-teaching function of the brain means that once the correct circuits are in place, the brain continues to reinforce these circuits, making them stronger.
