In Citizenship and Advocacy in Technical Communication, teachers, researchers, and practitioners will find a variety of theoretical frameworks, empirical studies, and teaching approaches to advocacy and citizenship. Specifically, the collection is organized around three main themes or sections: considerations for understanding and defining advocacy and citizenship locally and globally, engaging with the local and global community, and introducing advocacy in a classroom. The collection covers an expansive breadth of issues and topics that speak to the complexities of undertaking advocacy work in TPC, including local grant writing activities, cosmopolitanism and global transnational rhetoric, digital citizenship and social media use, strategic and tactical communication, and diversity and social justice. The contributors themselves, representing fifteen academic institutions and occupying various academic ranks, offer nuanced definitions, frameworks, examples, and strategies for students, scholars, practitioners, and educators who want to or are already engaged in a variegated range of advocacy work. More so, they reinforce the inherent humanistic values of our field and discuss effective rhetorical and current technological tools at our disposal. Finally, they show us how, through pedagogical approaches and everyday mundane activities and practices, we (can) advocate either actively or passively. Practical Strategies for Technical Communication SAGE Publications

The technological revolution of the last ten years has radically changed document designers' materials, processes, and tools of the trade. In short, choices about everything from typography and color to planning and production have changed -- even multiplied. The first new text for the college market in ten years, Kimball and Hawkins' Document Design assumes from the start that students are working online to produce a fuller range of print and online documents, designed and delivered differently in a digital world. Through practical, accessible advice and examples, Kimball and Hawkins lay out the array of elements and choices that

document designers need to consider, all in the context of a rhetorical framework that allows students to see the effects of those choices. The only text to integrate a range of theoretical perspectives, visual perception, visual culture, and visual rhetoric, Document Design teaches students to think more critically about their own design decisions and to keep usability in mind every step of the way. True to its message, this artfully designed text practices the principles it teaches and is sure to become a reference that students will keep.

Students need to learn to write successfully for their college and university courses, but they also want to learn how to transfer their writing skills into their careers. By teaching genres of writing (analyses, reports, proposals, etc.), strategies for writing (narration, comparison, argumentation, etc.), and processes for writing (planning, drafting, revising, etc.), *Writing Today* provides students with tools they can mix and match as needed to respond effectively to many writing situations both in school and beyond. *Writing Today* offers students the comprehensive and detailed instruction they need using a highly-praised, interactive writing style that reflects the way they read and learn: instruction is succinct; key concepts are immediately defined and reinforced; paragraphs are short and supported by instructional visuals. This interactive presentation helps students ask questions of the text, raid it for answers, and access knowledge when they are ready for it, putting students in control of their learning. With the clear and easy-to-read presentation students want, visual instruction students prefer, and pedagogical support students need, *Writing Today* is a practical and useful guide to writing for university and beyond. **Technical Writing for Success** ATTW Series in Technical and Professional Communication For introductory courses in Technical Communication. *Technical Communication Strategies for Today* offers both and speaks to today's students.
