In Romeo and Juliet,  
Shakespeare creates a  
violent world, in which  
two young people fall in  
love. It is not simply that  
their families disapprove;  
the Montagues and the  
Capulets are engaged in a  
blood feud. In this death-  
filled setting, the  
movement from love at  
first sight to the lovers'  
final union in death

seems almost inevitable.  
And yet, this play set in  
an extraordinary world  
has become the  
quintessential story of  
young love. In part  
because of its exquisite  
language, it is easy to

Statistics Through Applications (STA) is the only text written specifically for high school statistics course. Designed to be read, the book takes a data analysis approach that emphasizes conceptual understanding over computation, while recognizing that some computation is necessary. The focus is on the statistical thinking behind data gathering and interpretation. The high school statistics course is often the first applied math course students take. STA engages students in learning how statisticians contribute to our understanding of the world and helps students to become more discerning consumers of the statistics they encounter in ads, economic reports, political campaigns, and elsewhere. The SAT II Subject Tests are created and administered by the College Board and the Educational Testing Service (ETS), the two organizations responsible for producing the SAT I (the SAT). The SAT II Subject Tests are meant to complement the SAT I. Whereas the SAT I tests your critical thinking skills by asking math and verbal questions, the SAT II Subject Tests examine your knowledge of a particular subject, such as Writing, U.S. History, Physics, or Biology. The SAT I takes three hours; the Subject Tests take one hour.
