WRITING FOR PSYCHOLOGY, Fourth Edition offers concise assistance for students writing their research analyses using APA style. By providing concrete examples of common errors, the authors show rather than merely tell students what to do and what to avoid. This manual will help students adhere to the basics of APA style; refine

critical thinking skills, library search skills, revising skills, editing skills, and proofing skills; and avoid plagiarism. Checklists precede a summary at the end of every chapter, giving students the chance to make sure they have been thorough in their reports. David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but

engaging way, always backing up observations with facts and figures.

Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language. Introduction to Academic Writing Oxford University Press, USA

The book will help students master the standard organizational patterns for paragraphs and essays. The text's approach integrates the study of rhetorical patterns and the writing process with

extensive practice in grammar, mechanics, and sentence structure.

Pm286 SAGE Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the

<p>typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness</p>	<p>of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.  The visionary author's masterpiece pulls us—along with her Black female hero—through time to face the horrors of slavery and explore the impacts of racism, sexism, and white supremacy then and now. Dana, a modern black woman, is celebrating her twenty-sixth birthday with her new husband when she is snatched abruptly from her home in California and transported to the antebellum South. Rufus, the white son of a plantation owner, is drowning, and Dana has been summoned to save him. Dana is drawn back repeatedly through time to the slave quarters, and each time the stay grows longer, more arduous, and more dangerous until it is uncertain whether or not Dana's life will end, long before it has a chance to begin.
