## Outbreak Penguin

In this electrifying medical thriller from New York Times bestselling author Robin Cook, a family's exposure to a rare yet deadly virus ensnares them in a growing danger to mankind—and pulls back the curtain on a healthcare system powered by profit and greed. Trying to find some normalcy during the Covid-19 pandemic, Brian Murphy and his family are on a summer excursion in Cape Cod when his wife, Emma, comes down with concerning flu-like symptoms. But their leisurely return home to New York City quickly becomes a race to the local hospital as she suddenly begins seizing in the

car. At the ICU, she is diagnosed with eastern equine encephalitis, a rare and highly lethal mosquito-borne viral disease seemingly caught during one of their evening cookouts. Complicating the situation further, Brian and Emma's young daughter then begins to exhibit alarming physical and behavioral symptoms, too. Emma's harrowing hospital stay becomes even more fraught when Brian receives a staggering hospital bill full of outrageous charges and murky language. To add insult to injury, his health insurance company refuses to cover any of the cost, citing dubious clauses in Brian's policy. Forced to choose between the ongoing care of family and bills he can never pay, and furious at a shockingly indifferent healthcare system, Brian vows to seek justice. But to get to the bottom of the predatory practices targeting his loved ones and countless

others, he must uncover the dark side of an industry that has strayed drastically from its altruistic roots—and bring down the callous executives preying on the sick and defenseless before the virus can claim even more people . . .

A lavishly funded, security-conscious nanotechnology institute in the foothills of the Rockies, Nano is ahead

---

of the curve in the competitive world of molecular manufacturing, including the construction of microbivores, tiny nanorobots with the ability to gobble up viruses and bacteria. But when Pia Grazdani takes a job there, she's shocked by the secretive corporate culture. She's warned by her boss not to investigate the other work being done at the gigantic facility, nor to ask questions about the source of the seemingly endless capital that funds the institute's research. And when Pia encounters a fellow employee on a corporate jogging path suffering the effects of a seizure, she soon realizes she may have literally stumbled upon Nano's human guinea pigs. Is the tech giant on the cusp of one of the biggest medical discoveries of the twenty-first century—a treatment option for millions—or have they already sold out to the highest bidder?

### **Fever G.P. Putnam's Sons**

With her son's illness in complete remission, New York City medical examiner Laurie Montgomery returns to

work—and finds her first case back to be a dangerous puzzle of the highest order, involving organized crime and two start-up biotech companies caught in a zero-sum game...

**The Terminal List** Terminal Pia Grazdani is an exceptional yet aloof medical student working closely with Columbia University Medical Center's premier scientist on cutting edge research that could revolutionize health care by creating replacement organs for critically ill patients. But when tragedy strikes in the lab, Pia, with the help of classmate George Wilson, launches an investigation into the unforeseen calamity in the hospital's supposedly secure biosafety lab. Meanwhile, two ex-Wall Street whiz-kids think they've found another loadstone in the nation's multi-trillion dollar life insurance industry, and race to find ways to control actuarial data and securitize the policies of the aged and infirm to make another killing. As Pia and George dig deeper into the events at the lab, one question remains unanswered: is someone attempting to manipulate private insurance information to allow investors to benefit from the deaths of others?

***Coma*** Penguin

In a novel as timely as it is terrifying, New York Times bestselling author Robin Cook explores the controversial clash of politics and biotechnology. When Dr. Daniel Lowell and his partner, Dr. Stephanie D'Agostino, discover a new cloning procedure that utilizes stem cells to treat otherwise incurable and degenerative diseases, they know they've hit the medical jackpot. But with their cutting-edge method pending approval, they run into a roadblock by the name of Senator Ashley Butler, who views their technique as an attack on traditional American values. Then Butler is diagnosed with rapidly progressing Parkinson's disease, and he must make a Faustian pact with the very doctors whose groundbreaking technology he is trying to destroy: treatment in exchange for unwavering support. But the DNA transference procedure has never been tested before, and working under less than favorable conditions to keep the premature trial under wraps, the doctors place their careers—and their patient's life—at risk, all in the name of scientific progress. Once they hit the point

---

of no return, they feel invincible, but when Butler starts experiencing violent, horrifying seizures, they realize their luck may have run out...

An ancestry database holds the key to catching a killer in this explosive medical thriller from New York Times-bestselling author Robin Cook. When the body of social worker Kera Jacobsen shows up on Chief New York City Medical Examiner Laurie

Montgomery's autopsy table, it appears she was the victim of a drug overdose. But for Laurie and her new pathology resident, the brilliant Dr. Aria Nichols, little things aren't adding up. Kera's family and friends swear she never touched drugs. Administrators from the hospital where Kera worked insist the case be shrouded in silence. And although Kera was ten weeks pregnant, nobody knows who the father was--or what he might now about Kera's final moments alive. With Laurie temporarily sidelined by a medical emergency, impulsive Aria turns to a controversial new technique: collaborating with experts at a start-up ancestry website to trace the fetus's DNA in the hopes of identifying the mystery father. But when Kera's fellow social worker is murdered, it becomes clear that someone doesn't want Kera's secrets to come to light . . . and if Aria gets any

nearer to the truth, she and Laurie might find themselves a killer's next targets.

Coma—reimagined for the twenty-first century from the undisputed king of medical thrillers. Lynn Peirce, a fourth-year medical student at South Carolina's Mason-Dixon University, thinks she has her life figured out. But when her otherwise healthy boyfriend, Carl, enters the hospital for routine surgery,

---

her neatly ordered life is thrown into total chaos. Carl fails to return to consciousness after the procedure, and an MRI confirms brain death. Devastated by Carl's condition, Lynn searches for answers. Convinced there's more to the story than what the authorities are willing to reveal, Lynn uses all her resources at Mason-Dixon—including her initially reluctant lab partner, Michael Pender—to hunt down evidence of medical error or malpractice. What she uncovers, however, is far more disturbing. Hospitals associated with Middleton Healthcare, including the Mason-Dixon Medical Center, have unnervingly high rates of unexplained anesthetic complications and patients contracting serious and terminal illness in the wake of routine hospital admissions. When Lynn and Michael begin to receive death threats, they know they're into something bigger than either of them anticipated. They soon enter a desperate race against time for answers before shadowy forces behind Middleton Healthcare and their partner, Sidereal Pharmaceuticals, can put a stop to their efforts once and for all.
