In addition, it examines the representation of visible spaces in the texts in terms of their attribution with womb-like qualities. The framing of the study historically within the postwar era begins with a discussion of Eero Saarinen's Womb Chair in the context of the Cold War's need for safety

in light of the threat of nuclear destruction, and ranges over films such as Marguerite Duras' and Alan Resnais' Hiroshima mon amour and Duras' novel The Vice-Consul, exploring the ways that such cultural texts fantasize the womb as a response to trauma, defined as the

compulsive need to return to the site of loss, a place envisioned as both a secure space and a prison. The womb fantasy is linked to the desire to recreate an identity that is new and original but ahistorical. Lore Grand Central Pub

But it ’ s not to reunite with his family, it ’ s to bury them—victims in a mass murder/suicide. Even though Bolan ’ s own father pulled the trigger, he knows the old man was no killer. He was driven to madness by Mafia thugs who have turned his idyllic hometown into a new kind of war zone.

Three Gold Star women, linked forever by unimaginable loss, share their inspiring, unlikely journey that began on the worst day of their lives. What happens when tragedy knocks on your front door?

For us, it was a literal knock, with two men standing in crisply pressed uniforms. They had news. News that gutted us to the core -- the death of our loved ones, a brother and two husbands -- in combat zones. The thing about those moments is that it's almost inconceivable that they can happen to you. That is, until they do. This book is for anyone who has ever received a knock at the door. And if you live long enough and have the courage to love others, you will. Maybe it's a cancer diagnosis. Maybe it's the death of your best friend. The

betrayal of a spouse. The loss of a child. The implosion of a professional career. Or any tragedy that takes the person we love the most away from us too soon. Life is not without its challenges. The key is how you respond. This is our story. The story of three women, bonded by grief and purpose. Grief because we lost our best friends in war. Purpose because we resolved -- together -- to do something about it. To turn loss into inspiration for others and to channel the love that we had for the men in our lives into love for others through service. It was the only way we could

escape the trap of despair and inaction, and we believe it offers a roadmap for anyone else who has ever had to answer a knock at the door. **Rollback** Harvard University Press ?“Take my word for it, James Reece is one rowdy motherf***er. The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space.

Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors,

including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design

standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In

the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily

understood through a series of charts and situation drawings. *With Human Dimension and Interior Space*, these standards are now accessible to all designers of interior environments. *In the Blood* Vintage An Atria Book. Marriage of Opposites, Alice Hoffman is also a cancer survivor. In *Survival Lessons*, she shares her transformative journey, showing us how to re-envision our own lives and relationships with our friends and family, and the significance of the everyday choices we make. Sorrow and joy are both part of the human experience, and the beauty of the world is easy to overlook during periods of crisis, illness, or loss. Here, Hoffman offers wit, wisdom, and comfort in “an optimistic instruction manual [for] anyone struggling with self-care in a time of trouble” (Story Circle Book Reviews). “In this gem of a book, Alice Hoffman

How can we prevent a new pandemic from killing millions of people and devastating the global economy? Can we even hope to accomplish this?* Bill Gates believes

the answer is yes, and in this book he lays out clearly and convincingly what the world should have learned from COVID-19 and what all of us can do to ward off another disaster like it. Relying on the shared knowledge of the world’s foremost experts and on his own experience of combating fatal diseases through the Gates Foundation, he first helps us understand the science of infectious diseases. Then he shows us how the nations of the world, working in conjunction with one another and with the private sector, can not only

ward off another COVID-like catastrophe but also eliminate all respiratory diseases, including the flu. Here is a clarion call—strong, comprehensive, and of the gravest importance—from one of our greatest and most effective thinkers and activists.

With The Voices of Babyn Yar—a collection of stirring poems by Marianna Kiyanoska—the award-winning Ukrainian poet honors the victims of the Holocaust by writing their stories of horror, death, and survival by

projecting their own imagined voices. Artful and carefully intoned, the poems convey the experiences of ordinary civilians going through unbearable events leading to the massacre at Kyiv’s Babyn Yar from a first-person perspective to an effect that is simultaneously immersive and estranging. While conceived as a tribute to the fallen, the book raises difficult questions about memory, responsibility, and commemoration of those who had witnessed an evil that verges on the unspeakable.

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED

ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir

At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a

patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present?

What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When *Breath Becomes Air* is an unforgettable, life-longer a ladder toward affirming reflection on the challenge of facing death and on the relationship

between doctor and patient, from a brilliant writer who became both.
