This report assesses the effect of sharing installations and environment geospatial data assets across the Department of Defense Global Information Grid. The authors found that the assets support a wide range of missions from installation management to warfighting support. The authors also identified barriers to sharing, recommended ways to maximize the sharing benefits, and developed a methodology for assessing the effects of sharing.

This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign

and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released the redacted report one month later.

NOW AVAILABLE! On Point II is a comprehensive study of the US Army in Operation IRAQI FREEDOM (OIF) from May 2003 to January 2005. Based on primary sources including hundreds of interviews with participants, the study examines how after May 2003 American Soldiers made the transition to a new type of campaign that featured information operations, intelligence, reconstruction, and governance rather than conventional combat. On Point II documents the US Army's execution of Full Spectrum Operations in the early stages of this conflict.

Sport Facility Operations Management Rand Corporation
This practical, instructional guide serves both as a learning resource for the novice camp director and as a quick reference for the more experienced director. Covering 14 topics of study identified by the American Camping Association as core areas of knowledge for camping professionals, this book includes discussions of leadership, participation, program design, risk management, finances, marketing, site and facilities, and strategic planning. Interpretive charts, tables, and graphics illustrate both the basics and the nuances of camp administration. Each topic is

followed by a series of checkpoints dock. Additionally, the and questions pertinent to the regulation identifies DOD previous discussion to be used as a 7000.14-R as the source of meal tool for further review. rates for reimbursement purposes; delegates the approval authority for catered meals and host nation meals from Headquarters, Department of the Army to the Army commands; and authorizes the use of the Government purchase card for subsistence purchases when in the best interest of the Government. This regulation allows prime vendors as the source of garrison supply and pricing and provides garrison menu standards in accordance with The Surgeon General's

The Budget of the United States Government CreateSpace
This regulation encompasses garrison, field, and subsistence supply operations. Specifically, this regulation comprises Army Staff and major Army command responsibilities and includes responsibilities for the Installation Management Command and subordinate regions. It also establishes policy for the adoption of an à la carte dining facility and for watercraft to provide subsistence when underway or in

nutrition standards for feeding military personnel. Also, included is guidance for the implementation of the U.S. Department of Agriculture Food Recovery Program.

On Point is a study of Operation IRAQI FREEDOM (OIF) as soon after the fact as feasible. The Army leadership chartered this effort in a message to the major commands on 30 April 2003. In his guidance, Army Chief of Staff General Eric K. Shinseki directed "a quick, thorough

review that looks at the US Army's performance, assesses the role it played in the joint and coalition team, and captures the strategic, operational, and tactical lessons that should be disseminated and applied in future fights." For those of us in the Operation IRAQI FREEDOM Study Group (OIF-SG), this translated into three separate products. A "quick look" lessons-learned briefing produced in July, less than 30 days after returning from the theater. On Point-this work-is the second product and was

largely completed by mid-August 2003. Finally, the most significant product is the archive of 119,000 documents, some 2,300 interviews and 69,000 photos archived with the support and assistance of the Combined Arms Research Library at Fort Leavenworth, Kansas.

Making Summer Count John
Wiley & Sons

Organizational change and innovation are central and enduring issues in management theory and practice. Dramatic changes in population demographics, technology, competitive survival, and social, economic, and environmental health and sustainability concerns means the need to understand how organizations respond to these shifts through change and innovation has never been greater. Why and what

organizations change is generally well known; how organizations change is therefore the central focus of this Handbook. It focuses on processes of change – or the sequence of events in which organizational characteristics and activities change and develop over time – and the factors that influence these processes, with the organization as the central unit of analysis. Across the diverse and wide-ranging contributions, three central questions evolve: what is the nature of change and process?;

what are the key concepts and models for understanding organization change and innovation?; and how should we study change and innovation? This Handbook presents critical evolving scholarship from leading experts across a range of disciplines, and explores its implications for future research and practice. On Point Farrar, Straus and Giroux

When science's "black boxes" are pried open, its workings become accessible. Like time-travellers into history but grounded in today's cultures, learners interact directly with authentic instruments and replicas. Chapters describe educational experiences sparked through collaborations interrelating museum, school and university.

Lockdown America BRILL

Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has

shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in

long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

Quartermaster Professional Bulletin

From the Foreword: The following account represents a significant look at a half century of U.S. Marine Corps effort in the Sierra Nevada mountain range of California. This has been and is still the location of the Corps cold weather and mountain training facility. Over time the needs and demands for Marines and units prepared to operate under these conditions waxed and waned with the real world requirements of deployed forces. This was

reflected in the realities of conflicts in the Korean Peninsula, the Cold War's northern and southern flanks, and in the current Global War in Terrorism fight in Afghanistan and elsewhere. While the future is often uncertain, this firm look at the past is useful to show how previous challenges have prompted creative and innovative responses. This is as much a story of evolution as an institution.--p. iii.

Emergency Medical Services (EMS) agencies regardless of service delivery model have sought guidance on how to better integrate their emergency preparedness and response activities into similar processes

occurring at the local, regional,
State, tribal, and Federal levels.
This primary purpose of this
