Richard De Veaux, Paul Velleman, and David Bock wrote *Stats: Data and Models* with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results. ### [Phonemic Awareness in Young Children](#) Brookes Publishing Company

This document was created because of the need for new assessment strategies and practices to be developed to enable teachers and others to assess students' performance in a manner that reflects the NCTM's reform vision for school mathematics. Instead of assuming that the purpose of assessment is to rank students on a particular trait, the new approach assumes that high public expectations can be set that every student can strive for and achieve, that different performances can and will meet agreed-on expectations, and that teachers can be fair and consistent judges of diverse student performances. The first sections of the document discuss six mathematics assessment standards: (1) The Mathematics Standard, (2) The Learning Standard, (3) The Equity Standard, (4) The Openness Standard, (5) The Inferences Standard, and (6) The Coherence Standard. The use of the assessment standards is then discussed in the context of different purposes such as monitoring students' progress, making instructional decisions, evaluating students' achievement, and evaluating programs. The next section discusses what should happen next with regard to mathematical assessment. The document concludes with a glossary and a selected assessment bibliography with 116 citations. Contains 28 references. (MKR)

A master story-teller, Dr. Jose A. Cardenas, offers us an insider's view of the 28-year history of school finance in Texas. Dr. Cardenas is the founder & director emeritus of IDRA & is the only person who has been actively involved in the entire school finance reform effort since the early days of the RODRIGUEZ VS. SAN ANTONIO ISD litigation when he was superintendent of the Edgewood Independent School District. More than a history, this book provides a blueprint for persons interested in bringing about future reform in schools & other social institutions. Beginning with a description of the Texas system in 1950, the account covers court cases, legislation, & advocacy efforts & concludes with the status & future of school finance reform. Personal vignettes sprinkled throughout offer glimpses of those special untold moments that impacted history. Much of this volume - including the myths of school finance & lessons learned - relate to reform efforts in other states as well. Dr. James A. Kelly, president of the National Board of Professional Teaching Standards, provides a foreword, "Fighting the Good Fight," describing Dr. Cardenas as a trailblazer & pioneer. The book, OLSAT Practice Test is designed for Kindergarten and 1st grade students. Apart from providing tools to prepare children for the standardized gifted and talented exams, we also want to make sure that the exercises are fun and attractive. We use colorful pictures and interactive matching exercises to help children learn the necessary ideas for the test. Early education plays a significant role in the child's attitude towards learning for the rest of his or her life. When they are young, children are naturally curious and desire to explore everything. Many states in our country have created special gifted and talented programs to allow children access to a more vigorous education. To accept students to the programs, most school systems require children to take tests. The OLSAT is one of the most common tests used across the country for entry into gifted and talented school programs. The test is designed to assess Verbal Comprehension, Verbal Reasoning, Pictorial Reasoning, Figural Reasoning, and Quantitative Reasoning. Our goal is assist you in your journey to supporting the motivation, learning and development of your child.

### [CogAT Practice Test \(Grade 2\)](#) Frank Schaffer Publications

Since passage of the of No Child Left Behind Act in 2001, academic researchers, econometricians, and statisticians have been exploring various analytical methods of documenting students' academic progress over time. Known as value-added models (VAMs), these methods are meant to measure the value a teacher or school adds to student learning from one year to the next. To date, however, there is very little evidence to support the trustworthiness of these models. What is becoming increasingly evident, yet often ignored mainly by policymakers, is that VAMs are 1) unreliable, 2) invalid, 3) nontransparent, 4) unfair, 5) fraught with measurement errors and 6) being inappropriately used to make consequential decisions regarding such things as teacher pay, retention, and termination. Unfortunately, their unintended consequences are not fully recognized at this point either. Given such, the timeliness of this well-researched and thoughtful book cannot be overstated. This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research-based ways.
