Parents, do you want to help your child through the peaks and valleys of adolescence? By understanding what your teen is experiencing, you can better communicate and help them make wise choices as they attempt to establish their independence. As teens progress into adulthood, there seems to be a shift in where the brain routes judgment calls. Mixed with the abuse of alcohol or illegal drugs, or risky behavior in general, it becomes more difficult for the young adult mind to fully understand the consequences of some choices they make. This book helps teenagers refocus their energy, and make a smoother transition throughout adolescence into early adulthood.

The truth is, child rearing is not complicated. Therefore, it is not hard. There will be difficult moments, of course, . . . but if a parent is experiencing the rearing of a child or children as generally difficult--as emotionally, intellectually, and even physically exhausting, then the parent is doing something wrong.

--John Rosemond, Family Building Trusted family psychologist
John Rosemond has a revolutionary message for today's parents: Your grandparents' generation knew a lot more about raising children than all of today's experts. The experts have turned child rearing into a complicated, exhausting chore rather than the simple, straightforward task it should be. In *Family Building: The Five Fundamentals of Effective Parenting*, Rosemond outlines the

five key principles of traditional parenting that are crucial to raising well-behaved children today. * It's about the family, not the children. * Where discipline is concerned, it's about communication, not consequences; leadership not relationship. * It's about respecting others, not high self-esteem. * It's about manners and morals, not skills. * It's about responsibility, not high achievement. Each chapter includes questions from real parents faced with real-life parenting challenges, and in his typical no-nonsense style, Rosemond provides practical solutions. *Family Building* restores common sense to parenting and puts the parents back in charge. Once again, John Rosemond delivers child-rearing wisdom that no parent should miss.

The 5 Love Languages of Children/The 5 Love Languages of Teenagers Set Andrews McMeel Publishing

Surviving Adolescence was written because the most trying times in a child's life are during pre-teen and teen years. Most parents and teachers may be ill equipped to deal effectively with adolescents. They are not prepared for the remarkable changes that occur. The remarkable physical changes are most noticeable, but the intellectual, social and emotional changes can confound us. The book follows the roller coaster ride all can experience: Ratcheting Up, the First Drop, Loop-de-Loop, Climbing, the Steep Drop, In the Tunnel, Into the Daylight, and Leveling Off. The ideas cover preparing for adolescence, the reality of confronting puberty, the family unit, and how to help teens confront a new social environment, including cyberspace. Additional areas are recognizing the need for productive activities, discussing burgeoning sexual issues, bullying and substance abuse. Suggestions for communicating effectively and taking care of yourself are included, too. While the book is designed for a broad audience, each chapter concludes with educational considerations.

In *Teen-Proofing*, now available in paperback, he tackles the challenges of raising a teenager with his trademark user-friendly, humorous, and commonsense style. Rosemond lays out a perfectly sound and logical case for recognizing the realities of the teen-parent relationship, forming the foundation, and parenting with the "Long Rope Principle." In short, the author demonstrates how Mom and Dad can avoid the pitfalls of becoming dictatorial "Control Freaks," skirt the potholes of turning into permissive "Wimps," and enjoy the freedom and rewards of parenting in a controlled (but not controlling) and relaxed manner. Teenagers, Rosemond readily admits, can be a challenge. But infusing young adults with a sense of personal responsibility, then showing them the results of good and bad choices, is a goal every parent can achieve.

From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Decades of research have demonstrated that the parent-child dyad and the environment of the family â€"which includes all primary caregivers â€"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

category Arguing that adolescence is an unnecessary period of life that people are better off without, this groundbreaking study shows that teen confusion and hardships are caused by outmoded systems that were designed to destroy the continuum between childhood and adulthood. Documenting how teens are isolated from adults and are forced to look to their media-dominated peers for knowledge, this discussion contends that by infantilizing young people, society does irrevocable harm to their development and well-being. Instead, parents, teachers, employers, and others must rediscover the adults in young people by giving them authority and responsibility as soon as they exhibit readiness. Teens are highly capable--in some ways more than adults--and this landmark discussion offers paths for reaching and enhancing the competence in America's youth.

The Bible "code" of the title refers not to a cryptogram, but to a set of standards - biblical standards for the proper raising of children. Best-selling author and psychologist John Rosemond examines forty Bible verses and passages that make no overt mention of parenting matters and explains their relevance to a proper understanding of children and parental responsibilities. How does, for example, "love your neighbor as yourself" (Matthew 22:39) apply to raising children? The Bible Parenting Code contains a wealth of guidance for parents regardless of faith orientation. In the final analysis, what the Bible has to say about children confirms commonsense, which is Rosemond's stock-in-trade.
