Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze

through every page.

At a time when people are living into their tenth decade, the longest longitudinal study of human development ever undertaken offers welcome news for old age: our lives evolve in our later years and often become more fulfilling. Among the surprising findings: people who do well in old age did not necessarily do so well in midlife, and vice versa.

"[C]harming and surprising. . . The work of Admissions is laying down, with wit and care, the burden James assumed at 15, that she — or any Black student, or all Black students — would manage the failures of a racially illiterate community. . . The best depiction of elite whiteness I've read."—New York Times A Most Anticipated Book by Vogue.com · Parade · Town & Country · Nylon · New York Post · Lit Hub · BookRiot · Electric Literature · Glamour · Marie Claire · Publishers Weekly · Bustle · Fodor's Travel · Business Insider · Pop Sugar · InsideHook · SheReads Early on in Kendra James' professional life, she began to feel like she was selling a lie. As an admissions officer specializing in diversity recruitment for independent prep schools, she persuaded students and families to embark on the same perilous journey she herself had made—to attend cutthroat and largely white schools similar to The Taft School, where she had been the first African-American legacy student only a few years earlier. Her new job forced her to reflect on her own elite education experience, and to realize how disillusioned she had become with America's inequitable system. In *ADMISSIONS*, Kendra looks back at the three years she spent at Taft, chronicling clashes with her lily-white roommate, how she had to unlearn the respectability politics she'd been raised with, and the fall-out from a horrifying article in the student newspaper that accused Black and Latinx students of being responsible for segregation of campus. Through these stories, some troubling, others hilarious, she deconstructs the lies and half-truths she herself would later tell as an admissions professional, in addition to the myths about boarding schools perpetuated by popular culture. With its combination of incisive social critique and uproarious depictions of elite nonsense, *ADMISSIONS* will resonate with anyone who has ever been The Only One in a room, dealt with racial microaggressions, or even just suffered from an extreme case of homesickness.

"Hundreds of thousands of Ukrainian women were sentenced to the GULAG in the 1940s and 1950s. Only about half of them survived. In *Survival as Victory: Ukrainian Women in the Gulag*, Oksana Kis has produced the first anthropological study of daily life in the Soviet forced labor camps as experienced by Ukrainian women prisoners. Based on the written memoirs, autobiographies, and oral histories of over 150 survivors, this book fills a lacuna in the scholarship regarding Ukrainian experience. It details the women's resistance to the brutality of camp conditions not only through the preservation of customs and traditions from everyday home life, but also through the frequent elision of regional and confessional differences. Following on from the groundbreaking work of Anne Applebaum's *Gulag: A History* (2003), this book is a must-read for anyone interested in gendered

strategies of survival, accommodation, and resistance to the dehumanizing effects of the Gulag"-- Provided by publisher.

Weitzman explores the tactics cultures use to sustain themselves in the face of intractable realities. This book focuses on a resilient culture caught between two disruptive acts of sacrilege: ancient Judaism between the destruction of the First Temple (by the Babylonians) and the destruction of the Second Temple (by the Romans).

The forgotten story of 200,000 Polish Jews who escaped the Holocaust as refugees stranded in remote corners of the USSR. Between 1940 and 1946, about 200,000 Jewish refugees from Poland lived and toiled in the harsh Soviet interior. They endured hard labor, bitter cold, and extreme deprivation. But out of reach of the Nazis, they escaped the fate of millions of their coreligionists in the Holocaust. Survival on the Margins is the first comprehensive account in English of their experiences. The refugees fled Poland after the German invasion in 1939 and settled in the Soviet territories newly annexed under the Molotov-Ribbentrop Pact. Facing hardship, and trusting little in Stalin, most spurned the offer of Soviet citizenship and were deported to labor camps in unoccupied areas of the east. They were on their own, in a forbidding wilderness thousands of miles from home. But they inadvertently escaped Hitler's 1941 advance into the Soviet Union. While war raged and Europe's Jews faced genocide, the refugees were permitted to leave their settlements after the Soviet government agreed to an amnesty. Most spent the remainder of the war coping with hunger and disease in Soviet Central Asia. When they were finally allowed to return to Poland in 1946, they encountered the devastation of the Holocaust, and many stopped talking about their own ordeals, their stories eventually subsumed within the central Holocaust narrative. Drawing on untapped memoirs and testimonies of the survivors, Eliyana Adler rescues these important stories of determination and suffering on behalf of new generations.

"The work is a compilation of advice and stories from hundreds of students at more than 100 colleges across the US, regarding all the important aspects of life as a first-year college student, based on interviews with those students. Topics covered include: leaving home, dormitory life, studying, choosing classes and majors, fraternities, extra-curricular activities, campus food, etc. The work also includes short "expert articles" written by professionals who work with college students. This is the 5th edition of How to Survive Your Freshman Year"--

The Nature of Fear That Book about Harvard

One L, Scott Turow's journal of his first year at law school and a best-seller when it was first published in 1977, has gone on to become a virtual bible for prospective law students. Not only does it introduce with remarkable clarity the ideas and issues that are the stuff of legal education; it brings alive the anxiety and competitiveness--with others and, even more, with oneself--that set the tone in this crucible of character building. Each September, a new crop of students enter Harvard Law School to begin an intense, often grueling, sometimes harrowing year of introduction to the law. Turow's group of One Ls are fresh, bright, ambitious, and more than a little daunting. Even more impressive are the faculty. Will the One Ls survive? Will they excel? Will they make the Law Review, the outward and visible sign of success in this ultra-conservative microcosm? With remarkable insight into both his fellows and himself, Turow leads us through the ups and downs, the small triumphs and tragedies of the year, in an absorbing and thought-provoking narrative that teaches the reader not only about law school and the law but about the

human beings who make them what they are. In the new afterword for this edition of One L, the author looks back on law school from the perspective of ten years' work as a lawyer and offers some suggestions for reforming legal education.

A guide to surviving and thriving in fashion school, from an award-winning fashion designer and illustrator Success in fashion school requires more than a passion for fashion. It calls for the student to understand the cultural forces that shape what we wear and why we wear it; to develop a wide range of practical, aesthetic, and intellectual skills; and to work hands-on. This accessible guide assists the aspiring fashion designer on this journey with unique illustrated lessons on such topics as:

- how to identify the target customer, set priorities, select fabrics, and integrate details
- how to measure the human form, cut fabric, and pivot a dart
- why you haven't designed a garment if you don't know how it will be made
- how the nuclear bomb dropped on Hiroshima reshaped our understanding of fashion
- illustration fundamentals, including proportions, poses, lighting, and rendering
- practical information on the industry, including key terms, who does what in the industry, and the workings of the fashion calendar

Written by an experienced fashion designer, illustrator, and instructor, 101 Things I Learned® in Fashion School is an essential resource for beginning fashion students, recent graduates, experienced professionals, and anyone looking for a deeper understanding of how and why the clothes we wear—or choose not to wear—are designed and made.

Since 2000, more than 150 journalists have been killed in Mexico. Today the country is one of the most dangerous in the world in which to be a reporter. In *Surviving Mexico*, Celeste González Bustamante and Jeannine E. Rely examine the networks of political power, business interests, and organized crime that threaten and attack Mexican journalists, who forge ahead despite the risks. Amid the crackdown on drug cartels, overall violence in Mexico has increased, and journalists covering the conflict have grown more vulnerable. But it is not just criminal groups that want reporters out of the way. Government forces also attack journalists in order to shield corrupt authorities and the very criminals they are supposed to be fighting. Meanwhile some news organizations, enriched by their ties to corrupt government officials and criminal groups, fail to support their employees. In some cases, journalists must wait for a "green light" to publish not from their editors but from organized crime groups. Despite seemingly insurmountable constraints, journalists have turned to one another and to their communities to resist pressures and create their own networks of resilience. Drawing on a decade of rigorous research in Mexico, González Bustamante and Rely explain how journalists have become their own activists and how they hold those in power accountable.

In 142 CE, the divine Lord Lao descended to Mount Cranecall (Sichuan province) to establish a new covenant with humanity through a man named Zhang Ling, the first Celestial Master. Facing an impending apocalypse caused by centuries of sin, Zhang and his descendants forged a communal faith centering on a universal priesthood, strict codes of conduct, and healing through the confession of sins; this faith was based upon a new, bureaucratic relationship with incorruptible supernatural administrators. By the fourth century, Celestial Master Daoism had spread to all parts of China, and has since played a key role in China's religious and intellectual history. *Celestial Masters* is the first book in any Western language devoted solely to the founding of the world religion Daoism. It traces the movement from the mid-second century CE through the sixth century, examining all surviving primary documents in both secular and canonical sources to offer a comprehensive account of the development of this poorly understood religion. It also provides a detailed analysis of ritual life within the

movement, covering the roles of common believer or Daoist citizen, novice, and priest or libationer.

How I Stayed Catholic at Harvard Harvard University Press

From the author of *Mastering Civility*, a thoroughly researched exploration of the impact and importance of building thriving communities, with actionable steps on how to create them in your work and broader life. In her powerful new book, Christine Porath explores how the rise of technology and modern workplace practices have fractured our communications yet left us always “on” digitally. Through now common practices like hot-desking and remote work (even without the added isolation of social distancing we experienced during the pandemic), our human interactions have decreased, and so too have our happiness levels. This lack of a “human factor” is sparking a crisis in mental health that will have repercussions for years to come, leaving people lonelier and making the bottom line suffer, too. What Christine has discovered in her research is that leaders, organizations, and managers of all stripes may recognize there is a cost, but have no idea as to implement the cure: Community. With her signature depth and grasp of research across myriad industries including business, healthcare, hospitality, and sports, Christine extrapolates from the statistics on the experiences of hundreds of thousands of people across six continents to show us the potential for change. Through sharing information about the community, empowering decision-making discretion and autonomy, creating a respectful environment, offering feedback, providing a sense of meaning, and boosting member well-being, anyone can help a community truly flourish. The applications are endless, the stories are positive and uplifting, and will inspire the reader to establish and grow their community—be it in the workplace or the PTA—and make it thrive.

A leading expert in animal behavior takes us into the wild to better understand and manage our fears. Fear, honed by millions of years of natural selection, kept our ancestors alive. Whether by slithering away, curling up in a ball, or standing still in the presence of a predator, humans and other animals have evolved complex behaviors in order to survive the hazards the world presents. But, despite our evolutionary endurance, we still have much to learn about how to manage our response to danger. For more than thirty years, Daniel Blumstein has been studying animals’ fear responses. His observations lead to a firm conclusion: fear preserves security, but at great cost. A foraging flock of birds expends valuable energy by quickly taking flight when a raptor appears. And though the birds might successfully escape, they leave their food source behind. Giant clams protect their valuable tissue by retracting their mantles and closing their shells when a shadow passes overhead, but then they are unable to photosynthesize, losing the capacity to grow. Among humans, fear is often an understandable and justifiable response to sources of threat, but it can exact a high toll on health and productivity. Delving into the evolutionary origins and ecological contexts of fear across species, *The Nature of Fear* considers what we can learn from our fellow animals—from successes and failures. By observing how animals leverage alarm to their advantage, we can develop new strategies for facing risks without panic.

One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated Cities can make us sick. They always have—diseases spread more easily when more people are close to one another. And disease is hardly the only ill that accompanies urban density. Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on. But cities have flourished nonetheless because they are humanity ’ s greatest invention, indispensable engines for creativity, innovation, wealth, and connection, the loom on which the fabric of civilization is woven. But cities now stand at a crossroads. During the global COVID crisis, cities grew silent as people worked from home—if they could work at all. The normal forms of socializing ground to a halt. How permanent are these changes? Advances in digital technology mean that many people can opt out of city life as never before. Will they? Are we on the brink of a post-urban world? City life will survive but individual cities face terrible risks, argue Edward Glaeser and David Cutler, and a wave of urban failure would be absolutely disastrous. In terms of intimacy and inspiration, nothing can replace what cities offer. Great cities have always demanded great management, and our current crisis has exposed fearful gaps in our capacity for good governance. It is possible to drive a city into the ground, pandemic or not. Glaeser and Cutler examine the evolution that is already happening, and describe the possible futures that lie before us: What will distinguish the cities that will flourish from the ones that won ’ t? In America, they argue, deep inequities in health care and education are a particular blight on the future of our cities; solving them will be the difference between our collective good health and a downward spiral to a much darker place.
