MUTINY For Lt. Commander

Colin MacIntyre, it began as a routine training flight over the Moon. For Dahak, a self-aware Imperial battleship, it began millennia ago when that powerful artificial intelligence underwent a mutiny in the face of the enemy. The mutiny was never resolved- Dahak was forced to maroon not just the mutineers but the entire crew on prehistoric Earth. Dahak has been helplessly waiting as the descendants of the loyal crew regressed while the mutineers maintained control of technology that kept them alive as the millennia passed. But now Dahak's sensors indicate that the

enemy that devastated the Imperium so long ago has returned-and Earth is in their path. For the sake of the planet, Dahak must mobilize its defenses. And that it cannot do until the mutineers are put down. So Dahak has picked Colin MacIntyre to be its new captain. Now MacIntyre must mobilize humanity to destroy the mutineers once and for all-or Earth will become a cinder in the path of galactic conquest. At the publisher's request, this title is sold without DRM (Digital Rights Management).

1 Princeton University Press

'Technical English' provides English language instruction for students who are involved in vocational and technical education. The course contains the core language and skills which are common to a range of industrial specialisations. It presents key technical

concepts concisely with labelled illustrations.

Workbook. 2, Workbook Take-Office!

Take-Off: Technical English for Engineering Teacher's Book Take-Off has been designed for non-native speakers of English who are studying Engineering (NVQ Level 2 and above). The aeronautical context is particularly aimed at technicians and engineers who are going on to work in the aeronautics industry. Take-Off is an ESP course for intermediate-level students. Unlike many ESP courses, it teaches genuine transferable skills and is ideal for students who need to further their technical training in English. The focus is on skills development, using relevant contexts, with grammar taking a strong supporting role. Reading and listening

development is dealt with in the context of understanding instructions and information in technical manuals. Students develop the speaking skills of asking for and giving factual information, and the writing skills necessary to complete workplace documentation, such as accident reports and safety assessments. Take-Off uses a communicative methodology, with graded tasks that are careful scaffolded to involve and motivate the students, providing them with a clear sense of achievement. The wide variety of texts and task types will appeal to a broad range of ages and nationalities. There are also comprehensive word lists and a glossary of terms for student reference. A bank of tests are provided online. Please contact us if you have purchased the book and would like access to these tests. Key Features Practical skills developed for dealing with oral and written instructions and documentation Task-based approach ensures achievable lesson outcomes Variety of texts and tasks on a wide range of aeronautical topics Two review sections to consolidate skills and vocabulary knowledge Glossary and electrical appendix Audio CDs for further self-study and

homework Accompanying Course Book, Workbook and Interactive Media Book also available. Technical English 4 CreateSpace Technology has invaded our working and recreational lives to an extent that few envisaged 20 or 30 years ago. We'd be fools to avoid the developments in personal, mobile, and wearable technology. Even if we tried we'd still have to deal with other developments and distractions in classroom and learning technology like smart boards, blogs, video, games, students-led learning, virtual learning environments, social media, etc. More than this, however, is how the advances in technology, the economic and physical miniaturisation of computing devices, have impacted education: the students, the teachers, the classrooms, the spaces, the connections, the aspirations, etc. 'The Really Useful #EdTechBook' is about experiences, reflections, hopes, passions, expectations, and professionalism of those working with, in, and for the use of technology in education. Not only is it an insight into how, or why, we work with these technologies, it's about how we as learning professionals got to where we

are and how we go forward with our own development. In this book respected individuals from different education sectors write about many aspects of learning technology; from Higher Education (Sue Beckingham, Peter Reed, Dr David Walker, Sheila MacNeil, Terese Bird, Wayne Barry, Inge de Waard, and Sharon Flynn), Further Education (Rachel Challen), to Museums (Zak Mensah), workplace learning (Julian Stodd, Julie Wedgwood, and Lesley Price) and primary schools / early years education (Mike McSharry). With a foreword written by Catherine Cronin, from the National University Ireland, Galway, the breadth and depth of the experiences here are second to none. The knowledge these leading learning practitioners, researchers, and professionals, share, under the same cover, is a unique opportunity for you to read about the variety of approaches to learning technology, the different perspectives on the same technology, and how technology is impacting our culture and learning infrastructure, from early-age classrooms to leading research Universities and from museums and workplace learning providers. It is about our passion for our work and

our desire to make our work better through our own learning and development.

Lost Lessons 2 Vintage

A public square bombing in Yemen and shipment of rockets from North America only randomly connect university researcher Arthur Crawford and Washington anti-terrorism expert Myron Klass. But coincidence is quickly overshadowed by reality when a Spaniard known as the most thoughtful of arms dealers has ambitions to devastate the US. Strap yourself in as former Canadian Member of Parliament Dr. David C. Walker boldly weaves together their lives and stories in Wild World, the first in a series of political mysteries novels that is sure to make you question what you've been told and what you need to know.

Longman Publishing Group

The #1 New York Times bestseller from the author of Killers of the Flower Moon In 1925, the legendary British explorer Percy Fawcett ventured into the Amazon jungle, in search of a fabled civilization. He never returned. Over the years countless

perished trying to find evidence of his party and the place he called “ The Lost City of Z. ” In this masterpiece of narrative nonfiction, journalist David Grann interweaves the spellbinding stories of Fawcett ’ s quest for “ Z ” and his own journey into the deadly jungle, as he unravels the greatest exploration mystery of the twentieth century.

Take-off Technical

English 1 Course Book
The book Lifehack calls "The Bible of business and personal productivity." "A completely revised and updated edition of the blockbuster bestseller from 'the personal productivity guru'"—Fast Company Since it was first published almost fifteen years ago, David Allen's *Getting Things Done* has become one of the most influential business books of its era, and the ultimate book on personal organization. "GTD" is now shorthand for an entire way of approaching professional and personal tasks, and has spawned an entire culture of websites, organizational tools, seminars, and offshoots. Allen has rewritten the book from start to finish, tweaking his classic text with important perspectives on the new workplace, and adding material that will make the book fresh and relevant for years to come. This new edition of *Getting Things Done* will be welcomed not only by

its hundreds of thousands of existing fans but also by a whole new generation eager to adopt its proven principles.

On Bullshit Currency
Technical English Level 1 covers the core language and skills that students need to communicate successfully in all technical and industrial specifications.

Centerline CreateSpace
Euclid was a mathematician from the Greek city of Alexandria who lived during the 4th and 3rd century B.C. and is often referred to as the "father of geometry." Within his foundational treatise "Elements," Euclid presents the results of earlier mathematicians and includes many of his own theories in a systematic, concise book that utilized a brief set of axioms and meticulous proofs to solidify his deductions. In addition to its easily referenced geometry, "Elements" also includes number theory and other mathematical considerations. For centuries, this work was a primary textbook of mathematics, containing the only framework for geometry known by mathematicians until the development of "non-Euclidian" geometry in the

late 19th century. The extent to which Euclid's "Elements" is of his own original authorship or borrowed from previous scholars is unknown, however despite this fact it was his collation of these basic mathematical principles for which most of the world would come to the study of geometry. Today, Euclid's "Elements" is acknowledged as one of the most influential mathematical texts in history. This volume includes all thirteen books of Euclid's "Elements," is printed on premium acid-free paper, and follows the translation of Thomas Heath.

This is -- First Novel -- 2013 Next care in-flight to drive the one of the most entertaining and addictive novels I've ever read." —Jacob Kier, Generation Indie Book Awards "Centerline is a rollercoaster ride of emotions as thirty-one Publisher, Permuted Press STOP. You should not have thrilling, high-action page- turner that captures a story "souls on board" travel touched this flyer with your bare hands. NO, don't put it down. It's too late. They're watching you. My name is David. My best friend is John. Those names are fake. You might want to change yours. You may not want to know about the things you'll read on these pages, about the sauce, about Korrok, about the invasion, and the future. But it's too late. You touched the book. You're in the game. You're under the eye. The only defense is knowledge. You need to read this book, to the end. Even the part with the bratwurst. Why? You just have to trust me. The important thing is this: The sauce is a drug, and it gives many Americans fail to appreciate-the sacrifices of our armed forces, their families, and the medical teams who support them. The tactical flight operations, ground combat scenes, and medical emergencies are real-not Hollywood-and the stories of wounded warriors and those waiting at home are unforgettable." - General Bill Begert, USAF (Ret), Former Commander, Pacific Air Forces Centerline tells the arresting story of the last leg of an emotional journey through the eyes of wounded warriors, crew, and medical caregivers making the trip home from military hospitals just before Christmas at the height of the surge in Iraq. Air Evac 1492 is the collective Air Force call sign for the flight. But each person on board has an individual story of hopes, dreams, fears, and regrets as the aircraft wings its human cargo through bad weather, flashbacks, and in flight emergencies. "Everybody who goes to war gets shot," one soldier says. "Some in the body. Some in the head. Some in the heart." This inspiring debut novel by Dave McIntyre (Ret COL USA) combines compelling technical descriptions of flying, combat, and medical care in-flight to drive the story through a rollercoaster ride of emotions as thirty-one "souls on board" travel through pain, loss, a killer storm, and the demons of the past to make it home for Christmas. Some travelers will fall short of the runway. And some will find the beacon that leads them home-back to the centerline. Getting Things Done Gardners Books A gargantuan, mind-altering comedy about the Pursuit of Happiness in America Set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, Infinite Jest explores essential questions about what

entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, *Infinite Jest* bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of the passions that make us human - and one of those rare books that renew the idea of what a novel can do. "The next step in fiction...Edgy, accurate, and darkly witty...Think Beckett, think Pynchon, think Gaddis. Think." --Sven Birkerts, *The Atlantic*

Security Analysis: The Classic 1934 Edition
Macmillan
A #1 NEW YORK TIMES BESTSELLER
One of the most salient features of our culture is that there is so much bullshit. Everyone knows this. Each of us contributes his share. But we tend to take the situation for granted. Most people are rather confident of their ability to recognize bullshit and to avoid being taken in by it. So the phenomenon has not aroused much deliberate concern. We have no clear understanding of what bullshit is, why there is so much of it, or what functions it serves. And we lack a conscientiously developed appreciation of what it means to us. In other words, as Harry Frankfurt writes, "we have no theory." Frankfurt, one of the world's most influential moral philosophers, attempts to build such a theory here. With his characteristic combination of philosophical acuity, psychological insight,

and wry humor, Frankfurt proceeds by exploring how bullshit and the related concept of humbug are distinct from lying. He argues that bullshitters misrepresent themselves to their audience not as liars do, that is, by deliberately making false claims about what is true. In fact, bullshit need not be untrue at all. Rather, bullshitters seek to convey a certain impression of themselves without being concerned about whether anything at all is true. They quietly change the rules governing their end of the conversation so that claims about truth and falsity are irrelevant. Frankfurt concludes that although bullshit can take many innocent forms, excessive indulgence in it can eventually undermine the practitioner's capacity to tell the truth in a way that lying does not. Liars at least acknowledge that it matters what is true. By virtue of this, Frankfurt writes, bullshit is a greater enemy of the

truth than lies are.
Or, *Life in the Woods*
William Mulvey
A small town is haunted by a crime from 15 years ago. Not one suspect was ever brought to justice. But now, 15 years later, when likely suspects seem to be disappearing from tragic events, the town's down-and-out fire chief may know more than he's letting on. David, the alcoholic fire chief, has had too many things go wrong in his life and has nothing left to live for. Brian Grace lost his daughter 15 years ago and has looked for her ever since. His bodyguard, Jason, is a tough character that likes to control his surroundings and protect his employer. Kelly, the detective, is an attractive woman and finds herself getting more involved with the case than anyone could have predicted. And, there is Chad and his three friends; a tough and nasty group of old school mates that cause trouble wherever they

turn up. What could possibly be happening in this small town, and is it even connected to a girl's disappearance 15 long years ago?
Rekindle Abrams
A candid and indispensable primer on all aspects of advertising from the man Time has called "the most sought after wizard in the business." Told with brutal candor and prodigal generosity, David Ogilvy reveals: • How to get a job in advertising • How to choose an agency for your product • The secrets behind advertising that works • How to write successful copy—and get people to read it • Eighteen miracles of research • What advertising can do for charities And much, much more.
