A study of Internet blocking and filtering around the world: analyses by leading researchers and survey results that document filtering practices in dozens of countries. Many countries around the world block or filter Internet content, denying access to information that they deem too sensitive for ordinary citizens—most often about politics, but sometimes relating to sexuality, culture, or religion. Access Denied documents and analyzes Internet filtering practices in more than three dozen countries, offering the first rigorously conducted study of an accelerating trend. Internet filtering takes place in more than three dozen states worldwide, including many countries in Asia, the Middle East, and North Africa. Related Internet content-control mechanisms are also in place in Canada, the United States and a cluster of countries in Europe. Drawing on a just-completed survey of global Internet filtering undertaken by the OpenNet Initiative (a collaboration of the Berkman Center for Internet and Society at Harvard Law School, the Citizen Lab at the University of Toronto, the Oxford Internet Institute at Oxford University, and the University of Cambridge) and relying on work by regional experts and an extensive network of researchers, Access Denied examines the political, legal, social, and cultural contexts of Internet filtering in these states from a variety of perspectives. Chapters discuss the mechanisms and politics of Internet filtering, the strengths and limitations of the technology that powers it, the relevance of international law, ethical considerations for corporations that supply states with the tools for blocking and filtering, and the implications of Internet filtering for activist communities that increasingly rely on Internet technologies for communicating their missions. Reports on Internet content regulation in forty different countries follow, with each two-page country profile outlining the types of content blocked by category and documenting key findings. Contributors Ross Anderson, Malcolm Birdling, Ronald Deibert, Robert Faris, Vesselina Haralampieva [as per Rob Faris], Steven Murdoch, Helmi Noman, John Palfrey, Rafal Rohozinski, Mary Rundle, Nart Villeneuve, Stephanie Wang, Jonathan Zittrain

Communities, Livelihoods and Natural Resources McGraw-Hill
"Considerable change has transpired in the years since the first edition of this book was published, yet the paradox remains - investments in IT-enabled business change are still not being consistently translated into business value. This is the Information Paradox - the conflict between the widely held belief that information, and investment in IT to provide that information, is a "good thing" and the all too frequent reality that we cannot demonstrate a connection between IT investments and business results." "John Thorp and Fujitsu Consulting have continued to work with many clients around the world, implementing the Benefits Realization Approach - a unique, client-tested framework that introduces a benefits-focused mindset. Their experience has led to the understanding that the issues with IT value are merely a symptom of a broader business value problem, and to the development of a new, expanded approach - Enterprise Value Management." "A completely new Afterword outlines this new approach which goes beyond the challenge of IT value to provide a comprehensive value-driven organizational governance process. It builds on the foundation of benefits realization to help organizations manage value in an increasingly uncertain and real-time business environment. It takes readers to a new level of understanding."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The Information Paradox Springer Science & Business Media

The corporation is the most complex, adaptive, and resilient model of organizing economic activity in history. In an era of globalization, the transnational corporation has significant power over society. While its rights are specified through private ordering, and choice of jurisdictional home, in the event of conflict of laws, the corporation's duties and responsibilities remain contested. Notwithstanding the argument in institutional economics that all transactions take place within governance and legal frameworks, underpinned by a 'non-calculative social contract,' the terms are notoriously difficult to define or enforce. They are made more so if regulatory dynamics preclude litigation to a judicial conclusion. This Element situates the corporation - its culture, governance, responsibility, and accountability - within a broader discourse of duty. In doing so, it addresses the problem of the corporation for society and the corporation's problem in aligning its governance to changing community expectations of obligation.

Trino: The Definitive Guide Birkhauser

It is often assumed that shareholders have rights, not duties. In recent years, however, this assumption has come under intense scrutiny in all aspects of company law and capital market law - legislation, the courts, soft law, and scholarship - and, in Europe especially, major changes are under way across a diverse spectrum all the way from revised contractual arrangements to mandatory statutory provisions. Such a shift has important implications for the fundamentals of European company law, and there is a need to examine shareholders' duties and to consider where this trend is taking shareholders and their stance in law. This focused collection of essays by twenty notable scholars addresses this complex subject from a highly informative and useful variety of perspectives. Examining shareholders' duties along three axes - types of investee companies, types of shareholders, and types of business situations - the essays deal with such topics and issues as the following: - shareholders' duties as reflections of the interests they are intended to safeguard; - shareholders' duties to society; - shareholders' disclosure

obligations; - duties of parent companies; - institutional investor's fiduciary duty; - how regulatory duties constrain value-reducing forms of opportunism; - the state's continuing duties in the transformation of state-owned companies; - significant shareholders' duties in transactions with the company; and - powerful shareholders' duty not to abuse right. Examining the implications of this shift in discourse - how shareholders' duties are coming to the fore under the impetus of legislation, legal doctrine, case law, and enforcement strategies - as well as its ideological underpinnings, this book offers a comprehensive and in-depth consideration of this rapidly developing field. It will prove of inestimable value not only to policymakers and academics, but also to investors and practitioners committed to creating conditions favourable to sustainable economic growth and responsible business behaviour.

House of Commons Debates, Official Report Cambridge University Press

This textbook is a complete rewrite, and expansion of Hugh Rollinson's highly successful 1993 book *Using Geochemical Data: Evaluation, Presentation, Interpretation*. Rollinson and Pease's new book covers the explosion in geochemical thinking over the past three decades, as new instruments and techniques have come online. It provides a comprehensive overview of how modern geochemical data are used in the understanding of geological and petrological processes. It covers major element, trace element, and radiogenic and stable isotope geochemistry. It explains the potential of many geochemical techniques, provides examples of their application, and emphasizes how to interpret the resulting data. Additional topics covered include the critical statistical analysis of geochemical data, current geochemical techniques, effective display of geochemical data, and the application of data in problem solving and identifying petrogenetic processes within a geological context. It will be invaluable for all graduate students, researchers, and professionals using geochemical techniques.

Water, Cultural Diversity, and Global Environmental Change CABI

Tall wood buildings have been at the foreground of innovative building practice in urban contexts for a number of years. From London to Stockholm, from Vancouver to Melbourne timber buildings of up to 20 storeys have been built, are under construction or being considered. This dynamic trend was enabled by developments in the material itself, prefabrication and more flexibility in fire regulations. The low CO2 footprint of wood - often regionally sourced - is another strong argument in its favour. This publication explains the typical construction types such as panel systems, frame and hybrid systems. An international selection of 13 case studies is documented in detail with many specially prepared construction drawings, demonstrating the range of the technology.

Noninvasive Mechanical Ventilation National Academies Press

Commissioned by the Department of Health and Human Services, Key Capabilities of an Electronic Health Record System provides guidance on the most significant care delivery-related capabilities of electronic health record (EHR) systems. There is a great deal of interest in both the public and private sectors in encouraging all health care providers to migrate from paper-based health records to a system that stores health information electronically and employs computer-aided decision support systems. In part, this interest is due to a growing recognition that a stronger information technology infrastructure is integral to addressing national concerns such as the need to improve the safety and the quality of health care, rising health care costs, and matters of homeland security related to the health sector. Key Capabilities of an Electronic Health Record System provides a set of basic functionalities that an EHR system must employ to promote patient safety, including detailed patient data (e.g., diagnoses, allergies, laboratory results), as well as decision-support capabilities (e.g., the ability to alert providers to potential drug-drug interactions). The book examines care delivery functions, such as database management and the use of health care data standards to better advance the safety, quality, and efficiency of health care in the United States.

Global Best Practice in Private Equity Investing Private Equity in Action takes you on a tour of the private equity investment world through a series of case studies written by INSEAD faculty and taught at the world's leading business schools. The book is an ideal complement to Mastering Private Equity and allows readers to apply core concepts to investment targets and portfolio companies in real-life settings. The 19 cases illustrate the managerial challenges and risk-reward dynamics common to private equity investment. The case studies in this book cover the full spectrum of private equity strategies, including: Carve-outs in the US semiconductor industry (LBO) Venture investing in the Indian wine industry (VC) Investing in SMEs in the Middle East Turnaround situations in both emerging and developed markets Written with leading private equity firms and their advisors and rigorously tested in INSEAD's MBA, EMBA and executive education programmes, each case makes for a compelling read. As one of the world's leading graduate business schools, INSEAD offers a global educational experience. The cases in this volume leverage its international reach, network and connections, particularly in emerging markets. Private Equity in Action is the companion to Mastering Private Equity: Transformation via Venture Capital, Minority Investments & Buyouts, a reference for students, investors, finance professionals and business owners looking to engage with private equity firms. From deal sourcing to exit, LBOs to responsible investing, operational value creation to risk management, Mastering Private Equity systematically covers all facets of the private equity life cycle.

Shareholders' Duties O'Reilly Media, Inc.

More than ever before, business leaders are responsible for teams spread across regions, countries, and the entire globe. As a result of the pandemic, they've also been increasingly challenged by managing employees working from home. Leading a remote team is a unique challenge, and many leaders struggle by relying upon the skills and approaches that served them well when leading immediate, onsite teams. Leading Remotely features practical examples and insights from leaders across the globe, and draws upon over 15 years of empirical research to provide essential advice on how to successfully lead remote teams. This is a ground-breaking guide on how to overcome the unique obstacles faced when leading a remote team, featuring key insights and advice drawn from experiences of leadership throughout the pandemic.

Co-published with UNESCO A product of the UNESCO-IHP project on Water and Cultural Diversity, this book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.

Transit-oriented development (TOD) seeks to maximize access to mass transit and nonmotorized transportation with centrally located rail or bus stations surrounded by relatively high-density commercial and residential development. New Urbanists and smart growth proponents have embraced the concept and interest in TOD is growing, both in the United States and around the world. New Transit Town brings together leading experts in planning, transportation, and sustainable design—including Scott Bernstein, Peter Calthorpe, Jim Daisa, Sharon Feigon, Ellen Greenberg, David Hoyt, Dennis Leach, and Shelley Poticha—to examine the first generation of TOD projects and derive lessons for the next generation. It offers topic chapters that provide detailed discussion of key issues along with case studies that present an in-depth look at specific projects. Topics examined include: the history of projects and the appeal of this form of development a taxonomy of TOD projects appropriate for different contexts and scales the planning, policy and regulatory framework of "successful" projects obstacles to financing and strategies for overcoming those obstacles issues surrounding traffic and parking the roles of all the actors involved and the resources available to them performance measures that can be used to evaluate outcomes Case Studies include Arlington, Virginia (Roslyn-Ballston corridor); Dallas (Mockingbird Station and Addison Circle); historic transit-oriented neighborhoods in Chicago; Atlanta (Lindbergh Center and BellSouth); San Jose (Ohlone-Chynoweth); and San Diego (Barrio Logan). New Transit Town explores the key challenges to transit-oriented development, examines the lessons learned from the first generation of projects, and uses a systematic examination and analysis of a broad spectrum of projects to set standards for the next generation. It is a vital new source of information for anyone interested in urban and regional planning and development, including planners, developers, community groups, transit agency staff, and finance professionals.

The emergence of COVID-19 has raised urgent and important questions about the role of Canadian intelligence and national security within a global health crisis. Some argue that the effects of COVID-19 on Canada represent an intelligence failure, or a failure of early warning. Others argue that the role of intelligence and national security in matters of health is—and should remain—limited. At the same time, traditional security threats have rapidly evolved, themselves impacted and influenced by the global pandemic. Stress Tested brings together leading experts to examine the role of Canada's national security and intelligence community in anticipating, responding to, and managing a global public welfare emergency. This interdisciplinary collection offers a clear-eyed view of successes, failures, and lessons learned in Canada's pandemic response. Addressing topics including supply chain disruptions, infrastructure security, the ethics of surveillance within the context of pandemic response, the threats and potential threats of digital misinformation and fringe beliefs, and the challenges of maintaining security and intelligence operations during an ongoing pandemic, Stress Tested is essential reading for anyone interested in the lasting impacts of the COVID-19 pandemic.
