Building Academic Language through Content-Area Text: Strategies to Support ELLs Edinburgh University Press

Written for Higher Education educators, managers and policy-makers, *Plagiarism, the Internet and Student Learning* combines theoretical understandings with a practical model of plagiarism and aims to explain why and how plagiarism developed. It offers a new way to conceptualize plagiarism and provides a framework for professionals dealing with plagiarism in higher education. Sutherland-Smith presents a model of plagiarism, called the plagiarism continuum, which usefully informs discussion and direction of plagiarism management in most educational settings. The model was developed from a cross-disciplinary examination of plagiarism with a particular focus on understanding how educators and students perceive and respond to issues of plagiarism. The evolution of plagiarism, from its birth in Law, to a global issue, poses challenges to international educators in diverse cultural settings. The case studies included are the voices of educators and students discussing the complexity of plagiarism in policy and practice, as well as the tensions between institutional and individual responses. A review of international studies plus qualitative empirical research on plagiarism, conducted in Australia between 2004-2006, explain why it has emerged as a major issue. The book examines current teaching approaches in light of issues surrounding plagiarism, particularly Internet plagiarism. The model affords insight into ways in which teaching and learning approaches can be enhanced to cope with the ever-changing face of plagiarism. This book challenges Higher Education educators, managers and policy-makers to examine their own beliefs and practices in managing the phenomenon of plagiarism in academic writing.

A concise introduction to the field of theoretical pragmatics and its applications in second language acquisition and English-language instruction *Pragmatics and its Applications to TESOL and SLA* offers an in-depth description of key areas of linguistic pragmatics and a review of how those topics can be applied to pedagogy in the fields of second language acquisition (SLA) and teaching English to speakers of other languages (TESOL). This book is an excellent resource for students and professionals who have an interest in teaching pragmatics (speech acts, the cooperative principle, deixis, politeness theory, and more) in second language contexts. This book introduces technical terminology and concepts—including the fundamentals of semantics and semiotics—in simple language, and it provides illuminating examples, making it an excellent choice for readers with an elementary linguistics background who wish to further their knowledge of pragmatics. It also covers more advanced pragmatics topics, including stance, indexicality, and pragmatic appropriateness. Key features include: A comprehensive introduction to pragmatics, covering meaning, speech acts, the cooperation principle, politeness, metapragmatics, and more A unique orientation toward practical application in second language acquisition studies and English-language instruction Two-part chapters clearly separating theoretical introductions from concrete, real-world applications of the theory Thorough coverage that is accessible to both students and professionals currently teaching English to speakers of other languages, including sample lesson plans Practical chapters on the interface between pragmatics and teaching, and on research design *Pragmatics and its Applications to TESOL and SLA* is a comprehensive and coherent introduction, perfect for students, researchers, and scholars of pragmatics, second language acquisition, language teaching, and intercultural communication. It is also an excellent resource for professionals in the field of English-language education.

To respond to the multilingual turn in language education, this volume constitutes a challenge to the traditional, monolingual, and native speakerism paradigm in the field of Teaching English to Speakers of Other Languages (TESOL) through a translanguaging lens. The chapters offer complex global perspectives – with contributions from five continents – to open critical conversations on how to conceptualize and implement translanguaging in teacher education and classrooms of various contexts. The researchers exhibit a shared commitment to transforming TESOL profession that values teachers' and learners' full linguistic repertoires. This volume should prove a valuable resource for students, teachers, and researchers interested in English teaching and learning, applied linguistics, second language acquisition, and social justice.

Language in Context in TESOL Multilingual Matters

With a new Foreword by April Baker-Bell and a new Preface by Vershawn Ashanti Young and Y'Shanda Young-Rivera, *Other People's English: Code-Meshing, Code-Switching, and African American Literacy* presents an empirically grounded argument for a new approach to teaching writing to diverse students in the English language arts classroom. Responding to advocates of the "code-switching" approach, four uniquely qualified authors make the case for "code-meshing"—allowing students to use standard English, African American English, and other Englishes in formal academic writing and classroom discussions. This practical resource translates theory into a concrete road map for pre- and inservice teachers who wish to use code-meshing in the classroom to extend students' abilities as writers and thinkers and

to foster inclusiveness and creativity. The text provides activities and examples from middle and high school as well as college and addresses the question of how to advocate for code-meshing with skeptical administrators, parents, and students. Other People's English provides a rationale for the social and educational value of code-meshing, including answers to frequently asked questions about language variation. It also includes teaching tips and action plans for professional development workshops that address cultural prejudices.
