Volumes in *Writing Spaces: Readings on Writing* offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

Turn any student into a bookworm with a few easy and practical strategies Donalyn Miller says she has yet to meet a child she can't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year.

Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. In the book, you'll find: Hands-on strategies for managing and improving your own school library Tactics for helping students walk on their own two feet and continue the reading habit after they've finished with your class Data from student surveys and end-of-year feedback that proves how well the Miller Method works The Book Whisperer includes a

dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

From the #1 New York Times bestselling author of the Percy Jackson and the Olympians series Everything in Texas is bigger . . . even murder. Meet Tres Navarre—tequila drinker, Tai Chi master, and unlicensed P.I., with a penchant for Texas-size trouble. Jackson "Tres" Navarre and his enchilada-eating cat, Robert Johnson, pull into San Antonio and find nothing waiting but trouble. Ten years ago Navarre left town and the memory of his father's murder behind him. Now he's back, looking for answers. Yet the more Tres digs, trying to put his suspicions to rest, the fresher the decade-old crime looks: Mafia connections, construction site payoffs, and slick politicians' games all conspire to ruin his homecoming. It's obvious Tres has stirred up a hornet's nest of trouble. He gets attacked, shot at, run over by a big blue Thunderbird—and his old girlfriend, the one he wants back, is missing. Tres has to rescue the woman, nail his father's murderer, and get the hell out of Dodge before mob-style Texas justice catches up to him. The chances of staying alive looked better for the defenders of the Alamo. "Riordan writes so well about the people and topography of his Texas hometown that he quickly marks the territory as his own." —Chicago Tribune Don't miss any of these hotter-than-Texas-chili Tres Navarre novels: BIG RED TEQUILA • THE WIDOWER'S TWO-STEP • THE LAST KING OF TEXAS • THE DEVIL WENT DOWN TO AUSTIN • SOUTHTOWN • MISSION ROAD • REBEL ISLAND

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday

applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback.

Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.
