*Textbook of Basic Nursing* Lippincott Williams & Wilkins

This text fills a void in advanced practice nursing literature by providing a foundation for integrating psychopharmacology, psychotherapy and Complementary and Alternative Medicine (CAM) into advanced practice nursing. The text includes coverage of neurobiology, theory and research evidence related to psychopharmacology, psychotherapy and complementary and alternative medicine interventions. This text addresses the issue of defining and integrating relationship-based approaches with psychopharmacological and CAM approaches by providing beautifully-

designed and easy-to-follow decision trees for initiating specific treatment and discussion of specific continuing care issues. This text has a lifespan focus and includes pediatric pointers and aging alerts.

UPDATED! Revised chapter objectives and content reflects higher-level critical thinking, communication, patient safety, and priority setting. UPDATED! Get Ready for the NCLEX?! review questions updated per the 2014 NCLEX-PN? test plan.

A Concept-Based Approach to Learning  
Saunders

This title is appropriate for all baccalaureate-level courses in critical care and advanced adult or medical surgical nursing, as well as for hospital orientation programs for beginning critical care nurses. An introduction to critical care that helps nurses deliver safe, effective care that optimizes patients' outcome Understanding the Essentials of Critical Care Nursing provides novice

critical care nurses with a firm foundation so that they are able to understand the complexities of care; deliver safe, effective care; and begin their transition to expert nurses. It identifies concepts and techniques that are unique to critical care nursing and focuses on the essentials of providing care to patients with disorders that are commonly seen in critical care settings. Evidence-based practices, safety initiatives, commonly used medications, and leading technologies for providing better care are highlighted throughout the book. The Third Edition includes current recommendations for practice as well as new NCLEX -style questions and analytical Why/Why Not features that spark critical thinking and test readers' understanding. By concentrating on the problems that the new critical care nurse is most likely to encounter, the text

For all nursing programs The state-of-the-art three-volume, concept-based, student-centered introduction to nursing focuses on 51 indispensable biophysical professional and healthcare concepts; and more than 435 nursing skills. Today, nurses must be able to transfer their knowledge to new situations, and stay current with new disorders, treatments, and evidence-based practice. Nursing: A Concept-Based

---

Approach to Learning, Volumes I-III, Second Edition with MyNursingLab for Concepts will help them achieve all these goals. Its concept-based approach requires students to participate actively, assume more responsibility for their knowledge, integrate concepts, apply information, and use clinical reasoning. Instead of memorizing thousands of alterations, students gain in-depth knowledge of selected alterations, and learn how to apply that knowledge as new challenges and client presentations come their way. VOLUME I: The first of three volumes, the fully-updated Volume I focuses on 21 crucial biophysical concepts: acid-base balance; cellular regulation; comfort; digestion; elimination; fluids/electrolytes; health, wellness, and illness; immunity; infection; inflammation; intracranial regulation; metabolism; mobility; nutrition; oxygenation; perfusion; perioperative care; sensory perception; sexuality; thermoregulation, and tissue integrity. These concepts are illuminated with nearly 100 exemplars covering the entire lifespan. VOLUME II: The second of two volumes, the fully-updated Volume II focuses on 30 crucial concepts every nurse needs to master. It begins with several

---

Psychosocial Modules covering addiction, cognition, culture/diversity, development, family, grief/loss, mood/affect, self, spirituality, stress/coping, and violence. After focusing on reproduction, it turns to the nursing domain, covering assessment, caring interventions, clinical decision making, collaboration, communication, care management, professional behaviors, and client teaching/learning. Finally, it turns to the nurse's broader roles, focusing on accountability, advocacy, evidence-based practice, healthcare systems, health policy, informatics, legal issues, quality improvement,

and safety. The 30 concepts included in Volume II are illuminated with more than 80 exemplars covering the entire lifespan.

**CONSISTENT PEDAGOGY FOR IMPROVED KNOWLEDGE RETENTION:** Volume I and II in the textbook series have an updated concept-level template that presents each concept and exemplar in the same manner: Each **CONCEPT** follows the following template:

- Normal Presentation -
- Developmental Considerations -
- Alterations -
- Related Concepts -
- Physical Assessment -
- Diagnostic Tests -
- Interventions & Therapies

Each **EXEMPLAR** follows the

---

following template: Overview - Pathophysiology and Etiology - Clinical Manifestations and Therapies - Nursing Process - Nursing Care Plan - Relate and Reflect

**VOLUME III: The only skills book of its kind, Clinical Nursing Skills: A Concept-Based Approach, Volume III, 2nd edition is designed to meet the specific needs and approach of concept-based nursing programs in teaching key nursing skills. Clinical Nursing Skills: A Concept-based Approach presents more than 435 of the most important skills performed by nurses including common variations. This second edition has been revised, restructured, and updated to reflect the most current nursing practices and standards. Each skill is characterized by an overarching concept and is presented in exceptional step-by-step detail with beautiful, real-life illustrations, which help students visualize exactly how each skill is completed. MyNursingLab for Concepts MyNursingLab for Concepts is an online homework, tutorial, and assessment program that truly engages students in learning, and is designed to support the concepts and exemplars included in Volumes I and II of Nursing: A Concept-based Approach to Learning, 2e.**

### Concepts, Skills and Nursing Saunders

Building on the strengths of the fourth edition, *Basic Nursing: Essentials for Practice* is back in a new edition!

Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process

provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional

---

roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter

to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.

**Basic Nursing Pearson**
