The Tektronix 2440 is an end-80s digitising oscilloscope (list price: 11,500\$). It features 300 MHz equivalent-time or 200 MHz real-time sampling bandwidth and a rare analog peak value detector. It detects the signal minimum and maximum between two sampling points, making the display look a bit more like an analog scope with a filled area between both extremums – independent of the sampling ...
