Professional Engineer Passing the Power PE Exam

To cope with the pandemic, many educational institutions in the United States have resorted to emergency remote teaching (ERT). Distance/online learning is a complex process in terms of the design, analysis, and time taken to develop and implement courses and programs. Having been around for decades, it has evolved and morphed into a multidimensional procedure that needs meticulous planning, evolution, and evaluation. It provides meaningful learning experiences to students who may not otherwise have the option to attend college. Students of distance/online courses and programs usually choose to join voluntarily, and designers of such programs purposefully plan for them to be online from the start. In contrast, ERT is an emergency/crisis-based need to move teaching and learning to alternative environments until the crisis is averted or ended. *Preparing Faculty for Technology Dependency in the Post-COVID-19 Era* is a comprehensive guide that focuses on preparing pre-service teachers, in-service teachers, and higher education faculty to harness technology dependence in an emergency remote teaching era by discussing current and post-pandemic preparedness. Covering a wide range of topics such as digital reality, teacher preparedness, and technology dependency, this book is crucial for educators, administrators, pre-service teachers, researchers, academicians, and students.

I effectively retired on July 15, 2014, after forty-six years of service in the oil and gas industry as petroleum engineer in the US and abroad. The time had come, and it was time for me to look forward to a long-anticipated retirement and quality time with my wife and family. I decided to write my memories to share my feelings and love with my parents, family, and people close to me. It was not my intention to sound selfish or narcissistic when describing myself and my achievements in life. I tried to do it in a biographical way, showing steps to reach goals and destinations. I hope my autobiography helps the reader understand objectively who I am or was in the pursuit of dreams and reality. My memoir consists of various anecdotes and stories of my childhood. The memoir details my very early childhood and teenage years in Colombia, South America, but focuses primarily on my life in the USA. It also includes my struggles with violence, corruption, and the politics of living in a third world country. The book was written in 2016.
