That Is That: Essays About True Nature is a collection of articles and answers to questions posed by spiritual seekers. It captures the essence of spiritual inquiry and provides the reader with a real transmission of Presence on every page. It is much more than an

exposition about our true nature as infinite Oneness, it offers an experiential exploration of who we really are, not only through the transmission in the words, but through the many thoughtful questions it raises. Nirmala's warm-hearted and accepting presence makes it possible to drop into the space he so eloquently describes, where peace, love, and joy abide. He is a master at helping you fall in love with life and the many expressions of the one Being we all are.

True-Love is the fulfillment of revered poet-critic Allen Grossman's long service to poetry in the interests of humanity. Poetry's singular mission is to bind love and truth together—love that desires the beloved's continued life, knotted with the truth of life's contingency—to help make us more present to each other. In the spirit of Blake's vow of "mental fight," Grossman contends with challenges to the validity of the poetic imagination, from Adorno's maxim "No poetry after Auschwitz," to the claims of religious authority upon truth, and the ultimate challenge posed by the fact of death itself. To these challenges he responds with eloquent and rigorous arguments, drawing on wide resources of learning and his experience as master-poet and teacher. Grossman's readings of Wordsworth, Hart

Crane, Paul Celan, and others focus on poems that interrogate the real or enact the hard bargains that literary representation demands. True-Love is destined to become an essential book wherever poetry and criticism sustain one another.

Thisness Presentism outlines and defends a novel version of presentism, the view that only present entities exist and what is present really changes, a view of time that captures a real and objective difference between what is past, present, and future, and which offers a model of reality that is dynamic and mutable, rather than static and immutable. The book advances a new defence of presentism by developing a novel ontology of thisness, combining insights about the nature of essence, the metaphysics of propositions, and the relationship between true propositions and the elements of reality that make them true, alongside insights about time itself. It shows how, by accepting an ontology of thisness, presentists can respond to a number of pressing challenges to presentism, including claims that presentism cannot account for true propositions about the past, and that it is inconsistent with the reality of temporal passage and the openness of the future. This is one of the only book-length defences of presentism. It will be of interest to students and scholars working on the debate about presentism in the philosophy of time, as well as those interested

in the metaphysics of propositions and truth-making, more generally. **Fiske Real College Essays that Work** PREP Publishing

This title was first published in 2003. Richard Sylvan died in 1996, he had made contributions to many areas of philosophy, such as, relevant and paraconsistent logic, Meinongianism and metaphysics and environmental ethics. One of his "trademarks" was the taking up of unpopular views and defending them. To Richard Sylvan ideas were important, whether they were his or not. This is a book of ideas, based on a collection of work found after his death, a chance for readers to see his vision of his projects. This collected works represents material drafted between 1982 and 1996, and the theme is that a small band of logics, namely pararelevant logics, offer solutions to many problems, puzzles and paradoxes in the philosophy of science.

The writings of the "dean of the New York School of Abstract-Expressionist Painting." "The creative process lies not in imitating, but in paralleling nature; translating the impulse received from nature into the medium of

expression, thus vitalizing this medium. The picture should be alive, the statue should be alive and every work of art should be alive." Thus Hans Hofmann wrote nearly half a century ago. He left the Old World, Germany, for the New, at the age of 50. In 1948, when the retrospective exhibition was held at the Addison Gallery of American Art, Hofmann was 68; he had been in the United States for 18 years, a citizen for seven years. Yet he was scarcely recognized in Europe or America as an artist of significance and had never had a full-scale retrospective exhibition of his work. Beginning with a group exhibition in Germany in 1909, he had been given 12 one-man shows and had been included in four group exhibitions before the exhibit at Andover. Subsequently, he was to have 33 one-man shows and to be in over 60 group exhibitions, including the 1960 Venice Biennale, in which he was one of the four artists chosen to represent America. The catalogue of the 1948 retrospective at the Addison Gallery incorporated Hofmann's writings, all originally written in German, some pieces translated fluently, others awkwardly paraphrasing the original. He had written them over a period of 40 years for periodicals journals, or his own teaching purposes; occasionally they overlapped; there was no sequence of development. In the original volume of *Search for the Real*, published in 1948, it was felt desirable to edit his writing as little as possible, nevertheless to present the essays in the most lucid English true to his meaning, printed only with his approval. "The Search for the Real in the Visual Arts," "Sculpture," and "Painting and Culture" were all printed in full. The section "Excerpts from the Teaching of Hans Hofmann" was composed of selections from his essays "On the Aims of Art" and "Plastic Creation." The last brief section, "Terms," was gleaned from the other essays, lectures, diagrams, notes, and cryptic memoranda written to himself, headed by one of Hoffman's diagrams. It was a further distillation of his own definitions in the nature of a vocabulary. In the last 18 years of his life, recognition was his, nationally and internationally, in proportion to the originality and depth of his thinking, his versatility and comprehensiveness, his productivity and vigor. His

was a prophetic visual expression of action in a three-dimensional world on a vibrating two-dimensional surface. He was a dynamic teacher; the wide range of his influence is to be seen in the list of artists comprising an exhibition "Hans Hofmann and His Students," circulated in America and abroad during the three years before his death in 1966. Among the 32 painters and sculptors in this exhibition were students as varied in their developed personal idioms as Helen Frankenthaler, Larry Rivers, Louise Nevelson, Richard Stankiewicz, and Alan Kaprow. Running simultaneously and also shown in South America and Europe as well as in the United States, a one-man show of 40 major works initiated by the Museum of Modern Art, New York, is a testimony to the words of the "dean of the New York School of Abstract-Expressionist Painting."

True Legend Basic Books
What does it mean to be truthful? What role does truth play in our lives? What do we lose if we reject truthfulness? No philosopher is better suited to answer these questions than Bernard Williams. Writing with his characteristic combination of passion and elegant simplicity, he explores the value of truth and finds it to be both less and more than we might imagine. Modern culture exhibits two attitudes toward truth: suspicion of being deceived (no one wants to be fooled) and skepticism that objective truth exists at all (no one wants to be naive). This tension between a demand for truthfulness and the doubt that there is any truth to be found is not an abstract paradox. It has political consequences and signals a danger that our intellectual activities, particularly in the humanities, may tear themselves to pieces.

Williams's approach, in the tradition of Nietzsche's genealogy, blends philosophy, history, and a fictional account of how the human concern with truth might have arisen. Without denying that we should worry about the contingency of much that we

take for granted, he defends truth as an intellectual objective and a cultural value. He identifies two basic virtues of truth, Accuracy and Sincerity, the first of which aims at finding out the truth and the second at telling it. He describes different psychological and social forms that these virtues have taken and asks what ideas can make best sense of them today.

Truth and Truthfulness presents a powerful challenge to the fashionable belief that truth has no value, but equally to the traditional faith that its value guarantees itself. Bernard Williams shows us that when we lose a sense of the value of truth, we lose a lot both politically and personally, and may well lose everything.

Sociative Logics and Their Applications: Essays by the Late Richard Sylvan University of Chicago Press

An irresistible collection of favorite writings from an author celebrated for his bravura style and sheer unpredictability Francis Spufford's welcome first volume of collected essays gathers an

array of his compelling writings from the 1990s to the present. He makes use of a variety of encounters with particular places, writers, or books to address deeper questions relating to the complicated relationship between storytelling and truth-telling. How must a nonfiction writer imagine facts, vivifying them to bring them to life? How must a novelist create a dependable world of story, within which facts are, in fact, imaginary? And how does a religious faith felt strongly to be true, but not provably so, draw on both kinds of writerly imagination? Ranging freely across topics as diverse as the medieval legends of Cockaigne, the Christian apologetics of C. S. Lewis, and the tomb of Ayatollah Khomeini, Spufford provides both fresh observations and thought-provoking insights. No less does he inspire an irresistible urge to turn the page and read on.

Rebecca Solnit is the author of more than twenty books, including the international bestseller *Men Explain Things to Me*. Called "the voice of the resistance" by the *New York Times*, she has emerged as an essential guide to our times, through incisive commentary on feminism, violence, ecology, hope, and everything in between. In this powerful and wide-ranging collection of essays, Solnit turns her attention to the war at home. This is a war, she says, "with so many casualties that we should call it by its true name, this war with so many dead by police, by violent ex-husbands and partners and lovers, by people pursuing power and profit at the point of a gun or just shooting first and figuring out who they hit later." To get to the root of these American crises, she contends that "to acknowledge this state of war is to admit the need for peace," countering the despair of our age with a dose of solidarity, creativity, and hope.

"Solnit's exquisite essays move between the political and the personal, the intellectual and the earthy." —Elle "Solnit is careful with her words (she always is) but never so much that she mutes the infuriated spirit that drives these essays." —Kirkus Reviews (starred review) "Solnit [is]
