wielded an immense power for good and evil throughout the history of the human race. Here is a thoughtful and probing discussion of sixteen of the most important works of all time which influenced history, economics, culture, civilization, and scientific thought from the Renaissance to the present day. Such widely different, but immensely powerful books as Hitler's *Mein Kampf*, which foreshadowed the death and destruction of World War II, Harvey's famous volume on blood circulation which revolutionized medical theory and treatment, Einstein's theories on relativity which opened the atomic age are clearly described in this provocative and readable volume. Dr. Downs, former President of the American Library Association and head of the University of Illinois Library, also shows the widespread and decisive influence of other great works, including Newton's presentation of his discovery of the laws of gravity, a cornerstone in scientific theory today, Darwin's *Origin of Species* which many churchmen thought contradicted the Bible, Harriet Beecher Stowe's *Uncle Tom's Cabin* which is considered one of the major causes of the American Civil War, and Freud's *Interpretation of Dreams*, the great volume from the man who revolutionized modern man's thoughts about himself. Altogether, here is a fascinating presentation of books from many times which shows the tremendous power of the printed word on human development.

This lively chronicle of the years 1847 – 1947—the century when the Jewish people changed how we see the world—is “ [a] thrilling and tragic history...especially good on the ironies and chain-reaction intimacies that make a people and a past ” (The Wall Street Journal). In a hundred-year period, a handful of men and women changed the world. Many of them are well known—Marx, Freud, Proust, Einstein, Kafka. Others have vanished from collective memory despite their enduring importance in our daily lives. Without Karl Landsteiner, for instance, there would be no blood transfusions or major surgery. Without Paul Ehrlich, no chemotherapy. Without Siegfried Marcus, no motor car. Without Rosalind Franklin, genetic science would look very different. Without Fritz Haber, there would not be enough food to sustain life on earth. What do these visionaries have in common? They all had Jewish origins. They all had a gift for thinking in wholly original, even earth-shattering ways. In 1847, the Jewish people made up less than 0.25% of the world's population, and yet they saw what others could not. How? Why?

Norman Lebrecht has devoted half of his life to pondering and researching the mindset of the Jewish intellectuals, writers, scientists, and thinkers who turned the tides of history and shaped the world today as we know it. In *Genius & Anxiety*, Lebrecht begins with the Communist Manifesto in 1847 and ends in 1947, when Israel was founded. This robust, magnificent, beautifully designed volume is “ an urgent and moving history ” (The Spectator, UK) and a celebration of Jewish genius and contribution.

Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

upheaval or natural catastrophe. But throughout history there have been moments of vital importance that have taken place not on the battlefield, or in the palaces of power, or even in the violence of nature, but between the pages of a book. In our digitised age of instant information it is easy to underestimate the power of the printed word. In his fascinating book, Melvyn Bragg presents a vivid reminder of the book as agent of social, political and personal revolution. *12 Books that Changed the World* presents a rich variety of human endeavour and a great diversity of characters. There are also surprises. The Bishops of Rome have been Christianity's most powerful leaders for nearly two millennia,

and their influence has extended far beyond the purely spiritual. The popes have played a central role in the history of Europe and the wider world, not only shouldering the spiritual burdens of their ancient office, but also in contending with - and sometimes precipitating - the cultural and political crises of their times. In an acclaimed series of BBC radio broadcasts Eamon Duffy explored the impact of ten popes he judged to be among 'the most influential in history'. With this book, readers may now also enjoy Duffy's portraits of ten exceptional men who shook the world. The book begins with St Peter, the Rock upon whom the Catholic Church was built, and follows with Leo the Great (fifth century), Gregory the Great (sixth century), Gregory VII (eleventh century), Innocent III (thirteenth century), Paul III (sixteenth century), and Pius IX (nineteenth century). Among twentieth-century popes, Duffy examines the lives and contributions of Pius XII, who was elected on the eve of the Second World War, the kindly John XXIII, who captured the world's imagination, and John Paul II, the first non-Italian pope in 450 years. Each of these ten extraordinary individuals, Duffy shows, shaped their own worlds, and in the process, helped to create ours. *Ten Explorers who Changed the World* Random House

Featuring a new chapter on ten restaurants changing America today, a "fascinating . . . sweep through centuries of food culture" (Washington Post). Combining an historian's rigor with a food

enthusiast's palate, Paul Freedman's seminal and highly entertaining *Ten Restaurants That Changed America* reveals how the history of our restaurants reflects nothing less than the history of America itself. Whether charting the rise of our love affair with Chinese food through San Francisco's fabled Mandarin; evoking the poignant nostalgia of Howard Johnson's, the beloved roadside chain that foreshadowed the pandemic of McDonald's; or chronicling the convivial lunchtime crowd at Schrafft's, the first dining establishment to cater to women's tastes, Freedman uses each restaurant to reveal a wider story of race and class, immigration and assimilation.

"As much about the contradictions and contrasts in this country as it is about its places to eat" (The New Yorker), *Ten Restaurants That Changed America* is a "must-read" (Eater) that proves "essential for anyone who cares about where they go to dinner" (Wall Street Journal Magazine).
