Across the globe, states have long aimed to control the movement of people, identify their citizens, and restrict noncitizens' rights through official identification documents. Although states are now less likely to grant permanent legal status, they are increasingly issuing new temporary and provisional legal statuses to migrants. Meanwhile, the need for migrants to apply for frequent renewals subjects them to more intensive state surveillance. The contributors to Paper Trails examine how these new developments change migrants' relationship to state, local, and foreign bureaucracies. The contributors analyze, among other toics, immigration policies in the United Kingdom, the issuing of driver's licenses in Arizona and New Mexico, the Deferred Action for Childhood Arrivals program, and community know-your-rights campaigns. By demonstrating how migrants are inscribed into official bureaucratic systems through the issuance of identification documents, the contributors open up new ways to understand how states exert their power and how migrants must navigate new systems of governance. Contributors. Bridget Anderson, Deborah A. Boehm, Susan Bibler Coutin, Ruth Gomberg-Muñoz, Sarah B. Horton, Josiah Heyman, Cecilia Menjívar, Juan Thomas Ordóñez, Doris Marie Provine, Nandita Sharma, Monica Varsanyi

This book provides relevant theoretical frameworks and the latest empirical research findings of Operations Research/Management Science applied to Internet of Things. This book identifies and describes ways in which OR and MS have been applied and influenced the development of IoT. Examples are from smart industry; city; transportation; home and smart devices. It discusses future applications, trends, and potential benefits of this new discipline. It is written for professionals who want to improve their understanding of the strategic role of IoT at various levels of the organization, that is, IoT at the global economy level, at networks and organizations level, at teams and work groups, at information systems and, finally, IoT at the level of individuals, as players in the networked environments.  
Documents of the Assembly of the State of New York John Wiley & Sons  
For travelers passing through northern Navajo country, the desert landscape appears desolate. The few remaining Navajo trading posts, once famous for their bustling commerce, seem unimpressive. Yet a closer look at the economic and creative activity in this region, which straddles northeastern Arizona, northwestern New Mexico, and southeastern Utah, belies a far more interesting picture. In Traders, Agents, and Weavers, Robert S. McPherson unveils the fascinating—and at times surprising—history of the merging of cultures and artistic innovation across this land. McPherson, the author of numerous books on Navajo and southwestern history, narrates here the story of Navajo economic and cultural development through the testimonies of traders, government agents, tribal leaders, and accomplished weavers. For the first half of the twentieth century, trading posts dominated the Navajo economy in northwestern New Mexico. McPherson highlights the Two Grey Hills post and its sister posts Toadlena and Newcomb, which encouraged excellence among weavers and sold high-quality rugs and blankets. Parallel to the success of the trading industry was the establishment of the Northern Navajo or Shiprock Agency and Boarding School. The author explains the pivotal influence on the area of the agency ’ s stern and controversial founder, William T. Shelton, known by Navajos as Tall Leader. Through cooperation with government agents, American settlers, and traders, Navajo weavers not only succeeded financially but also developed their own artistic crafts. Shunning the use of brightly dyed yarn and opting for the natural colors of sheep ’ s wool, these weavers, primarily women, developed an intricate style that has few rivals. Eventually, economic shifts, including oil drilling and livestock reduction, eroded the

traditional Navajo way of life and led to the collapse of the trading post system. Nonetheless, as McPherson emphasizes, Navajo weavers have maintained their distinctive style and method of production to this day.  
Archaeologies of Text CRC Press  
FULLY ILLUSTRATED, UPDATED GUIDE TO THE STRATEGIC DESIGN OF GREEN BUILDINGS In the tradition of Building Construction Illustrated, Francis D.K. Ching and Ian M. Shapiro offer a fully illustrated guide to the theory and practice of sustainable design. This guide provides architects, designers, and builders in the green design professional community a framework and detailed strategies for designing substantively green buildings. With a focus on sustainable sites, approaching and reaching net-zero energy, low and zero-water usage, minimum-impact materials and superior indoor environmental quality, this guide explains why we need to build green, as well as green building theory and advancements in the industry. This Second Edition includes: All-new case studies featuring geographically diverse buildings with proven zero energy performance Expanded coverage of zero energy building design, as well as zero water and zero waste buildings Practical guidance for the schematic design of high-performance buildings, heating and hot water system selection, building envelope details, and integrating renewable energy Advanced strategies, such as the concept of shape efficiency, and the optimal location for stairwells in buildings Additional strategies for affordability in green design and construction Updated references to the latest codes and standards This Second Edition of Green Building Illustrated is an excellent resource for professionals, students and those interested in the design and construction of sustainable buildings.  
**Simulation and Modeling Methodologies, Technologies and Applications** Rowman & Littlefield  
The Belen Cutoff gave the AT&SF Railway a legitimate transcontinental freight line by eliminating the steep grades of Raton Pass. The Cutoff also transformed the eastern plains of New Mexico in the first half of the twentieth century, leading to New Mexico's most significant population increase as many homesteaders came to the region. This book tells that story by providing the perspectives of the AT&SF balanced by the experiences and narratives of railroad workers, homesteaders, and others. New research includes detailed consideration of internal railroad documents, local newspapers, and extensive oral-history interviews. As a result, this is the definitive account of the Belen Cutoff and provides a more complete and nuanced history of the region and the AT&SF Railway in New Mexico.  
**Mining Scientific Papers: NLP-enhanced Bibliometrics** Lulu.com  
Over the past decades, fault diagnosis (FDI) and fault tolerant control strategies (FTC) have been proposed based on different techniques for linear and nonlinear systems. Indeed a considerable attention is deployed in order to cope with diverse damages resulting in faults occurrence.  
**A Vision of Voices** Springer  
This revised and expanded edition of Japanese Americans: From Relocation to Redress presents the most complete and current published account of the Japanese American experience from the evacuation order of World War II to the public policy debate over redress and reparations. A chronology and comprehensive overview of the Japanese American experience by Roger Daniels are underscored by first person accounts of relocations by Bill Hosokawa, Toyo Suyemoto Kawakami, Barry Saiki, Take Uchida, and others, and previously undescribed events of the interment camps for “ enemy aliens ” by John Culley and Tetsuden Kashima. The essays bring us up to the U.S. government ’ s first redress payments, made forty eight years after the incarceration of Japanese Americans began. The combined vision of editors Roger Daniels, Sandra C. Taylor, and Harry H. L. Kitano in pulling together disparate aspects of the Japanese American experience results in a landmark volume in the wrenching experiment of American democracy.  
**Services Marketing: People, Technology, Strategy (Eighth Edition)** Springer  
Original and thought-provoking, this book investigates how creative experiences, interactions, and place-specific dynamics and contexts combine to give shape to the expanding field of creative tourism across the globe. Exploring the evolution of research in this field, the authors investigate pathways for future research that advance conceptual questions and pragmatic issues.  
Legislative Documents Submitted to the ... General Assembly of the State of Iowa Univ of California Press  
A destination for thousands of opera lovers every year and the anchor of Santa Fe ’ s thriving arts scene, the Santa Fe Opera owes its existence to the vision and hard work of one man: John O ’ Hea Crosby

(1926 – 2002), who created the company when he was only thirty years old and guided its fortunes for the next forty-five years. This book, the first in-depth exploration of Crosby ’ s career, shows how the Opera reflected his passions for music and the arts. A Vision of Voices depicts the many sides of Crosby—a dreamer and tough-minded businessman, an artistic explorer and conservative programmer, and a competent conductor and sharp critic. His devotion to quality and his obsessive oversight bore an enduring harvest that forever changed Santa Fe, the state of New Mexico, and the operatic world.  
A Research Agenda for Creative Tourism McGraw-Hill Education (UK)  
"Corporate reform" is not reform at all. Instead, it is the systematic destruction of the foundational American institution of public education. The primary motivation behind this destruction is greed. Public education in America is worth almost a trillion dollars a year. Whereas American public education is a democratic institution, its destruction is being choreographed by a few wealthy, well-positioned individuals and organizations. This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school.  
AETA 2013: Recent Advances in Electrical Engineering and Related Sciences Food & Agriculture Org.  
During the last decades, soil organic carbon (SOC) attracted the attention of a much wider array of specialists beyond agriculture and soil science, as it was proven to be one of the most crucial components of the earth ’ s climate system, which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals, in particular Goal 15, “ Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss ” with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather, in a standardized format, the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments, including the advantages, drawbacks and constraints. This manual presents different sustainable soil management (SSM) practices at different scales and in different contexts, supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications. Volume 4 includes 51 case studies dealing with cropland, grassland, integrated systems and farming approaches.  
**Doing Your Research Project: A Guide For First-Time Researchers** Springer Science & Business Media  
Superconducting Radiofrequency Technology for Accelerators Single source reference enabling readers to understand and master state-of-the-art accelerator technology Superconducting Radiofrequency Technology for Accelerators provides a quick yet thorough overview of the key technologies for current and future accelerators, including those projected to enable breakthrough developments in materials science, nuclear and astrophysics, high energy physics, neutrino research and quantum computing. The work is divided into three sections. The first part provides a review of RF superconductivity basics, the second covers new techniques such as nitrogen doping, nitrogen infusion, oxide-free niobium, new surface treatments, and magnetic flux expulsion, high field Q slope, complemented by discussions of the physics of the improvements stemming from diagnostic techniques and surface analysis as well as from theory. The third part reviews the on-going applications of RF superconductivity in already operational facilities and those under construction such as light sources, proton accelerators, neutron and neutrino sources, ion accelerators, and crab cavity facilities. The third part discusses planned accelerator projects such as the International Linear Collider, the Future Circular Collider, the Chinese Electron Positron Collider, and the Proton Improvement Plan-III facility at Fermilab as well as exciting new developments in quantum computing using superconducting niobium cavities. Written by the leading expert in the field of radiofrequency superconductivity, Superconducting Radiofrequency Technology for Accelerators covers other sample topics such as: Fabrication and processing on Nb-based SRF structures, covering cavity fabrication, preparation, and a decade of progress in the field SRF physics, covering zero DC resistance, the Meissner effect, surface resistance and surface impedance in RF fields, and non-local response of supercurrent N-doping and residual resistance, covering trapped DC flux losses, hydride losses, and tunneling measurements Theories for anti-Q-slope, covering the Xiao theory, the Gurevich theory, non-equilibrium superconductivity, and two fluid model based on weak defects Superconducting Radiofrequency Technology for Accelerators is an essential reference for high energy physicists, power engineers, and electrical engineers who want to understand the latest developments of accelerator technology and be able to harness it to further research interest and practical applications.  
Report of the Secretary of the Senate from ... John Wiley & Sons  
The present book includes a set of selected extended papers from the 5th International Conference on Simulation and Modeling Methodologies, Technologies and Applications (SIMULTECH 2015), held in Colmar, France, from 21 to 23 July 2015. The conference brought together researchers, engineers and practitioners interested in methodologies and applications of modeling and simulation. New and innovative solutions are reported in this book. SIMULTECH 2015 received 102 submissions, from 36 countries, in all continents. After a double blind paper review performed by the Program Committee, 19% were accepted as full papers and thus selected for oral presentation. Additional papers were accepted as short papers and posters. A further selection was made after the

Conference, based also on the assessment of presentation quality and audience interest, so that this book includes the extended and revised versions of the very best papers of SIMULTECH 2015. Commitment to high quality standards is a major concern of SIMULTECH that will be maintained in the next editions, considering not only the stringent paper acceptance ratios but also the quality of the program committee, keynote lectures, participation level and logistics.

Spanish Colonial Women and the Law: Complaints, Lawsuits, and Criminal Behavior Oxford University Press

Scholars working in a number of disciplines \_ archaeologists, classicists, epigraphers, papyrologists, Assyriologists, Egyptologists, Mayanists, philologists, and ancient historians of all stripes \_ routinely engage with ancient textual sources that are either material remains from the archaeological record or historical products of other connections between the ancient world and our own. Examining the archaeology-text nexus from multiple perspectives, contributors to this volume discuss current theoretical and practical problems that have grown out of their work at the boundary of the division between archaeology and the study of early inscriptions. In 12 representative case-studies drawn from research in Asia, Africa, the Mediterranean, and Mesoamerica, scholars use various lenses to critically examine the interface between archaeology and the study of ancient texts, rethink the fragmentation of their various specialized disciplines, and illustrate the best in current approaches to contextual analysis. The collection of essays also highlights recent trends in the development of documentation and dissemination technologies, engages with the ethical and intellectual quandaries presented by ancient inscriptions that lack archaeological context, and sets out to find profitable future directions for interdisciplinary research.

Cascade Use in Technologies 2018 Oxbow Books

Document Processing Using Machine Learning aims at presenting a handful of resources for students and researchers working in the document image analysis (DIA) domain using machine learning since it covers multiple document processing problems. Starting with an explanation of how Artificial Intelligence (AI) plays an important role in this domain, the book further discusses how different machine learning algorithms can be applied for classification/recognition and clustering problems regardless the type of input data: images or text. In brief, the book offers comprehensive coverage of the most essential topics, including:

- The role of AI for document image analysis
- Optical character recognition
- Machine learning algorithms for document analysis
- Extreme learning machines and their applications
- Mathematical foundation for Web text document analysis
- Social media data analysis
- Modalities for document dataset generation

This book serves both undergraduate and graduate scholars in Computer Science/Information Technology/Electrical and Computer Engineering. Further, it is a great fit for early career research scientists and industrialists in the domain.

Senate Election Law Guidebook 2010, Senate Document 111-18, December 18, 2010, Revised January 1, 2010, \* Sunstone Press

Advances in the Astronautical Sciences Series Volume 152 is a collection of scientific papers that were presented at the American Astronautical Society/American Institute of Aeronautics and Astronautics Spaceflight Mechanics Meeting held January 26-30, 2014, in Santa Fe, New Mexico.

Japanese Americans University of New Mexico Press

Words are everywhere in the museum. Amidst all the visual exhibits, and in many non-exhibition areas, swarm a host of words, talking to a vast swath of people in ways that visuals cannot. Signage at the information desk, brochures, exhibition videos, guided tours, membership materials, apps, and store labels: in a multi-screen world, where information explodes in every corner of the field of vision, clarity comes from the presence of words among the feast of visuals, helping contemporary audiences feel at home. Research bears out the need for a range of learning tools and it ’ s not just visitors who benefit from verbal cues; donors, educators, community partners, and volunteers will all engage more effectively with the museum that explains its brand mission with good writing. Whether written by administrators, staffers, freelancers, or interns, words are delivered by people in your museums with the knowledge that they will be interpreted by strangers. Your story is told everywhere, and with each narration it reinforces your brand; hopefully every single word reflects your brand. Each chapter tells how to put into words the stories you need to tell including: Blogs Brochures Exhibition videos Guided tour scripts Collateral programming talks Marketing plans Proposals to community partners Public Relations releases Social Media Solicitation letters Surveys Volunteer communications Website If you ever wished for a good writer, right on staff, ready to take on project, major or routine, here ’ s the help you ’ re looking for.

Writing for Museums ANU Press

An examination of how changing public information infrastructures shaped people's experience of earthquakes in Northern California in 1868, 1906, and 1989. When an earthquake happens in California today, residents may look to the United States Geological Survey for online maps that show the quake's epicenter, turn to Twitter for government bulletins and the latest news, check Facebook for updates from friends and family, and count on help from the Federal Emergency Management Agency (FEMA). One hundred and fifty years ago, however, FEMA and other government agencies did not exist, and information came by telegraph and newspaper. In Documenting Aftermath, Megan Finn explores changing public information infrastructures and how they shaped people's experience of disaster, examining postearthquake information and communication practices in three Northern California earthquakes: the 1868 Hayward Fault earthquake, the 1906 San Francisco earthquake and fire, and the 1989 Loma Prieta earthquake. She then analyzes the institutions, policies, and technologies that shape today's postdisaster information landscape. Finn argues that information orders—complex constellations of institutions, technologies,

and practices—influence how we act in, experience, and document events. What Finn terms event epistemologies, constituted both by historical documents and by researchers who study them, explain how information orders facilitate particular possibilities for knowledge. After the 1868 earthquake, the Chamber of Commerce telegraphed reassurances to out-of-state investors while local newspapers ran sensational earthquake narratives; in 1906, families and institutions used innovative techniques for locating people; and in 1989, government institutions and the media developed a symbiotic relationship in information dissemination. Today, government disaster response plans and new media platforms imagine different sources of informational authority yet work together shaping disaster narratives.

A Chronicle of Echoes Duke University Press

Terrorism: Commentary on Security Documents is a series that provides primary source documents and expert commentary on various topics relating to the worldwide effort to combat terrorism, as well as efforts by the United States and other nations to protect their national security interests. Volume 144, Autonomous and Semiautonomous Weapons Systems, examines the impact of robots and autonomous and semiautonomous weapons systems on the waging of modern warfare. It considers the likely effects of emerging technological innovations in this area from both a political and strategic standpoint, in addition to considering the implications of such technologies within the context of the law of armed conflict and international humanitarian law. This volume is divided into three sections: (1) U.S. policy and approaches to the use of autonomous and semiautonomous weapons systems; (2) U.S. armed forces use of such weapons systems; and (3) potential terrorist use of such weapons systems. Official policy documents from the DoD and the U.S. Army and Air Force are complemented by reports from the Strategic Studies Institute/Army War College Press and other U.S. military sources.

TERRORISM: COMMENTARY ON SECURITY DOCUMENTS VOLUME 144 IAP

Services Marketing: People, Technology, Strategy is the eighth edition of the globally leading textbook for Services Marketing by Jochen Wirtz and Christopher Lovelock, extensively updated to feature the latest academic research, industry trends, and technology, social media and case examples. This textbook takes on a strong managerial approach presented through a coherent and progressive pedagogical framework rooted in solid academic research. Featuring cases and examples from all over the world, Services Marketing: People, Technology, Strategy is suitable for students who want to gain a wider managerial view of Services Marketing.
