SOCIOLOGY: DISCOVERING SOCIETY, 2nd provides comprehensive coverage of sociology in an affordable, paperback format. With research studies in every chapter and boxes that portray sociologists at work, it will especially appeal to sociology professors who value a quantitative, research-methodology-oriented approach. Instead of presenting every possible theory for each issue, Stockard's streamlined approach pulls in theories only when they appropriately relate to the issue at hand. This integrated approach produces a text that reads more smoothly than the overly-encyclopedic, heavily-interrupted narratives of other texts.

What do you want me to do? This question is the enduring management issue, a perennial problem that Stephen Bungay shows has an old solution that is counter-intuitive and yet common sense. The Art of Action is a thought-provoking and fresh look at how managers can turn planning into execution, and execution into results. Drawing on his experience as a consultant, senior manager and a highly respected military historian, Stephen Bungay takes a close look at the nineteenth-century Prussian Army, which built its agility on the initiative of its highly empowered junior officers, to show business leaders how they can build more effective, productive organizations. Based on a theoretical framework which has been tested in practice over 150 years, Bungay shows how the approach known as 'mission command' has been applied in businesses as diverse as pharmaceuticals and F1 racing today. The Art of Action is scholarly but engaging, rigorous but pragmatic, and shows how common sense can sometimes be surprising.

A leader in Introduction to Educational Research courses, Educational Research: Competencies for Analysis and Applications, ninth edition, remains a practical text focused on the skills and procedures students

need in order to become competent consumers and producers of educational research. The accessible writing style and light, humorous tone of this book helps to demystify and enliven this demanding course. The text uses a direct, step-by-step approach to the research process. Tasks are included throughout the text to guide students through the process of creating their own research report. Published research articles are now included in every research methods chapter to provide students with illustrations of exemplary qualitative and quantitative research. Key changes in the ninth edition include an expanded coverage of qualitative research through a new chapter on Case Study Research (Chapter 17), a new chapter on Survey Research (Chapter 7), an increased emphasis on ethical considerations in the conduct of educational research (Chapter 1), and significant updates to Descriptive Statistics (Chapter 12) and Inferential Statistics (Chapter 13) that increase the coverage of how to use technology in the research process."
