A classic text on the path to God through knowledge. The basic teaching is that God alone is the all-pervading reality; the individual soul is none other than the universal soul. Shankara was under no illusions about this world. For this reason, he is able to describe so powerfully the complete transformation of the universe that takes place before the eyes of the illumined seer, when the world indeed becomes a paradise.

As every parent knows, there is nothing more stressful than being away from a child even if it's only for a few days. In this heartwarming book, Wendy

Tugwood captures perfectly how the love between a mother and child copes with separation. When we're apart I miss you so I wish I didn't have to go I miss your face, your touch, your smell, Your silliness I know so well. I think of how you sing to me, "I love you too... I love you three!" On goes our love and counting game A game that always ends the same. Needing to express how much they love each other, parent and child play the old familiar counting game. The child says "I love you," the parent replies "I love you too," and the child, gleefully, replies "I love you three!" From

there they continue counting until they reach "I love you ten." I Love You Too, I Love You Three will delight parents and children alike and children will not only learn their numbers, they will gain assurance that, no matter what happens, the parent's love, like the counting game, will never end.

After enjoying years as a popular journalist and poet, intellectual and freethinker Gerald Massey turned his vast studies in the field of Egyptology into *A Book of the Beginnings*, a bold statement that the origin of all civilization lays in ancient

Egypt. His assertions, radical at the time-indeed, almost a century before the discovery of three-million-year-old human remains in Africa-resonate loudly today, when molecular biology is making corresponding discoveries alongside the still-raging creation-versus-evolution controversy. In Volume II, Massey intelligently argues an Egyptian origin for Biblical symbology, lexicography, and mythology. Here, he not only asks if the oldest Jewish and Christian axioms were really born on the banks of the Nile, he offers a stalwart and profound "Yes!" British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his

best-known works are in the realm of Egyptology, including *The Natural Genesis* and *Ancient Egypt: The Light of the World*.

Vivian Howard, star of PBS's *A Chef's Life*, celebrates the flavors of North Carolina's coastal plain in more than 200 recipes and stories. This new classic of American country cooking proves that the food of Deep Run, North Carolina -- Vivian's home -- is as rich as any culinary tradition in the world.

Organized by ingredient with

dishes suited to every skill level, from beginners to confident cooks, *Deep Run Roots* features time-honored simple preparations alongside extraordinary meals from her acclaimed restaurant *Chef and the Farmer*. Home cooks will find photographs for every single recipe. Ten years ago, Vivian opened *Chef and the Farmer* and put the nearby town of Kinston on the culinary map. But in a town paralyzed by recession, she couldn't hop on every new culinary trend. Instead, she focused on rural development: If you grew it,

she'd buy it. Inundated by local sweet potatoes, blueberries, shrimp, pork, and beans, Vivian learned to cook the way generations of Southerners before her had, relying on resourcefulness, creativity, and the traditional ways of preserving food. Deep Run Roots is the result of years of effort to discover the riches of Eastern North Carolina. Like *The Fannie Farmer Cookbook*, *The Art of Simple Food*, and *The Taste of Country Cooking* before it, this is landmark work of American food writing.

Recipes include: Family favorites like Blueberry BBQ Chicken Creamed Collard-Stuffed Potatoes Fried Yams with Five-Spice Maple Bacon Candy Chicken and Rice Country-Style Pork Ribs in Red Curry-Braised Watermelon Show-stopping desserts like Warm Banana Pudding, Peaches and Cream Cake, Spreadable Cheesecake, and Pecan-Chewy Pie. You'll also find 200 more quick breakfasts, weeknight dinners, holiday centerpieces, seasonal preserves, and traditional preparations for all kinds of cooks.

Twitter has served as a major platform for political performance, social justice activism, and large-scale public debates over race, ethnicity, gender, sexuality, and nationality. It has empowered minoritarian groups to organize protests, articulate often-underrepresented perspectives, and form community. It has also spread hashtags that have been used to bully and silence women, people of color, and LGBTQ people. #identity is among the first scholarly books to address the positive and negative effects of Twitter on our contemporary world. Hailing from diverse scholarly fields, all contributors are affiliated with The Color of New Media, a scholarly collective based at the University of California, Berkeley. The Color of New Media explores the intersections of new media studies, critical race theory, gender and women's studies, and postcolonial studies. The essays in #identity consider topics such as the social justice movements organized through #BlackLivesMatter, #Ferguson, and #SayHerName; the controversies around #WhyIStayed and #CancelColbert; Twitter use in India and Africa; the

integration of hashtags such as #nohomo and #onfleek that have become part of everyday online vernacular; and other ways in which Twitter has been used by, for, and against women, people of color, LGBTQ, and Global South communities. Collectively, the essays in this volume offer a critically interdisciplinary view of how and why social media has been at the heart of US and global political discourse for over a decade.

Debbie Blue approaches scripture like a farm wife handles a chicken, carefully but not delicately, thoroughly but not exactly cautiously. Debbie sees tangled questions about a God who gets a body. Though religion often abstracts, the story of Christ is the opposite. God becomes physical. God is made human in the womb of Mary and born through the birth canal.

A number of countries have

recently discovered and are developing oil and gas reserves. Policy makers in such countries are anxious to obtain the greatest benefits for their economies from the extraction of these exhaustible resources by designing appropriate policies to achieve desired goals. One important theme of such policies is the so-called local content created by the sector—the extent to which the output of the extractive industry sector generates further benefits to the economy beyond the direct contribution of its value-added, through its links to other sectors. While local content policies have the potential to stimulate broad-based economic development, their application in petroleum-rich

countries has achieved mixed results. This paper describes the policies and practices meant to foster the development of economic linkages from the petroleum sector, as adopted by a number of petroleum producing countries both in and outside the Organisation for Economic Co-operation and Development. Examples of policy objectives, implementation tools, and reporting metrics are provided to derive lessons of wider applicability. The paper presents various conclusions for policy makers about the design of local content policies.

challenged readers in *A Book of the Beginnings* to consider the argument that Egypt was the birthplace of civilization and that the widespread monotheistic vision of man and the metaphysical was, in fact, based on ancient Egyptian mythos. In *The Natural Genesis*, Massey delivers a sequel, delving deeper into his compelling polemic. Volume II provides detailed discourse on the Egyptian origin of the delicate components of the monotheistic creed. With his agile prose, Massey leads an adventurous examination of the
