The official U.S. government report on Russian interference in democracy around the world! Most Americans were surprised to learn of Russian efforts to manipulate the results of the 2016 presidential election, and have become increasingly concerned about the vulnerabilities of our democracy. Here for the first time in an official U.S. government report is the fascinating and detailed account of how ex-KGB agent Vladimir Putin has used

computer hackers, official state spy agencies, and even Russian organized crime thugs over the past thirty years to achieve his policy agenda?not only for Russian political domination, but also for his own enrichment and the enrichment of the oligarchs who control almost all aspects of the Russian economy. This complete report includes chapters on: Putin's Rise and Motivations Manipulation and Repression Inside Russia Old Active Measures and Modern Malign Influence Operations Weaponization of Civil Society, Ideology, Culture, Crime, and Energy Kremlin Interference in Semi-Consolidated Democracies and Transitional Governments Kremlin Interference in Consolidated Democracies Multilateral and U.S. efforts to Counter the Kremlin's Asymmetric Arsenal In Putin's Asymmetric Assault on Democracy in Russia and Europe, we learn about Vladimir Putin's rise to power through the KGB to mayor of St. Petersburg

and eventually as head of the Russian state. We discover the history of how Putin used classic Cold War KGB tactics by weaponizing civil society, culture, ideology, and Russia's criminal element against the nascent Russian democracy by cultivating and using ties to NGOs, thinktanks, extremist political groups, the Russian orthodox church, industrial and energy policy, and the Russian Mafia. We also see how the Kremlin then exported this political extortion, intimidation, and monetary corruption first to its Eastern European neighbors, then their western partners in the European Union, and how it has now landed on America's shores. Just as certain people in the intelligence community became increasingly alarmed at the growing strength and sophistication of Al-Qaeda in the late 1990s, the senators and staffers of the U.S. Senate Committee on Foreign Relations are giving the nation fair warning of a 9/11-level assault on the United States, this time by Russia's spy agencies. Putin's Asymmetric Assault on Democracy in Russia and Europe reveals not only the history of Russia's devastating tactics, but how to recognize and counter them.

Lost in a Good Game CreateSpace

Health Psychology is essential reading for all students and researchers of health psychology. Organized into four sections, the 6th edition is structured with a clear emphasis on theory and evidence throughout. This

textbook maintains its popular and balanced approach between the biomedical and psychosocial model, while strengthening its focus on critical thinking and behaviour change. Key updates include:

- Learning objectives: Each chapter opens with a set of learning objectives, which clearly outlines the knowledge, understanding and skills you will acquire from each chapter.
- Case studies: Each chapter includes a case study to illustrate how the key theories and ideas are relevant to everyday life.
- Through the Eyes of Health Psychology: A brand new feature to show how a health psychologist might analyse each case study using the theories and concepts presented throughout the book.
- Health promotion: A whole chapter devoted to the theories and evidence relevant to behaviour change and includes a new section on integrated approaches and the drive to develop a new science of behaviour change.
- Thinking critically about: The process of thinking critically is introduced in the first chapter which describes how to think critically about theory, methods, measurement and research design. Each chapter has its own 'Thinking critically about ...' section at the end to highlight problems with specific theories and research areas. This section includes critical thinking questions and a 'Some problems with...' section to form the basis of class discussions and enable students to be more critical in their thinking and writing.

India: what Can it Teach Us? Springer Nature

Written towards the end of 1937 during his Europe trip, after being nominated the President of the Indian National Congress, An Indian Pilgrim traces Bose's life story from birth till his resignation from the Indian Civil Service. It is an astounding account of his ideological development and his singular focus on India's reconstruction in which Swami Vivekananda played a large part—"I was barely fifteen when Vivekananda entered my life. Then there followed a revolution within and everything was turned upside down." The book recounts the development of the spirit of service, sacrifice and zeal for national

liberation, which were the driving forces of his life. We hope this publication will gain wide circulation so that the spirit of Subhas Chandra Bose becomes the guiding light of the country's youth in these disturbing times.

A Dweller on Two Planets Chronicle Books

"Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold."

—From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts
The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a

dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.

CRC World Dictionary of Medicinal and Poisonous Plants Springer Science & Business Media

The Nile is the world's longest river and sustains the livelihoods of millions of people across ten countries in Africa. This book provides unique and up-to-date insights on agriculture, water resources, governance, poverty, productivity, upstream-downstream linkages, innovations, future plans and their implications.

Economics and Entrepreneurship Simon and Schuster

This volume combines some of the most influential published research in this emerging field with newly commissioned essays on the issues, problems and lessons involved in collaborating museums and source communities. Focusing on museums in the UK, North America and the Pacific, the book highlights three areas which demonstrate the new developments most clearly: the museum as field site or 'contact zone' - a place which source community members enter for purposes of consultation and collaboration visual repatriation - the use of photography to return images of ancestors, historical moments and material heritage to source communities exhibition case studies - these are discussed to reveal the implications of cross-cultural and collaborative research for museums, and how such projects have challenged established attitudes and practices. As the first overview of its kind, this collection will be essential reading for museum staff working with source communities, for community members involved with museum programmes, and for students

and academics in museum studies and social anthropology. Advanced Cosmetic Otoplasty University of Arizona Press

The two-volume set LNCS 12013 and 12014 constitutes the thoroughly refereed proceedings of the 17th International Conference on Computer Aided Systems Theory, EUROCAST 2019, held in Las Palmas de Gran Canaria, Spain, in February 2019. The 123 full papers presented were carefully reviewed and selected from 172 submissions. The papers are organized in the following topical sections: Part I: systems theory and applications; pioneers and landmarks in the development of information and communication technologies; stochastic models and applications to natural, social and technical systems; theory and applications of metaheuristic algorithms; model-based system design, verification and simulation. Part II: applications of signal processing technology; artificial intelligence and data mining for intelligent transportation systems and smart mobility; computer vision, machine learning for image analysis and applications; computer and systems based methods and electronic technologies in medicine; advances in biomedical signal and image processing; systems concepts and methods in touristic flows; systems in industrial robotics, automation and IoT.

In the Shadows of Poland and Russia Cosimo, Inc.

'Etchells writes eloquently ... A heartfelt defence of a demonised pastime' The Times 'Once in an age, a piece of culture comes along that feels like it was specifically created for you, the beats and words and ideas are there because it is your life the creator is describing. Lost In A Good Game is exactly that. It will touch your heart and mind. And even if Bowser, Chun-li or Q-Bert weren't crucial parts of your youth, this is a flawless victory for everyone' Adam Rutherford When Pete Etchells was 14, his father died from motor neurone disease. In order to cope, he immersed himself in a virtual world - first as an escape, but later to try to understand what had happened. Etchells is now a

researcher into the psychological effects of video games, and was co-author on a recent paper explaining why WHO plans to classify 'game addiction' as a danger to public health are based on bad science and (he thinks) are a bad idea. In this, his first book, he journeys through the history and development of video games - from Turing's chess machine to mass multiplayer online games like World of Warcraft- via scientific study, to investigate the highs and lows of playing and get to the bottom of our relationship with games - why we do it, and what they really mean to us. At the same time, *Lost in a Good Game* is a very unusual memoir of a writer coming to terms with his grief via virtual worlds, as he tries to work out what area of popular culture we should classify games (a relatively new technology) under.

Landscapes and Landforms of Ethiopia Routledge

The Handbook of Theological Education in World Christianity is the first attempt to map and analyze developments in theological education on a global scale. This volume, with contributions from 98 leaders in theological education from around the world, provides a comprehensive introduction to the major themes and contexts in the international discourse on theological education, surveys of the issues and challenges faced in different regions, and introductory essays on the developments in the major denominational families in World Christianity. The editors are Dietrich Werner, World Council of Churches, Geneva; David Esterline, McCormick Theological Seminary, Chicago; Namsoon Kang, Brite Divinity School, Fort Worth; and Joshva Raja, Queen's Foundation, Birmingham.

Veteran video game designer Dustin Hansen takes readers on a fun and fascinating trip through the brief but intensely innovative history of video games in *Game On!*

Ethnobotany World Health Organization

This surprise bestseller from Canada traces the groups and individuals who are part of a timeless phenomenon that transcends culture and religion. Joan of Arc was one. So was Sir Isaac Newton. A monk vows to be one. A prisoner has no choice. History tells of many avowed celibates, and today's society reflects a renewed interest in celibacy. But what caused -- and still causes -- people to give up sex, the very activity that drives, fascinates, troubles, and delights the rest of us? Elizabeth Abbott's spirited and provocative exploration of celibacy debunks the traditionally held notion that celibacy is a predominantly religious concept of little concern to the secular world. With myriad examples, Abbott's lively history reveals insights not only about our religious practices but also about our sexual desires and changing attitudes toward gender and physical health. From the vestal virgins of ancient Rome, who were entombed alive if they broke their vows, to contemporary athletes, who "conserve semen" to enhance their game, from celibacy as a guarantee for marriage to involuntary celibacy among prisoners, eunuchs, and young women cloistered against their will, Abbott puts a human face on celibacy, capturing the anguish of the castrated boy destined for an operatic career, the ecstasy of the woman whose celibacy is rewarded by visions of Christ, and the anger of the bachelor doomed by the surplus of males in contemporary China. What didn't happen in the bedrooms of history, and why? Through stories of individual lives -- fascinating, vital, and real -- *A History of Celibacy* tells all.

St. Andrew's Cross Greenwood Publishing Group

After enjoying years as a popular journalist and poet, intellectual and freethinker Gerald Massey turned his vast studies in the field of Egyptology into *A Book of the Beginnings*, a bold statement that the origin of all civilization lays in ancient Egypt. His assertions, radical at the time—indeed, almost a century before the discovery of three-million-year-old human remains in Africa—resonate loudly today, when molecular biology is making corresponding discoveries alongside the still-raging creation-versus-evolution controversy. In Volume II, Massey intelligently argues an Egyptian origin for Biblical symbology, lexicography, and mythology. Here, he not only asks if the oldest Jewish and Christian axioms were really born on the banks of the Nile, he offers a stalwart and profound "Yes!"

British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his best-known works are in the realm of Egyptology, including *The Natural Genesis* and *Ancient Egypt: The Light of the World*.

Advances in Manufacturing, Production Management and Process Control
Macmillan

This book provides a succinct but comprehensive presentation of key geomorphological locations and topics including information about geomorphological heritage and maps to visit the most important sites. Apart from often being remarkably scenic, landscapes reveal stories that often can be traced back in time tens of million years and include unique events. This is particularly true for Ethiopia where spectacular examples of different landforms are present. Its geomorphology varies from highlands, marked by high volcanoes and incised by deep river gorges, to the rift valley lakes endorheic systems and the below sea level lowlands with characteristic landscapes which are unique in the world. *Landscapes and Landforms of Ethiopia* highlights all these topics including essential information about geology and tectonic framework, past and present climate, hydrology, geographical regions and long-term geomorphological history. It is a highly informative book, providing insight for readers with an interest in geography and geomorphology.

Putin's Asymmetric Assault on Democracy in Russia and Europe
Routledge

This book discusses the latest advances in the broadly defined field of advanced manufacturing and process control. It reports on cutting-edge strategies for sustainable production and product life cycle management, and on a variety of people-centered issues in the design, operation and management of manufacturing systems and processes. Further, it presents digital modeling systems and additive manufacturing technologies, including advanced applications for different purposes, and discusses in detail the implementation of and challenges imposed by 3D printing technologies. Based on three AHFE 2020 Conferences (the AHFE 2020 Virtual Conference on Human Aspects of Advanced Manufacturing, the AHFE 2020 Virtual Conference on Advanced Production Management and Process Control and the AHFE 2020 Virtual Conference on Additive Manufacturing, Modeling Systems and 3D Prototyping), the book merges ergonomics research, design applications, and up-to-date analyses of various engineering processes. It brings together experimental studies, theoretical methods and best practices, highlights future trends and suggests directions for further technological developments and the improved integration of technologies and humans in the manufacturing industry.

Illuminating the Dark Side: Evil, Women and the Feminine CRC Press
This product documents the process by which foodborne parasites were ranked from a global food safety perspective and provides a ranking and information on all the top ranked parasites both generally and from a regional perspective. It directly supports the establishment of international standards on foodborne parasites by the Codex Alimentarius which are

agreed by countries and can then be used as a basis for improving the safety of specific products and facilitation their trade internationally. These in turn directly contribute to the SO by promoting more efficient and inclusive trade.

Understand the Basics of Bitcoin Bitcoin is a revolutionary digital currency that is transforming money as we know it, but understanding it can be daunting for the average user. Not anymore! This book strips away the complexity and teaches the basics of Bitcoin in simple, easy to understand language. It is not a textbook. It is a non-technical primer that answers the most common and important questions new users have about Bitcoin. No jargon. No technobabble. No previous technical knowledge required. Answers you will find in this book: What is Bitcoin? What makes it special? Who controls it? Is Bitcoin secure? Is Bitcoin anonymous? How can I use it safely? Should I invest in Bitcoin? ...And More! And You won't feel like you're learning another language or getting a degree in computer science! Prerequisites: NONE! If you have ever bought anything online, you already have what it takes to understand this book and learn the basics of Bitcoin.
