## **Teaching in the Community Junior College** Writing in the Content Areas

This book is for anyone interested or involved in teaching, training, or instructing, whether you are just getting into the field or thinking about it or you have been teaching for decades. It is for those who administer teaching, training, or instructing. The book was written for academics and those who teach in academies and other professional adult learning environments. The book's contents are applicable to all types of colleges, be they community colleges, four-year colleges, or universities, both private and public, for-profit or nonprofit. Most professional practitioner-type instructors go through some sort of instructor school, teachers earn degrees in teaching, but many who teach or instruct are never trained or taught how to teach or train. Few professors are taught how to teach. They have been taught, so this is where they often draw their own teaching styles. Regardless of where you teach, train, or instruct, this book and its contents are for you. The book goes into great detail regarding face-to-face classes as well as online and other delivery methods. The lessons found in this book can be applied to new students, undergraduate, or graduate students. The lessons apply equally to basic, in-service, and specialized training. My hope is that no matter how great of an instructor you are, you will find many new nuggets of information that will add to your teaching toolbox. One of my goals in life is to leave a positive lasting impact. I want to help students and other instructors recognize and reach their full potential. I want you to be the best instructor you can be. I strongly believe we impact people all the time whether we know it or not. You can and will make a big difference in your students' lives.

This practical guide is designed to help college teachers plan their undergraduate courses and deliver high-quality instruction. The book's theme is that teaching is a creative, decision-making, idea-testing enterprise whose purpose is to facilitate student learning in all of its facets. Its goal is to help instructors understand the multiple kinds of

learning taking place in their courses so that they can select, devise, evaluate, and modify teaching techniques to improve their effectiveness. Based on research on human learning, memory, thinking, and problem solving, as well as studies of teaching and less-formal reports of teaching practices, the book offers concrete advice about all aspects of college teaching. \*Part I is devoted to course planning. It outlines the many decisions instructors face in defining a course as their own and discusses the larger issues that shape a course and constrain some specific choices. Selecting course content, choosing learning goals, deciding how to pace a course, and scheduling tests are some of these issues. A workable timetable for preparing a course is included. \*Part II is a mini-course on human learning, memory, and thinking. It provides the conceptual foundation for making teaching decisions, for selecting instructional strategies, and especially for inventing new techniques that might particularly fit a specific course. \*Part III deals with the "nitty-gritty" of college teaching, including how to choose a textbook; lecturing and conducting classroom discussions; types and purposes of writing assignments, and how to structure and evaluate them; dealing with plagiarism; strengths and weaknesses of different types of tests, the relation of tests to learning goals, and guidelines for constructing good tests; and grading systems. \*Part IV addresses professional and ethical issues of importance and consequence to instructors. New college instructors, more experienced faculty who would like to reflect on their teaching practices and consider making some changes, and teaching assistants will all find this book relevant and useful.

Teaching large classes is a fact of life for professors at many institutions. In addition to pedagogy, instructors of these courses must also be concerned with legal, ethical, financial, technological, personnel, and management issues. Virtually all introductory courses are large ones, as are the popular intermediate courses at large institutions. Typically, little or no training or instruction is provided to new professors about how to manage large classes successfully. This book is a valuable resource for any college teacher, adjunct or full-time, facing a large class. It will also be useful for college administrators who might want to issue it to teachers, especially adjuncts, assigned to large classes for the first time. A distillation of years of experience by the author?who started his college teaching career in 1969?in teaching large classes and in coaching other professors to do the same, this guide is concise and user-friendly. It employs teaching-as-acting as a common theme, with many practical examples covering all of the major aspects of organizing, managing, and teaching a large lecture course in any field. In *The Poetry of Disturbance*, David Bergman argues that post-war poetry underwent a significant if subtle shift in emphasis, moving from the modernist concern with the poem as a visual text to one that was chiefly oral in nature. The resulting change was disturbing, especially for those brought up on the principles of high modernism. This new stress on orality implied a shift in the economy of the poem, away from the austerity of language advocated by Pound and Eliot to a style that conveyed freedom, expansiveness, and an innovative directness.

Using a unique developmental focus, this clinical handbook provides college counseling professionals and trainees with strategies for addressing the most pressing and frequently encountered issues presented by college students. These problems are considered from the perspective of biological, psychological, and social development and include issues faced by the student population according to both college year (freshman, senior, etc.) and the academic calendar, such as spring and winter breaks and exam periods. The text also addresses the particular needs of non-traditional students and the impact of cultural identity on the way in which a disorder manifests or is best treated. The only text to focus on both the developmental and clinical concerns of contemporary college students, it provides detailed information on such prevalent presenting issues as major depressive disorder, anxiety, substance abuse and addiction, eating disorders, grief, self-injury, social adjustment concerns, and intimate relationships. The text examines how a disorder usually presents and manifests in college students, addressing the role of gender, cultural identity, and age. It provides best practice treatment strategies that take into account the time-limited nature of treatment in most college counseling centers, and discusses the use of individual and group counseling. The text also addresses such issues as crisis management, teaming up with faculty and staff to develop preventive care programming, and developing alliances with parents. Case studies and descriptions of symptom presentation are derived from composites of students treated by the authors. *College Student Clinical Mental Health Counseling* will be useful as
