Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

In Swim Speed Secrets, 4-time Olympian, gold medalist, and triathlon world champion Sheila Taormina reveals the swim technique used by the world's fastest swimmers. Over the course of 4 Olympic Games and throughout her career as a world champion triathlete, Taormina refined her exceptional technique as a student of the sport, studying the world's best swimmers using underwater photographs and video analysis. From Johnny Weissmuller to Michael Phelps, the world's fastest swimmers share two common elements: high stroke rate and a high-elbow underwater pull. Many swimmers and triathletes neglect the underwater pull, distracted by stroke count or perfecting less critical details like body position, streamlining, and roll. Swim Speed Secrets focuses on producing power—the most crucial element of swimming—to help triathletes and swimmers overhaul their swim stroke and find the speed that's been eluding them. With a commonsense approach that comes from decades of practice and years of hands-on coaching experience, Taormina shows swimmers how to transition to faster swimming. Swim Speed Secrets includes: The best drills to cultivate a more sensitive feel for the water Dryland and strength building exercises to develop arm position and upper body musculature Crisp photos of Olympic swimmers and variations in their high-elbow underwater pull Clear descriptions of the key moments of the underwater pull Tips that helped her perform at a world-class level for two decades Sheila Taormina's Swim Speed Secrets brings the focus back where it belongs—to a powerful underwater stroke. With this approach, triathletes and swimmers can stop swimming for survival and break through to new levels of speed and confidence in the water.

**\*\*Named One of the New York Post's Best New Books to Read \*\*** FIRE IN THE STRAW is the witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter, to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press..

Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life.

Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. Fire in the Straw is a love story, a confessional, and a beautiful big-hearted memoir.

Ever since humans became self-aware, we have struggled to find the meaning of life. The price we paid for becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they

attempt to answer some of the most profound questions related to existence. Does evolution end with human beings or is there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind? Centuries later a young boy promises his mother that he will always uphold the love that she has taught him. It is a promise that drowns him in the nectar of the gods. Krish grows up to be an engineer and joins a team of scientists as they try to create artificial consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest question yet: when does intelligence transcend to become consciousness?
