"This book offers perspectives on international information management with particular emphasis on the strategies for the implementation and application of information technology in developed and developing countries"--Provided by publisher.
Research for Development in the Middle East and North Africa Global Talent Management Challenges, Strategies, and Opportunities

Two Gulf wars and the continuing Arab-Israeli conflict have highlighted the salience of military factors in the Middle East. This book argues, however, that many of the most serious 'security' challenges to Arab states and societies are rooted not in external military threats but in the imperatives of socio-economic development. Contributors examine the regional security environment; the social and political impact of regional militarization; and underdevelopment as a source of regional insecurity. **The Oxford Handbook of Human Development and Culture** Routledge
Originally published in 1994, Yair Evron opens the book with an account of the development of Israel's nuclear doctrine and the internal disagreements within the Israeli political and strategic elite over how

nuclear policy should be conducted. There follows an analysis of the reactions from Arab states and of how, with the exception of Iraq, they have so far refrained from developing their own nuclear weapons.

Water Scarcity, Climate Change and Conflict in the Middle East World Bank Publications
Is there enough water on this planet for a global population that will shortly double its present size? The answer is of huge importance for people everywhere, but

particularly to the peoples and political leaders of the Middle East and North Africa. As well as explaining the particular issues of conflict in the region, Allan argues that the answer to these problems lies at the global rather than local level. The Middle East Water Question is a major book by one of the world's leading authorities on water issues.

Legacies and Challenges Springer Science & Business Media

This authoritative edited volume examines the drivers of higher education in the Gulf region. It offers insightful analyses and examines contemporary pedagogical,

management, strategic, and relevant issues on quality education that confront higher education institutions. Written by higher education specialists, curriculum developers, and policy makers from diverse international backgrounds, the book analyses issues affecting the Gulf Cooperation Council (GCC) region, with a particular focus on Oman and Saudi Arabia. It is divided into regional and non-regional drivers and considers drivers as potent enablers of a management system and educational structure at the intersection of quality education and quality management in higher education. Chapters include discussion of organisational, management, and policy issues including strategic innovation, internationalisation, quality assurance, and global rankings of higher education institutes. The book includes discussion of the challenges posed by the COVID-19 pandemic

on teaching and learning policies, practices, and programmes. This book will serve as an essential reference for quality management in higher education institutions in the Gulf, and will be highly relevant reading for academics, researchers, and students of higher education, education management, and quality education in the Gulf region.

101 Checklists for Successful Global Treasury Management Routledge

The Second Middle East Edition blends theory with contemporary management practice. Dr. Marina Apaydin (American University of Beirut) joins the authoring team in this edition for significant enhancements to content and presentation of topics. New chapter-opening cases have been added to feature companies and management personalities from the Middle East. Management Insights vignettes offer balanced representation of international as well as local, small-to-medium sized companies and start-ups, to ensure applicability of theory in a variety of contexts. Updated content and improved topics coverage ensure closer alignment with introductory management courses: •

Two new topics have been added on the history of management in the Arab world in Chapter 2, and Islamic ethics in Chapter 5.

- Improved content coverage includes a new Chapter 3 focusing on the Manager as a Person.
- Improved and streamlined coverage of managerial processes relating to organizational culture in Chapter 4.
- Managing in the Global Environment includes revised terminology consistent with International Business courses.
- Chapters 8 through 11 have gone through substantial revision to focus on control as part of managing the organizational structure, and organizational learning as part of change and innovation.
- Chapter 16 includes contemporary topics on communication including social media, influencers, and a guide to networking.

Dr. Marina Apaydin is an Assistant Professor of Strategic Management at the Olayan School Business at the American University of Beirut, Lebanon. Dr. Omar Belkohodja is an Associate Professor of Strategic Management and International Business at the School of Business Administration at the American University of Sharjah, UAE.

Global Treasury Management Springer Science & Business Media

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial

inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

Technology Transfer and Change in the Arab World Oxford University Press Trajectories of Education in the Arab World gives a broad yet detailed historical and geographical overview of education in Arab countries. Drawing on pre-modern and modern educational concepts, systems, and practices in the Arab world, this book examines the impact of Western cultural influence, the opportunities for reform and the sustainability of current initiatives. The contributors bring together analyses and case studies of educational standards and structures in the Arab world, from the classical Islamic period to contemporary local and international efforts to re-define the changing needs and purposes of Arab education in the contexts of modernization,

multiculturalism, and globalization. Taking a thematic and chronological approach, the first section contrasts the traditional notions, approaches, and standards of education with the changes that were initiated or imposed by European influences in the nineteenth century. The chapters then focus on the role of modern state-based educational systems in constructing and preserving national identities, cultures, and citizenries and concentrates on the role of education in state-formation and the reproduction of socio-political hierarchies. The success of educational reforms and policy-making is then assessed, offering perspectives on future trends and prospects for generating institutional and organizational change. This book will be of interest to graduate and postgraduate students and scholars of education, history, Arab and Islamic history and the Middle East and North Africa.

Managing Extreme Water Scarcity in the Middle East Elsevier

This book bridges the research and practice of global talent management. It opens important theoretical and practical avenues to understand the concept internationally while focusing on developing and emerging countries. Chapters derive from various geographic

regions and embrace cross-national, comparative, and interdisciplinary perspectives. An open and inclusive approach is used in assessing the challenges of global talent management, strategies to overcome these challenges, and in charting opportunities for future talent management. These three dimensions are crucial to academic researchers and business practitioners for envisioning a positive future role of talent management in businesses and societies.

Securing Livelihoods,

Building Peace Springer

Science & Business Media

This book provides state-of-the-art analysis of banking and financial systems in the Arab world. The early chapters of the text present an overview of Arab economies linking banking and financial sector trends in the Arab world over the last twenty years. The rest of the text examines in detail the financial systems of the major Arab countries, focusing on banking sector and capital market developments. This text will be the first to provide a rigorous analytical evaluation of banking sector developments in the Arab world.

The Middle East Water Question Washington, D.C. : Cataloging Distribution Service, Library of Congress The countries that make up the MENA region display wide diversity. One of the poorest countries in the world sits alongside two of the wealthiest, whilst the region's natural resources range from immeasurable oil and gas reserves to some of the scantiest natural endowments anywhere in the world. Yet through this diversity runs a common thread: water scarcity. Now, through the impact of human development and climate change, the water resource itself is changing,bringing new risks and increasing the vulnerability of all those

dependent on water. Chris Ward and Sandra Ruckstuhl assess the increased challenges now facing the countries of the region, placing particular emphasis on water scarcity and the resultant risks to livelihoods, food security and the environment. They evaluate the risks and reality of climate change in the region, and offer an assessment of the vulnerability of agriculture and livelihoods. In a final section, they explore the options for responding to the new challenges, including policy, institutional, economic and technical measures. The Path of Economic Integration Bloomsbury Publishing This book, first published in 1986, examines the literature on administration, human resources and development in the Arab world. It emphasizes contemporary societies and their internal dynamics, the least known and most critical aspects of Arabic studies. Major Companies of the Arab World 1993/94 IGI Global

This book provides a survey of technologies available to tackle the problems associated with climate change in the energy, water and food security nexus with a special focus on the Middle East. It is divided into three main sections. The energy Section consists of six chapters, the water section of seven chapters and finally the food security section has six chapters. The individual chapters are authored by experts and provide discussions and in-depth views on the current status of each topic.

Cairo Papers in Social Science Vol. 34 IGI Global

Human Choice and Computers: Issues of Choice and Quality of Life in the Information Society presents different views about how terrorist actions are influencing political and social discussions and decisions, and it covers questions related to legitimacy and power in the Information Society. Ethical principles are important guidelines for

responsible behavior of IT professionals. But even under strong external pressure, long ranging aspects such as education and the roles of developing countries in the Information Society are important to discuss, especially to enable all to actively participate in information processes. Water, Energy & Food Sustainability in the Middle East CRC Press Afro-Eurasia:

Assessing Sustainability focuses on the geographic area where humans originated and first began to make use of the natural world - Earth's largest landmass, stretching from Portugal in the west across the steppes of Russia and south across Africa to the Cape of Good Hope. By examining the history of human

expansion, as well as 21st century pressures to address ecosystem damage across the region, international scholars and regional experts weave sustainability into core curricular subjects. The interdisciplinary coverage includes national and regional environmental histories, as well as business and commerce, migration, educational institutions, law and government, and the lifestyles of diverse populations.
