Computer-based tests are becoming more and more common, especially due to the fact that the new Common Core State Standards will be tested using Computer Adaptive Testing methods. This study compared one third grade class's scores on a paper-based test with an equivalent computer-based tests Students were given two weeks between versions of test and were not given any feedback on how they did on one version before they took the second version. No statistically significant difference was found between the two modalities of tests in this study. However, students struggled with the computerized tests and needed additional instruction in how to take that mode of test. Further studies are needed to know exactly what type and amount of instruction is optimal before students are asked to take a computerized test.
