The Handbook of

International Futurism is the first reference work ever to presents in a comparative fashion all media and countries in which the movement, initiated by F.T.

---

Marinetti in 1909, exercised a particularly noteworthy influence. The handbook offers a synthesis of the state of scholarship regarding the international radiation of Futurism and its influence in some fifteen artistic disciplines and thirty-eight countries. While acknowledging the great achievements of the movement in the visual and literary arts of Italy and Russia, it treats Futurism as an international, multidisciplinary phenomenon that left a lasting mark on the manifold artistic manifestations of the early twentieth-century avant-garde. Hundreds of artists, who in some phase in their career absorbed Futurist ideas and stylistic devices, are presented in the context of their national traditions, their international

connections and the media in which they were predominantly active. The handbook acts as a kind of multi-disciplinary, geographical encyclopaedia of Futurism and gives scholars with varying levels of experience a detailed overview of all countries and disciplines in which the movement had a major impact.

*Behavioral Clinical Trials for Chronic Diseases Applied Therapeutics Incorporated*  
This is the first comprehensive guide to the design of behavioral randomized clinical trials (RCT) for chronic diseases. It includes the scientific foundations for behavioral trial methods, problems that have been encountered in past behavioral trials, advances in design that have evolved, and promising trends and opportunities for the future. The value of this book lies in

---

its potential to foster an ability to speak the language of medicine through the conduct of high-quality behavioral clinical trials that match the rigor commonly seen in double-blind drug trials. It is relevant for testing any treatment aimed at improving a behavioral, social, psychosocial, environmental, or policy-level risk factor for a chronic disease including, for example, obesity, sedentary behavior, adherence to treatment, psychosocial stress, food deserts, and fragmented care. Outcomes of interest are those that are of clinical significance in the treatment of chronic diseases, including standard risk factors such as cholesterol, blood pressure, and glucose, and clinical outcomes such as hospitalizations, functional limitations, excess morbidity, quality of life, and mortality. This link between behavior and chronic disease requires innovative clinical trial methods not only from the behavioral sciences but also

from medicine, epidemiology, and biostatistics. This integration does not exist in any current book, or in any training program, in either the behavioral sciences or medicine.

branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also

examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design. *Notebook* Walter de Gruyter GmbH & Co KG Devastated by the collapse of her marriage, Helen Bradshaw flees London for Achill Island on the West Coast of Ireland hoping that her new job researching painter, Grace Henry, will offer her an escape. This book is a timely insight into the internationalization of higher education institutions. The internationalization of higher education is a global phenomenon, but with substantial variation in how it is made operational in individual institutions.

Comprehensive Internationalization focuses on desirable practices in institutions and their actual approaches to implement a more

integrated, strategic, or comprehensive global engagement across their core missions: teaching, research, and service. Part I of the book investigates a wide range of issues governing the internationalization of institutions: Outlining the origins, meaning and evolution toward more strategic and comprehensive forms of internationalization; building an understanding of the meanings of comprehensive internationalization, as well as common aspirations, when linked to different types of institutions; understanding the rationales and motivations for internationalization and intended results; creating an

---

institutional vision and culture to support comprehensive internationalization; and implementing key strategies for successful internationalization in terms of practical actions and programs and results, including identifying and ameliorating barriers, engaging organizational change, assessing outcomes, and obtaining resources. Part II of the book offers case stories from institutions across the globe which describe varying pathways toward more comprehensive internationalization. Institutions were chosen to reflect the diversity of higher education and approaches to internationalization. An analysis of the

cases uncovers similarities and differences, as well as common lessons to be learned. With contributions from mainland Europe, Australia, the USA, the UK, Latin America, Singapore and South Africa, the global application of the book is unparalleled. Comprehensive Internationalization will be of vital interest to a wide variety of higher education institutional leaders and managers as they address the problems and solutions for internationalization available to them in a rapidly changing educational world and a 21st Century global environment.

A study of gambling, particularly sports gambling, and how it has thrived in American culture. According to Davies and Abram, the culture of betting results from two complementary influences in American society: risk-taking and speculation. This is the first effort by academic writers to describe and interpret the history of sports wagering in the United States. Although many books have been written about how to bet and win, <sup>4</sup> *Betting the Line* presents a serious history of

this popular activity in Colonial and Civil War eras to today, from early betting on horse racing and baseball to the modern venues of basketball and football. By considering topics as diverse as the business of a bookie, the expansion of legalized gambling, and the increase in popularity of televised sports, the authors offer readers an insightful look into a practice that has become commonplace in American popular culture. In a mere seventy years, the

---

number of states where gambling is legal jumped from one to forty-eight. Yet Nevada remains the only state where sports betting is legal. This book challenges many long-standing myths and stereotypes that revolve around the enterprise, arguing that sports gambling is reflective of the American free enterprise culture.

This volume provides a state-of-the-art treatment of research on language attrition, the non-pathological loss of a language through lack of exposure. It combines a review of past and present research with in-depth treatments of specific theoretical and methodological issues and reports on individual studies. Special prominence is given to the identification of problematic areas in attrition research, with a view to pointing out possible solutions. The book specifically addresses itself to

those who wish to acquaint themselves with the research area of language attrition, providing them with both a thorough overview of the field and a basis on which to build their own research. The combination of experience and an innovative outlook present in this collection, however, make it a valuable source for those familiar with attrition as well. Especially useful to both beginners and veterans is the extensive annotated bibliography. *Crimean Tatar* ABC-CLIO Open wide! Dentists care for people's teeth. Give readers the inside scoop on
