communication in today's scientific and technical workplace. Firmly rooted in core rhetorical principles, Revel(TM) Technical Communication Today presents computers as thinking tools that powerfully influence how we develop, produce, design, and deliver technical documents and presentations. This popular learning resource helps communicators draft and design documents, prepare material for print and web publication, and make oral presentations. Speaking to today's readers, the narrative is "chunked," so that

**Handbook of Technical Writing**

Pearson Higher Ed  
This book provides an in-depth study of controlled languages used in technical documents from both a theoretical and practical perspective. It first explores the history of controlled languages employed by the manufacturing industry to shape and constrain the

---

information in technical documents. The author then offers a comparative analysis of existing controlled languages and distills the best-practice features of those language systems. He concludes by offering innovative models that can be used to develop and trial a new controlled language. This book will be of interest to linguists working in technical and professional communication, as well as writers and practitioners involved in the production of technical documents for companies in multiple industries and geographical locations.

*Communication*  
Technical Communication Today  
Speech-language pathologists and audiologists receive little formal training in dealing with the emotional issues that will confront clients who have communication disorders. The families of those clients also need support in addressing emotions concomitant with communication disorders. Often, the humanistic elements of treatment are superficially

addressed, if at all. How therapists deal with these issues, however, has an enormous impact on the effectiveness of their clinical efforts. Luterman addresses this lack of attention to emotions. In addition to the expertise of trained, experienced counselors, the new edition of this popular book also discusses some of today's hot topics. These topics include how to work with the chronically ill and their families and the

---

consequences of the advent of universal screening of newborns. Both issues are having an increasing impact on the dynamics of the therapist-client relationship and require greater sensitivity to the particular needs of the clients and their families.
