Administration and Development in the Arab World IGI Global

Human Choice and Computers: Issues of Choice and Quality of Life in the Information Society presents different views about how terrorist actions are influencing political and social discussions and decisions, and it covers questions related to legitimacy and power in the Information Society. Ethical principles are important guidelines for responsible behavior of IT professionals. But even under strong external pressure, long ranging aspects such as education and the roles of developing countries in the Information Society are important to discuss, especially to enable all to actively participate in information processes.

Securing Livelihoods, Building Peace IGI Global

Originally published in 1994, Yair Evron opens the book with an account of the development of Israel's nuclear doctrine and the internal disagreements within the Israeli political and strategic elite over how nuclear policy should be conducted. There follows an analysis of the reactions from Arab states and of how, with the exception of Iraq, they have so far refrained from developing their own nuclear weapons.

Higher Education in the Gulf HarperCollins

The Oxford Handbook of Human Development and Culture provides a comprehensive synopsis of theory and research on human development, with every chapter drawing together findings from cultures around the world. This includes a focus on cultural diversity within nations, cultural change, and globalization. Expertly edited by Lene Arnett Jensen, the Handbook covers the entire lifespan from the prenatal period to old age. It delves deeply into topics such as the development of emotion, language, cognition, morality, creativity, and religion, as well as developmental contexts such as family, friends, civic institutions, school, media, and work. Written by an international group of eminent and cutting-edge experts, chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development. This "cultural-developmental approach" is a multifaceted, flexible, and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century.

The Path of Economic Integration Taylor & Francis

In 2011 the World Bank—with funding from the Bill and

Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex. Challenges, Strategies, and Opportunities Bloomsbury Publishing

This authoritative edited volume examines the drivers of higher education in the Gulf region. It offers insightful analyses and examines contemporary pedagogical, management, strategic, and relevant issues on quality education that confront higher education institutions. Written by higher education specialists, curriculum developers, and policy makers from diverse international backgrounds, the book analyses issues affecting the Gulf Cooperation Council (GCC) region, with a particular focus on Oman and Saudi Arabia. It is divided into regional and non-regional drivers and considers drivers as potent enablers of a management system and educational structure at the intersection of quality education and quality management in higher education. Chapters include discussion of organisational, management, and policy issues including strategic innovation, internationalisation, quality assurance, and global rankings of higher education institutes. The book includes discussion of the challenges posed by the COVID-19 pandemic on teaching and learning policies, practices, and programmes. This book will serve as an essential reference for quality management in higher education institutions in the Gulf, and will be highly relevant reading for academics, researchers, and students of higher education, education management, and quality education in the Gulf region.

The Proceedings of a Seminar of the United Nations Economic Commission for Western Asia organized by the Natural Resources, Science and Technology Division, Beirut, 9-14 October 1977 Elsevier Trajectories of Education in the Arab World gives a broad yet detailed historical and geographical overview of education in Arab countries. Drawing on pre-modern and modern educational concepts, systems, and practices in the Arab world, this book examines the impact of Western cultural influence, the opportunities for reform and the sustainability of current initiatives. The contributors bring together analyses and case studies of educational standards and structures in the Arab world, from the classical Islamic period to contemporary local and international efforts to re-define the changing needs and purposes of Arab education in the contexts of modernization, multiculturalism, and globalization. Taking a thematic and chronological approach, the first section contrasts the traditional notions, approaches, and standards of education with the changes that were initiated or imposed by European influences in the nineteenth century. The chapters then focus on the role of modern state-based educational systems in constructing and preserving national identities, cultures, and citizenries and concentrates on the role of education in state-formation and the reproduction of socio-political hierarchies. The success of educational reforms and policy-making is then assessed, offering perspectives on future trends and prospects for generating institutional and organizational change. This book will be of interest to graduate and postgraduate students and scholars of education, history, Arab and Islamic history and the Middle East and North Africa.

The Global Findex Database 2017 Springer Science & Business Media This book bridges the research and practice of global talent management. It opens important theoretical and practical avenues to understand the concept internationally while focusing on developing and emerging countries. Chapters derive from various geographic regions and embrace cross-national, comparative, and interdisciplinary perspectives. An open and inclusive approach is used in assessing the challenges of global talent management, strategies to overcome these challenges, and in charting opportunities for future talent management. These three dimensions are crucial to academic researchers and business practitioners for envisioning a positive future role of talent management in businesses and societies.

Key Strategies for Bottom-line Results in Today's Global Financial Markets Bloomsbury Publishing

Christopher Ward provides a complete analysis of the water crisis in Yemen, including the institutional, environmental, technical and political economy components. He assesses the social and economic impacts of the crisis and provides in-depth case studies in the key management areas. The final part of the book offers an assessment of current strategy and looks at future ways in which the people of the country and their government can influence outcomes and make the transition to a sustainable water economy. The Water Crisis in Yemen offers a comprehensive, practical, and effective approach to achieving sustainable and equitable management of water for growth in a country whose water problems are amongst the most serious in the world.

101 Checklists for Successful Global Treasury Management Routledge Afro-Eurasia: Assessing Sustainability focuses on the geographic area where humans originated and first began to make use of the natural world - Earth's largest landmass, stretching from Portugal in the west across the steppes of Russia and south across Africa to the Cape of Good Hope. By examining the history of human expansion, as well as 21st century pressures to address ecosystem damage across the region, international scholars and regional experts weave sustainability into core curricular subjects. The interdisciplinary coverage includes national and regional environmental histories, as well as business and commerce, migration, educational institutions, law and government, and the lifestyles of diverse populations.

An Interdisciplinary Perspective Routledge

The Second Middle East Edition blends theory with contemporary management practice. Dr. Marina Apaydin (American University of Beirut) joins the authoring team in this edition for significant enhancements to content and presentation of topics. New chapter-opening cases have been added to feature companies and management personalities from the Middle East. Management Insights vignettes offer balanced representation of international as well as local, small-to-medium sized companies and start-ups, to ensure applicability of theory in a variety of contexts. Updated content and improved topics coverage ensure closer alignment with introductory management courses:

- Two new topics have been added on the history of management in the Arab world in Chapter 2, and Islamic ethics in Chapter 5.
- Improved content coverage includes a new Chapter 3 focusing on the Manager as a Person.
- Improved and streamlined coverage of managerial processes relating to organizational culture in Chapter 4.
- Managing in the Global Environment includes revised terminology consistent with International Business courses.
- Chapters 8 through 11 have gone through substantial revision to focus on control as part of managing the organizational structure, and organizational learning as part of change and innovation.
- Chapter 16 includes contemporary topics on communication including social media, influencers, and a guide to networking.

Dr. Marina Apaydin is an Assistant Professor of Strategic Management at the Olayan School Business at the American University of Beirut, Lebanon. Dr. Omar Belkohodja is an Associate Professor of Strategic Management and International Business at the School of Business Administration at the American University of Sharjah, UAE.

Technology Transfer and Change in the Arab World covers the proceedings of the Seminar of the United Nations Economic Commission for Western Asia. The book presents 24 papers that cover concerns in technology transfer in the Arab world. The coverage of the book includes established patterns of technology acquisition in the Arab world; possible mechanisms for the transfer and development of technology; and the transfer of technology and investment policy design. The selection also presents articles that cover resource related technology such as water science and technology in the Middle East since 1945; induced adjustment and the role of agriculture in economic development; and prospects and scope for solar energy. The book will be of great interest to individuals concerned with the technological development in the Middle East.

Measuring Financial Inclusion and the Fintech Revolution

Springer Science & Business

The popular grievances that have fueled the Arab Spring since 2010 demonstrate that past development paradigms have failed to achieve the inclusive and sustainable growth expected by Arab populations. Countries in the Middle East and North Africa (MENA) region have failed to develop a strong private sector that is linked with global markets, survives without state assistance, and generates productive employment for young people. One key symptom of this maldevelopment is that, with the exception of the petroleum sector, MENA remains the least trade-integrated region in the world. The Deauville Partnership, launched by the Group of Eight (G8) in Deauville, France, in May 2011, is thus strategic and timely. At the request of the G8, this report provides an analytical framework for increasing trade and foreign direct investment (FDI) for Egypt, Jordan, Libya, Morocco, and Tunisia (the Partnership countries). Increased trade and FDI is a key means by which Partnership countries can achieve a path of sustainable growth that reduces youth unemployment. Moreover, trade and investment can also show short-term results. The G8 countries, Turkey, the Gulf states, and other Deauville partners can help the new Arab democracies achieve their objectives in two main ways: by effectively expanding market opportunities and by supporting domestic regulatory reforms. To start implementing a long-term vision of increased trade and investment integration, based on an integrated economic space in the Mediterranean basin, the Deauville Partnership could focus on five priority areas. These are helping Partnership countries adapt to a fast-changing trade, FDI, and jobs landscape; improving market access opportunities and market regulations; fostering competitiveness, diversification, and employment; facilitating trade and mobilizing trade finance and diaspora resources; and promoting inclusiveness, equity, and sustainability of the structural transformation brought about by the process of integration. The success of the Arab political awakening will greatly depend on the emergence of such an economic awakening that can generate quality employment for the millions of young Arab men and women who seek jobs and a decent life.

Is there enough water on this planet for a global population that will shortly double its present size? The answer is of huge importance for people everywhere, but particularly to the peoples and political leaders of the Middle East and North Africa. As well as explaining the particular issues of conflict in the region, Allan argues that the answer to these problems lies at the global rather than local level. The Middle East Water Question is a major book by one of the world's leading authorities on water issues.
