"He is present within, pouring out his grace. In dire need he comes to the rescue whether sought or unsought. He is the most intimate being, our very Self." - V. 58, Sri Ramana Ashtottara Sri Ramana Maharshi, the sage of Arunachala - the holy mountain of Lord Shiva, was one of the world's most influential spiritual teachers of our time. He taught the infallible way to Self-realisation through his unique method of 'Self-Enquiry' and the total devotional surrender of the egotistic mind to the inner Satguru dwelling in each one's spiritual heart. He always spoke from the high authority of direct Self-knowledge. He could, and still does, invoke the real Self of pure Existence-Consciousness-Awareness-Love through the Silence of his Presence in his devotees. During his lifetime he led many to Self-realisation. His ashram at Tiruvannamalai is an active spiritual centre imparting the grace and knowledge of his Teaching. This brief biography acquaints you with significant details of his divine life and the essence of his Teaching. The author Alan Jacobs is well-known for his several books and anthologies including: *Poetic Transcreations of the Bhagavad Gita* and *The Principal Upanishads*. The *Guru Papers* demonstrates with uncompromising clarity that authoritarian control, which once held societies together, is now at the core of personal, social, and

planetary problems, and thus a key factor in social disintegration. It illustrates how authoritarianism is embedded in the way people think, hiding in culture, values, daily life, and in the very morality people try to live by. The book unmasks authoritarianism in such areas as relationships, cults, 12-step groups, religion, and contemporary morality. Chapters on addiction and love show the insidious nature of authoritarian values and ideologies in the most intimate corners of life, offering new frameworks for understanding why people get addicted and why intimacy is laden with conflict. By exposing the inner authoritarian that people use to control themselves and others, the authors show why people give up their power, and how others get and maintain it.

This book examines three closely related questions in the process of canon formation in the Sikh tradition: how the text of the *Adi Granth* came into being, the meaning of *gurbani*, and how the *Adi Granth* became the *Guru Granth Sahib*. The censure of scholarly research on the *Adi Granth* was closely related to the complex political situation of Punjab and brought the whole issue of academic freedom into sharper focus. This book addresses some of these issues from an academic perspective. The *Adi Granth*, the sacred scripture of the Sikhs, means 'first religious book' (from the word 'adi' which means 'first' and 'granth' which means 'religious book'). Sikhs normally refer to the *Adi Granth* as the *Guru Granth Sahib* to indicate a confession of faith in the scripture as *Guru*. The contents of the *Adi Granth* are commonly known as *bani* (utterance) or *gurbani* (the utterance of the *Guru*). The transcendental origin (or ontological status) of the hymns of the *Adi Granth* is termed *dhur ki bani* (utterance from the beginning). This particular understanding of revelation is based upon the doctrine of the *sabad*, or divine word, defined by *Guru Nanak* and the succeeding *Gurus*. This book also explores the revelation of the *bani* and its verbal expression, devotional music in the Sikh tradition, the role of the scripture in Sikh ceremonies, and the hymns of *Guru Nanak* and *Guru Arjan*.

Many scientists and technologists would like to carry out their own statistical analyses without reference to a professional statistician. Often, however, they have no knowledge of statistics or otherwise do not know how to apply it to research and development problems. The first edition of *Statistics in Research and Development* was written for these people. The second edition brings the book up-to-date. The text is divided into two parts; the first introduces basic but very important statistical techniques whilst the second part presents the modern powerful methods of data analysis that are particularly useful in modern research and development. Problems are provided at the end of each chapter with worked solutions provided at the end of the book. A problem-centered approach is used throughout and care has been taken to choose problems with which the scientist or technologist can identify. The results of the statistical analyses are reinterpreted into the language of the scientist. Mathematics is kept to a minimum and the assumptions underlying each technique are clearly explained. All the techniques introduced are powerful and proven, and commercial computer programs are available for many of them.

This book provides a set of fresh and compelling interdisciplinary approaches to the enduring phenomenon of the guru in South Asia. Moving across different gurus and kinds of gurus, and between past and present, the chapters call attention to the extraordinary scope and richness of the social lives and roles of South Asian gurus. Prevailing scholarship has rightly considered the guru to be a source of religious and philosophical knowledge and mystical bodily practices. This book goes further and considers the social engagements and entanglements of these spiritual leaders, not just on their own (narrowly denominational) terms, but in terms of their diverse, complex, rapidly evolving engagements with 'society ' broadly conceived. The book explores and illuminates the significance of female gurus, gurus from the perspective of Islam, imbrications of guru-ship and slavery in pre-modern India, connections between gurus and power, governance and economic liberalization in modern and contemporary India, vexed questions of sexuality and guru-ship, gurus ' charitable endeavours, the cosmopolitanism of gurus in contexts of spiritual tourism, and the mediation of gurus via technologies of electronic communication. Bringing together internationally renowned scholars from religious studies, political science, history, sociology and anthropology, The Guru in South Asia provides exciting and original new insights into South Asian guru-ship. The daily recitation of the Shri Guru Gita is one of the practices of the Hard Light Center of Awakening for one simple reason... as Mark Griffin says: "I am teaching you this about the Guru because I believe it's your best chance for Awakening in this lifetime". The Guru Gita is the core section of 352 sutras in the latter portion of the ancient Indian text known as the Skanda Purana. Gita means song, and indeed these sutras are a song in praise of the Guru, and in recognition of the power of contemplating the Guru's nature, especially through the vehicle of the repetition of these verses. Mark Griffin has selected 108 of these verses for the use of serious seekers - those who are sincerely interested in spiritual training. This fresh, original translation from the Sanskrit is specifically designed for the contemporary seeker. It's important to note that the recitation is in English, as Mark feels that the meaning of these sutras is most important. These 108 verses focus on the universal nature of the Guru. When the word Guru is used here, it is known to be more than an individual person. Rather, it is a universal principle, a catalyst for enlightenment like no other. It is referred to in the text as the Guru Tattva; tattva translating as principle. This 5.5" x 8.5" perfect-bound book is 174 pages, and contains the English verses in large print, so it is easy to read and recite. It also includes the Sanskrit Devanagari text, the Sanskrit transliteration, a guide how to pronounce the Sanskrit transliteration, Mark's full introduction and a in-depth 30 page glossary.
