[The Life of Isabella Bird \(Mrs. Bishop\) BoD – Books on Demand](#)

Written by a team of renowned contributors and carefully edited to address the themes laid out by the editors in their introduction, the book includes theoretical issues concerning the questions of aesthetics and politics and addresses city and urban strategies within the general critique of the "post-political". By focusing on specific case studies from Warsaw, Barcelona, Dubai,

Tokyo and many more the book consolidates the contributions of a diverse group of academics, architects and critics from Europe, the Middle East and America. This collection fills the gap in the existing literature on the relation between politics and aesthetics, and its implications for the theoretical discourse of architecture today. In summary, this book provides a response to the predominant de-politicization in academic discourse and is an attempt to re-claim the abandoned critical project in architecture.

Despite mining's multidimensional role in the history of Utah since Euro-american settlement, there has never been a book that surveyed and contextualized its impact. From the Ground Up fill that gap with a collection of essays

by leading Utah historians and geologists. Essays here address the geology of the state, the economic history of mining in Utah, and the lore of mines and miners.

Additionally, the book reviews a handful of particularly significant mineral industries---saline, coal, uranium, and beryllium---and surveys important hard-rock mining regions of the state.

"In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion, Warren Buffett watched the horrors of Hurricane Katrina unfold on television in early September 2005. . . . On the fourth day, he

beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . He knew exactly what he had to do. . ." So begins the vivid fictional account by political activist and bestselling author Ralph Nader that answers the question, "What if?" What if a cadre of superrich individuals tried to become a driving force in America to organize and institutionalize the interests of the citizens of this troubled nation? What if some of America's most powerful individuals decided it was time to fix our government and return the power to the people? What if they focused their power on unionizing Wal-Mart? What if a national political party were formed with the sole purpose of advancing clean elections? What if these seventeen superrich individuals decided to galvanize

a movement for alternative forms of energy that will effectively clean up the environment? What if together they took on corporate goliaths and Congress to provide the necessities of life and advance the solutions so long left on the shelf by an avaricious oligarchy? What could happen? This extraordinary story, written by the author who knows the most about citizen action, returns us to the literature of American social movements—to Edward Bellamy, to Upton Sinclair, to John Steinbeck, to Stephen Crane—reminding us in the process that changing the body politic of America starts with imagination.

This collection of short stories is the only such book published in Melville's lifetime.

"Bartley the Scrivener," the collection's most famous story, concerns a clerk who works as a copyist for a well-to-do Manhattan lawyer.

Bartleby steadfastly refuses to perform any of the tasks required by his job and his reply, "I would prefer not to," comes to haunt his employer. Today "Bartleby" is considered one of the most significant

American short stories and a precursor to the absurdist fiction of Franz Kafka. Also notable is the novella "Benito Cereno." The story concerns a slave rebellion on board a Spanish slave-trading ship in 1799 and is noted for its foreboding atmosphere and dark, complex plot. Another novella in the collection, "The Encantadas," offers a philosophical look at the Galápagos Islands.

Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) * at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more

beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities.

All back issues can also be ordered from Plenum. We have reported in Volume 24 (thesis year 1979) a total of 10,033 theses titles from 26 Canadian and 215 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. While Volume 24 reports these submitted in 1979, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

"A long-needed study of the creation stories and legends of the Creek Indian people and their neighbors...including the influential Yuchi legends and Choctaw myths as well as those of the Hitchiti, Alabama, and Muskogee." -Charles R.

McNeil, Msueum of Florida History, Tallahassee The creation stories, myths, and migration legends of the Creek Indians who once populated southeastern North America are centuries--if not millennia--old. For the first time, an extensive collection of all known versions of these stories has been compiled from the reports of early ethnographers, sociologists, and missionaries, obscure academic journals, travelers' accounts, and from Creek and Yuchi people living today. The Creek Confederacy originated as a political alliance of people from multiple cultural backgrounds, and many of the traditions, rituals, beliefs, and myths of the culturally differing social groups became communal property. Bill Grantham explores the unique mythological and religious contributions of each subgroup to the social entity that historically became known as the Creek Indians. Within each topical chapter, the stories are organized by language group following Swanton's classification of southeastern tribes: Uchean (Yuchi), Hitchiti, Alabama, Muskogee, and Choctaw--a format that allows the reader to compare the myths and legends and to retrieve

information from them easily. A final chapter on contemporary Creek myths and legends includes previously unpublished modern versions. A glossary and phonetic guide to the pronunciation of native words and a historical and biographical account of the collectors of the stories and their sources are provided. Bill Grantham, associate professor of anthropology at Troy State University in Alabama, is anthropological consultant to the Florida Tribe of Eastern Creeks. He has contributed chapters to several books, including *The Symbolic Role of Animals in*

Archaeology.

In 1891, when coal companies in eastern Tennessee brought in cheap convict labor to take over their jobs, workers responded by

storming the stockades, freeing the prisoners, and loading them onto freight trains. Over the next year, tactics escalated to include burning company property and looting company stores. This was one of the largest insurrections in US working-class history. It happened at the same time as the widely publicized northern labor war in Homestead, Pennsylvania. And it was largely ignored, then and now. Dixie Be Damned engages seven similarly "hidden" insurrectionary episodes in Southern history to demonstrate the region's long arc of revolt. Countering images of the South as pacified and conservative, this adventurous retelling presents history in the rough. Not the image of the South many expect, this is the South of maroon rebellion, wildcat strikes, and Robert F. Williams's book *Negroes with Guns*, a South where the dispossessed refuse to quietly suffer their fate. This is people's history at its best: slave revolts, multiracial banditry, labor battles, prison uprisings, urban riots, and more. Neal Shirley grew up in Winston-Salem, North Carolina, and now lives in Durham, NC, where he is involved in several anti-prison initiatives and runs a small publishing project called the North Carolina Piece Corps. Saralee Stafford was born in the Piedmont of North Carolina. Her recent political work has focused on connecting the struggles of street organizations with those of anarchists in the area.

She teaches gender-related health in Durham, North Carolina.

Businesses today want actionable insights into their data—they want their data to reveal itself to them in a natural and user-friendly form. What could be more natural than human language?

Natural-language search is at the center of a storm of ever-increasing web-driven demand for human-computer communication and information access. SQL Server 2008 provides the tools to take advantage of the

features of its built-in enterprise-level natural-language search engine in the form of integrated full-text search (iFTS). iFTS uses text-aware relational queries to provide your users with fast access to content. Whether you want to set up an enterprise-wide Internet or intranet search engine or create less ambitious natural-language search applications, this book will teach you how to get the most out of SQL Server 2008 iFTS: Introducing powerful iFTS features in SQL Server, such as the FREETEXT and CONTAINS predicates, custom thesauruses, and stop lists Showing you how to optimize full-text query performance through features like full-text indexes and
