A leading expert in animal behavior takes us into the wild to better understand and manage our fears. Fear, honed by millions of years of natural selection, kept our ancestors alive. Whether by slithering away, curling up in a ball, or standing still in the presence of a predator, humans and other animals have evolved complex behaviors in order to survive the hazards the world presents. But, despite our evolutionary endurance, we still have much to learn about how to manage our response to danger. For more than thirty years, Daniel Blumstein has been studying animals' fear responses. His observations lead to a firm conclusion: fear preserves security, but at great cost. A foraging flock of birds expends valuable energy by quickly taking flight when a raptor appears. And though the birds might successfully escape, they leave their food source behind. Giant clams protect their valuable tissue by retracting their mantles and closing their shells when a shadow passes overhead, but then they are unable to photosynthesize, losing the capacity to grow. Among humans, fear is often an understandable and justifiable response to sources of threat, but it can exact a high toll on health and productivity. Delving into the evolutionary origins and ecological contexts of fear across species, *The Nature of Fear* considers what we can learn from our fellow animals—from successes and failures. By observing how animals leverage alarm to their advantage, we can develop new strategies for facing risks without panic.

Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara ’ s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she ’ d traveled too far, if there was still a way home. “Beautiful and propulsive . . . The award-winning author of *Confederate Reckoning* challenges the idea that women are outside of war, through a trio of dramatic stories revealing women's transformative role in the American Civil War. We think of war as a man's world, but women have always played active roles in times of violence and been left to pick up the pieces in societies decimated by war. In this groundbreaking reconsideration of the Civil War, the award-winning author of *Confederate Reckoning* invites us to see America's bloodiest conflict not just as pitting brother against brother but as a woman's war. When the war broke out, Union soldiers assumed Confederate women would be innocent noncombatants. Experience soon challenged this simplistic belief. Through a trio of dramatic stories, Stephanie McCurry reveals the vital and sometimes confounding roles women played on and off the battlefield. We meet Clara Judd, a Confederate spy whose imprisonment for treason sparked heated controversy, defying the principle of civilian immunity and leading to lasting changes in the laws of war. Hundreds of thousands of enslaved women escaped across Union lines, upending emancipation policies that extended only to enslaved men. The Union's response was to classify fugitive black women as "soldiers' wives," regardless of whether they were married—offering them some protection but placing new obstacles on their path to freedom. In the war's aftermath, the Confederate grande dame Gertrude Thomas wrestled with her loss of status and of her former slaves. War, emancipation, and economic devastation affected her family intimately, and through her life McCurry helps us see how fundamental the changes of Reconstruction were. *Women's War* dismantles the long-standing fiction that women are outside of war and shows that they were indispensable actors in the Civil War, as they have been—and continue to be—in all wars.

A Harvard graduate, Rhodes Scholar, and devout Catholic tells you everything you need to know about keeping your faith at a modern university. Drawing on her recent experience, Aurora Griffin shares forty practical tips relating to academics, community, prayer, and service that helped her stay Catholic in college. She reminds us that keeping the faith is a conscious decision, reinforced by commitment to daily practices. Aurora's story illustrates that when you decide your faith matters to you, no one can take it away, even in the most secular environments and under strong peer pressure. Throughout the book, she shows how being

Catholic in college did not prevent her from having a full "college experience," but actually enabled her to make the most of her time at Harvard. Aurora encourages students who are about to begin this formative journey, or those now in college, that the most valuable parts of college life -- lasting friendships, intellectual growth, and cherished memories -- are experienced in a more meaningful way when lived in and through the Catholic faith.

The forgotten story of 200,000 Polish Jews who escaped the Holocaust as refugees stranded in remote corners of the USSR. Between 1940 and 1946, about 200,000 Jewish refugees from Poland lived and toiled in the harsh Soviet interior. They endured hard labor, bitter cold, and extreme deprivation. But out of reach of the Nazis, they escaped the fate of millions of their coreligionists in the Holocaust. Survival on the Margins is the first comprehensive account in English of their experiences. The refugees fled Poland after the German invasion in 1939 and settled in the Soviet territories newly annexed under the Molotov-Ribbentrop Pact. Facing hardship, and trusting little in Stalin, most spurned the offer of Soviet citizenship and were deported to labor camps in unoccupied areas of the east. They were on their own, in a forbidding wilderness thousands of miles from home. But they inadvertently escaped Hitler's 1941 advance into the Soviet Union. While war raged and Europe's Jews faced genocide, the refugees were permitted to leave their settlements after the Soviet government agreed to an amnesty. Most spent the remainder of the war coping with hunger and disease in Soviet Central Asia. When they were finally allowed to return to Poland in 1946, they encountered the devastation of the Holocaust, and many stopped talking about their own ordeals, their stories eventually subsumed within the central Holocaust narrative. Drawing on untapped memoirs and testimonies of the survivors, Eliyana Adler rescues these important stories of determination and suffering on behalf of new generations.

"[C]harming and surprising. . . The best depiction of elite whiteness I've read."—New York Times **A Most Anticipated Book** by Vogue.com • Parade • Town & Country • Nylon • New York Post • Lit Hub • BookRiot • Electric Literature • Glamour • Marie Claire • Publishers Weekly • Bustle • Fodor's Travel • Business Insider • Pop Sugar • InsideHook • SheReads Early on in Kendra James' professional life, she began to feel like she was selling a lie. As an admissions officer specializing in diversity recruitment for independent prep schools, she persuaded students and families to embark on the same perilous journey she herself had made—to attend cutthroat and largely white schools similar to The Taft School, where she had been the first African-American legacy student only a few years earlier. Her new job forced her to reflect on her own elite education experience, and to realize how disillusioned she had become with America's inequitable system. In *ADMISSIONS*, Kendra looks back at the three years she spent at Taft, chronicling clashes with her lily-white roommate, how she had to unlearn the respectability politics she'd been raised with, and the fall-out from a horrifying article in the student newspaper that accused Black and Latinx students of being responsible for segregation of campus. Through these stories, some troubling, others hilarious, she deconstructs the lies and half-truths she herself would later tell as an admissions professional, in addition to the myths about boarding schools perpetuated by popular culture. With its combination of incisive social critique and uproarious depictions of elite nonsense, *ADMISSIONS* will resonate with anyone who has ever been The Only One in a room, dealt with racial microaggressions, or even just suffered from an extreme case of homesickness.

From the world's foremost intellectual activist, an irrefutable analysis of America's pursuit of total domination and the catastrophic consequences that are sure to follow The United States is in the process of staking out not just the globe but the last unarmed spot in our neighborhood—the heavens—as a militarized sphere of influence. Our earth and its skies are, for the Bush administration, the final frontiers of imperial control. In *Hegemony or Survival*, Noam Chomsky investigates how we came to this moment, what kind of peril we find ourselves in, and why our rulers are willing to jeopardize the future of our species. With the striking logic that is his trademark, Chomsky dissects America's quest for global supremacy, tracking the U.S. government's aggressive pursuit of policies intended to achieve "full spectrum dominance" at any cost. He lays out vividly how the various strands of policy—the militarization of space, the ballistic-missile defense program, unilateralism, the dismantling of international agreements, and the response to the Iraqi crisis—cohere in a drive for hegemony that ultimately threatens our survival. In our era, he argues, empire is a recipe

for an earthly wasteland. Lucid, rigorous, and thoroughly documented, *Hegemony or Survival* promises to be Chomsky's most urgent and sweeping work in years, certain to spark widespread debate.

One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated. Cities can make us sick. They always have—diseases spread more easily when more people are close to one another. And disease is hardly the only ill that accompanies urban density. Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on. But cities have flourished nonetheless because they are humanity's greatest invention, indispensable engines for creativity, innovation, wealth, and connection, the loom on which the fabric of civilization is woven. But cities now stand at a crossroads. During the global COVID crisis, cities grew silent as people worked from home—if they could work at all. The normal forms of socializing ground to a halt. How permanent are these changes? Advances in digital technology mean that many people can opt out of city life as never before. Will they? Are we on the brink of a post-urban world? City life will survive but individual cities face terrible risks, argue Edward Glaeser and David Cutler, and a wave of urban failure would be absolutely disastrous. In terms of intimacy and inspiration, nothing can replace what cities offer. Great cities have always demanded great management, and our current crisis has exposed fearful gaps in our capacity for good governance. It is possible to drive a city into the ground, pandemic or not. Glaeser and Cutler examine the evolution that is already happening, and describe the possible futures that lie before us: What will distinguish the cities that will flourish from the ones that won't? In America, they argue, deep inequities in health care and education are a particular blight on the future of our cities; solving them will be the difference between our collective good health and a downward spiral to a much darker place.

"From young activists at the forefront of the movement to end sexual assault on college campuses, a collection of survivor stories that will connect with students and inform and inspire us all. Across the U.S. student activists are exposing a pervasive cover-up of sexual assault on college campuses. Every day more survivors come forward. But other survivors choose not to. *We Believe You* elevates the stories the headlines about this issue have been missing—more than 30 experiences of trauma, healing and everyday activism, representing a diversity of races, economic and family backgrounds, gender identities, immigration statuses, interests, capacities and loves. More than 1 in 5 women and 5 percent of men are sexually assaulted at college, a shocking status quo that might have stayed largely hidden and unaddressed but for the two authors of *We Believe You*. In 2013, Annie E. Clark and Andrea L. Pino, then 23 and 20, building on the work of earlier activists, outed themselves as assault survivors and filed a federal complaint against the University of North Carolina (Chapel Hill) for mishandling such crimes; within a month, the U.S. government began to investigate UNC. Within a year, dozens of colleges were under federal investigation. But Clark and Pino rightly see themselves as two among many. Students from every kind of college and university—large and small, public and private, highly selective and less so—are sounding alarms and staking claims to justice by filing complaints, by pressing charges, and by simply living beyond the effects of assault and the betrayals of their schools. A sampling of their voices speak out in this book"--

Speak enters the world of *Gossip Girl* in this modern immigrant story from New York Times

bestselling author Kelly Yang about two girls navigating wealth, power, friendship, and trauma.

They're called parachutes: teenagers dropped off to live in private homes and study in the United States while their wealthy parents remain in Asia. Claire Wang never thought she'd be one of them, until her parents pluck her from her privileged life in Shanghai and enroll her at a high school in California. Suddenly she finds herself living in a stranger's house, with no one to tell her what to do for the first time in her life. She soon embraces her newfound freedom, especially when the hottest and most eligible parachute, Jay, asks her out. Dani De La Cruz, Claire's new host sister, couldn't be less thrilled that her mom rented out a room to Claire. An academic and debate team star, Dani is determined to earn her way into Yale, even if it means competing with privileged kids who are buying their way to the top. But Dani's game plan veers unexpectedly off course when her debate coach starts working with her privately. As they steer their own distinct paths, Dani and Claire keep crashing into one another, setting a course that will change their lives forever.

\*\*A Forbes Best Business Book of the Year, 2015\*\* \*\*Winner of the 2015 800-CEO-READ Business Book Award in Entrepreneurship\*\* When columnist Paul Downs was approached by The New York Times to write for their "You're the Boss" blog, he had been running his custom furniture business for twenty-four years strong, or mostly strong. Now, in his first book, Downs paints an honest portrait of a real business, with a real boss, a real set of employees, and the real challenges they face. Fresh out of college in 1986, Downs opened his first business, a small company that builds custom furniture. In 1987, he hired his first employee. That's when things got complicated. As his enterprise began to grow, he had to learn about management, cash flow, taxes, and so much more. But despite any obstacles, Downs always remained keenly aware that every small business, no matter the product it makes or the service it provides, starts with people. He writes with tremendous insight about hiring employees, providing motivation to get the best out of them, and the difficult decisions he's made to let some of them go. Downs also looks outward, to his dealings with vendors and to providing each client with exemplary customer service from first sales pitch to final delivery. With honesty and conviction, he tells the true story behind building and sustaining a successful company in an ever-evolving economy, often airing his own failures and shortcomings to reveal the difficulties that arise from being a boss and a businessperson. Countless employees have told the story of their experience with managers—Boss Life tells the other side of that story.

*One L*, Scott Turow's journal of his first year at law school and a best-seller when it was first published in 1977, has gone on to become a virtual bible for prospective law students. Not only does it introduce with remarkable clarity the ideas and issues that are the stuff of legal education; it brings alive the anxiety and competitiveness—with others and, even more, with oneself—that set the tone in this crucible of character building. Each September, a new crop of students enter Harvard Law School to begin an intense, often grueling, sometimes harrowing year of introduction to the law. Turow's group of *One L*s are fresh, bright, ambitious, and more than a little daunting. Even more impressive are the faculty. Will the *One L*s survive? Will they excel? Will they make the *Law Review*, the outward and visible sign of success in this ultra-conservative microcosm? With remarkable insight into both his fellows and himself, Turow leads us through the ups and downs, the small triumphs and tragedies of the year, in an absorbing and thought-provoking narrative that teaches the reader not only about law school and the law but about the human beings who make them what they are. In the new afterword for this edition of *One L*, the author looks back on law school from the perspective of ten years' work as a lawyer and offers some suggestions for reforming legal education.
