*Telecommunications Law And Regulation 4th*

While authorities may claim that they want to deliver apolitical and objective regulation, the reality is that regulation is highly political. A telecom regulator is a locus for capture and politicisation where a

number of actors, whether political leaders, incumbents, entrants, or activists want to influence decisions.

Basic telecommunications service is now considered a necessity, and its inexpensive and ubiquitous provision is guaranteed by regulation.~ The fourth reason for regulation, that the regulator can help the industry achieve technical compatibility and avoid fragmentation, has had only limited application to telecommunications.

Telecommunications in the Philippines - Wikipedia  
There is no EU law mandating the retention of communications data, following the ECJ's decision in 2014 that the Data Retention Directive (2006/24/EC) was invalid.

In the UK, data retention is regulated under the Investigatory Powers Act 2016 (IPA) and includes powers for the Secretary of State to require a telecoms operator to retain relevant communications data in certain circumstances.

European Commission - Competition  
Telecommunications in the Philippines are well-developed due to the presence of modern infrastructure facilities.

The industry was deregulated in 1995 when President Fidel Ramos signed Republic Act 7925 (The Public

Telecommunications Policy Act of the Philippines).

This law opened the sector to more private players and improved the provision of telecom services are better and fairer rates.
