If there is one thing Ford enthusiasts have learned over the years, deciphering which Ford parts work with which Ford engines is a far more difficult task than with many other engine families. Will Cleveland heads fit on my Windsor block? Can I build a stroker motor with factory parts? Can I gain compression by using older-model cylinder heads, and will it restrict flow? Is there a difference between Windsor 2-barrel and 4-barrel heads? These are just a few examples of common questions Ford fans have. These and many other questions are examined in this all-new update of a perennial best seller. Thoroughly researched and, unlike previous editions, now focused entirely on the small-block Windsor and Cleveland engine families, *Ford Small Block Engine Parts*

Interchange includes critical information on Ford's greatest small-block engines and goes into great detail on the highly desirable high-performance hardware produced throughout the 1960s, 1970s, and 1980s. By combining some of the best parts from various years, some great performance potential can be unlocked in ways Ford never offered to the general public. Following the advice in *Ford Small-Block Engine Parts Interchange*, these engine combinations can become reality. You will find valuable information on cranks, blocks, heads, cams, intakes, rods, pistons, and even accessories to guide you through your project. Author George Reid has once again done extensive research to accurately deliver a thorough and complete collection of Ford small-block information in this newly revised edition.

Knowing what internal factory engine parts can be used across the wide range of production Ford power plants is invaluable to the hot rodder and swap meet/eBay shopper. Whether building a stroker Cleveland or a hopped-up Windsor, this book is an essential guide.

52 Prepper Projects JHU Press

2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental

impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

"Only the Super-Rich Can Save Us!"

Harper Collins

In the war-fevered spring and summer of 1861, a group of slaves in Adams County, Mississippi, conspired to gain their freedom by overthrowing and murdering their white masters. The conspiracy was discovered, the plotters were arrested and tried, and at least forty slaves in and around Natchez were hanged. By November the affair was over, and the planters of the district united to conceal the event behind a veil of silence. In 1971, Winthrop D. Jordan came upon the central document, previously

unanalyzed by modern scholars, upon which this extraordinary book is based - a record of the testimony of some of the accused slaves as they were interrogated by a committee of planters determined to ferret out what was going on. This discovery led him on a twenty-year search for additional information about the aborted rebellion. Because no official report or even newspaper account of the plot existed, the search for evidence became a feat of historical detection. Jordan gathered information from every possible source - the private letters and diaries of members of the families involved in suppressing the conspiracy and of people who recorded the rumors that swept the Natchez area in the unsettled months following the beginning of the war; letters from Confederate soldiers concerned about the events back home; the journal of a Union officer who heard of the plot; records of the postwar Southern Claims Commission; census documents; plantation papers; even gravestones. What has emerged from this odyssey of research is a brilliantly written re-creation of one of

the last slave conspiracies in the United States. It is also a revealing portrait of the Natchez region at the very beginning of the Civil War, when Adams County was one of the wealthiest communities in the nation and a few powerful families interconnected by marriage and business controlled not only a large black population but the poorer whites as well. In piecing together the fragments of extant information about the conspiracy, Jordan has produced a vivid picture of the plantation slave community in southwestern Mississippi in 1861 - its composition and distribution; the degree of mobility permitted slaves; the ways information was passed around slave quarters and from plantation to plantation; the possibilities for communication with town slaves, free blacks, and white abolitionists. Jordan also explores the treatment of blacks by their owners, the kinds of resentments the slaves harbored, the sacrifices they were willing to make to protect or avenge abused family members, and the various ways in which they viewed freedom. *Tumult and Silence at*

Second Creek is a major work by one of the most distinguished scholars of slavery and race relations. Winthrop D. Jordan's study of the slave society of the Natchez area at the onset of the Civil War is a landmark contribution to the field. More than that, his exhaustive and resourceful search for documentation and his careful analysis of sources make the study an extended and innovative essay on the nature of historical evidence and inference.

by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time.

Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. Well beyond its health effects, the pandemic has wrought major changes in people's everyday lives as they confront restrictions imposed by physical distancing and consequences such as loss of work, working or learning from home and reduced contact with family and friends. This edited collection covers a diverse

range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). Together, these contributions offer a rich account of COVID society. They provide snapshots of what life was like for people in a variety of situations and locations living through the first months of the novel coronavirus crisis, including discussion not only of health-related experiences but also the impact on family, work, social life and leisure activities. The socio-material dimensions of quotidian practices are highlighted: death rituals, dating apps, online musical performances, fitness and exercise practices, the role of windows, healthcare work, parenting children learning

at home, moving in public space as a blind person and many more diverse topics are explored. In doing so, the authors surface the feelings of strangeness and challenges to norms of practice that were part of many people's experiences, highlighting the profound affective responses that accompanied the disruption to usual cultural forms of sociality and ritual in the wake of the COVID outbreak and restrictions on movement. The authors show how social relationships and social institutions were suspended, re-invented or transformed while social differences were brought to the fore. At the macro level, the book includes localised and comparative analyses of political, health system and policy responses to the pandemic, and highlights the differences in

representations and experiences of very different social groups, including people with disabilities, LGBTQI people, Dutch Muslim parents, healthcare workers in France and Australia, young adults living in northern Italy, performing artists and their audiences, exercisers in Australia and New Zealand, the Latin cultures of Spain and Italy, Asian-Americans and older people in Australia. This volume will appeal to undergraduates and postgraduates in sociology, cultural and media studies, medical humanities, anthropology, political science and cultural geography.

Bestselling author Tony Horwitz

tells the electrifying tale of the daring insurrection that put America on the path to bloody war. Plotted in secret, launched in the dark, John Brown's raid on Harpers Ferry was a pivotal moment in U.S. history. But few Americans know the true story of the men and women who launched a desperate strike at the slaveholding South. Now, *Midnight Rising* portrays Brown's uprising in vivid color, revealing a country on the brink of explosive conflict. Brown, the descendant of New England Puritans, saw slavery as a sin against America's founding principles. Unlike most abolitionists, he was willing to take up arms, and in 1859 he prepared for battle at a hideout in Maryland, joined by his teenage daughter, three of his sons, and a guerrilla band that included former slaves and a dashing spy. On October 17, the raiders seized Harpers Ferry, stunning the nation and prompting a counterattack led by Robert E. Lee. After Brown's capture, his defiant eloquence galvanized the North and appalled the South, which considered Brown a terrorist. The raid also helped

elect Abraham Lincoln, who later began to fulfill Brown's dream with the Emancipation Proclamation, a measure he called "a John Brown raid, on a gigantic scale." Tony Horwitz's riveting book travels antebellum America to deliver both a taut historical drama and a telling portrait of a nation divided—a time that still resonates in ours.

Midnight Rising

"In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion, Warren Buffett watched the horrors of Hurricane Katrina unfold on television in early September 2005. . . . On the fourth day, he beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . He knew

exactly what he had to do. .
." So begins the vivid
fictional account by
political activist and
bestselling author Ralph
Nader that answers the
question, "What if?" What if
a cadre of superrich
individuals tried to become a
driving force in America to
organize and institutionalize
the interests of the citizens
of this troubled nation? What
if some of America's most
powerful individuals decided
it was time to fix our
government and return the
power to the people? What if
they focused their power on
unionizing Wal-Mart? What if
a national political party
were formed with the sole
purpose of advancing clean
elections? What if these
seventeen superrich
individuals decided to
galvanize a movement for
alternative forms of energy

that will effectively clean up
the environment? What if
together they took on
corporate goliaths and
Congress to provide the
necessities of life and
advance the solutions so long
left on the shelf by an
avaricious oligarchy? What
could happen? This
extraordinary story, written
by the author who knows the
most about citizen action,
returns us to the literature
of American social
movements—to Edward Bellamy,
to Upton Sinclair, to John
Steinbeck, to Stephen
Crane—reminding us in the
process that changing the
body politic of America
starts with imagination.
