Thirty years ago a frustrated physicist from Seattle named Ron Gregg was retreating from an aborted attempt at a new alpine style route on Denali. His partner had been evacuated by helicopter, but Ron chose to ski back to the highway solo. In the process, Ron found a new direction in life. At that time, outdoor gear left much to be desired. Many of the best climbers and alpinists designed their own equipment out of necessity. They fashioned climbing harnesses, backpacks and entire kits in basements and garages. Nobody cared

what the gear looked like. For a mountaineer with a penchant for design, the 70s and 80s were an era of extreme entrepreneurial opportunity and epic adventure. Designed by Adventure: 30 Years of Outdoor Research follows Ron Gregg ' s seminal early years as he bootstraps what would become an iconic company known for relentless commitment to functionality and durability. His intense passion for making better products in his own factory establishes Outdoor Research as an outdoor industry leader, yet Ron ' s devotion to his Seattle factory eventually imperils the company as globalization changes the game. His sudden and tragic death in the mountains of British Columbia creates a crisis as his family and the management team struggle to find a solution to keep the company going. Ultimately a new team comes together to build on Ron ' s legacy and principles, building Outdoor Research into one of the fastest growing companies in its industry.

Culture permeates human activity the world over. In today's technological "global village," people from very different cultures are interacting more closely and more often than ever -- making it critical for clinicians to understand and incorporate cultural dimensions into their daily practices. This volume offers a contemporary pragmatic understanding of how culture is inextricably intertwined with mental health and mental illness. In Chapter 1, the 17-member GAP Committee on Cultural Psychiatry begins by discussing the history (particularly within the last two decades) and scope of culture in clinical psychiatry. In Chapter 2, the authors describe 11 selected cultural variables that strongly influence clinical work: ethnic identity, race, gender and sexual orientations, age, religion, migration and country of origin, socioeconomic status, acculturation and acculturative processes, language, dietary influences, and education. In Chapter 3, the authors present a brief history and detailed analysis of the Cultural Formulation, the newest instrument for ensuring thorough clinical assessments, explaining its clinical use based on DSM-IV guidelines. In Chapter 4, the authors integrate the

11 cultural variables described in Chapter 2 with the use of the Cultural Formulation described in Chapter 3, producing an extraordinary cross-section of case vignettes: How the son of Irish Catholic immigrants struggles to reconcile old-country traditions with life in modern American society The sometimes painful and always complex process and outcomes of acculturation for a Pakistani Muslim family who had come to the United States for only a temporary period but ended up staying permanently Diagnosing social phobia in an Asian American, whose traditional reticence must be viewed within the context of Asian culture Loss of country of origin and family ties as catalysts leading to significant behavioral changes and severe depressive symptoms in an African immigrant tribesman from Kenya and the cultural context of his recovery The interplay of gender, age, and religion with developmental issues, personality organization, and symptom development for a "good Catholic girl" The existential, interpersonal, and clinical experiences of a Protestant minister from predominantly Catholic Ecuador, who came to the United States as pastor of an Hispanic church in a predominantly white city In Chapter 5, the authors conclude with a summary and suggestions regarding the complex issues raised by a thorough cultural assessment. Enhanced by a detailed index, this powerful work meets the significant -- and rapidly growing -- need for psychiatrists and other mental health professionals to understand the role of culture in psychiatry and to integrate this knowledge into their practice so that they can provide the most comprehensive and useful care to their patients.

A spellbinding, deeply felt debut novel--soaring and poignant--about passion, freedom, motherhood, and the power to shape our destinies. Oona grew up on the island of Inis: a wind-blasted rock off the coast of Ireland where the men went out on fishing boats and the women tended turf fires; where the only book was the Bible; and where girls stayed at home until they became mothers themselves. The island was a gift for some, a prison for others. Even as a child, Oona knew she wanted to leave, but she never could have anticipated the tumultuous turn of events that would ultimately compel her to flee. Now, after twenty years--after Oona has forged a new, very different life for herself--her daughter vanishes, forcing Oona to face her past in order, finally, to be free of it. Heralding a singularly gifted new voice in fiction, The Island Child is a timeless story of birth and betrayal, storms and shipwrecks and fairy children, and the weight of long-buried secrets.
