Documentation to Harness the Power of Teradata

Basic Teradata Query (BTEQ) software is a general-purpose, command-based program that allows users on a workstation or mainframe to communicate with one or more Teradata Database systems and to format reports for both print and screen output. Using BTEQ you can submit SQL queries to the Teradata Database. Teradata Developer | Teradata

Being a long-time devotee of all things Microsoft SQL Server, I had quite a bit of learning to do to get up to speed on our new Teradata appliance. This guide attempts to distill some of what I have learned. I will primarily focus on what I have found most lacking: examples of how to convert SQL Server T-SQL to Teradata SQL. This guide will use the vendor-supplied sample databases: SQL Server ...
