Building Academic Language through Content-Area Text: Strategies to Support ELLs Teacher Created Materials

The democratization of schooling and greater access to higher education, together with the implementation of language requirements in colleges and universities across the United States, has led to a higher degree of diversity in language classrooms. One usually thinks of gender, ethnic, racial, or social diversity, but individual differences, including learning disabilities and special needs, also contribute to diversity and have an impact on assessment, placement, and curriculum. In their role as administrators and teacher educators, Language Program Directors (LPDs) seek to integrate current practices and research in applied linguistics into program design and administration, including assessment. To make individual differences a theoretically grounded integral component of their decision-making processes, LPDs need resources that provide cutting-edge primary and secondary research on the conceptualization, measurement, and consequences of individual differences on language development in the classroom. This volume provides LPDs with the means to transmit information to their instructors in effective ways so that the instructors develop a sophisticated understanding of individual differences, including learning disabilities, special needs, and strategies for dealing with diverse student populations. In addition, this volume creates a forum for reflections about and solutions to challenges related to diversity as it relates to individual differences. With a new Foreword by April Baker-Bell and a new Preface by Vershawn Ashanti Young and Y ' Shanda Young-Rivera, *Other People ' s English: Code-Meshing, Code-Switching, and African American Literacy* presents an empirically grounded argument for a new approach to teaching writing to diverse students in the English language arts classroom. Responding to advocates of the "code-switching" approach, four uniquely qualified authors make the case for "code-meshing" —allowing students to use standard English, African American English, and other Englishes in formal academic writing and classroom discussions. This practical resource translates theory into a concrete road map for pre- and inservice teachers who wish to use code-meshing in the classroom to extend students ' abilities as writers and thinkers and to foster inclusiveness and creativity. The text provides activities and examples from middle and high school as well as college and addresses the question of how to advocate for code-meshing with skeptical administrators, parents, and students. *Other People ' s English* provides a rationale for the social and educational value of code-meshing, including answers to frequently asked questions about language variation. It also includes teaching tips and action plans for professional development workshops that address cultural prejudices.
